Dixie's Daughters Karen L. Cox,2019-02-04 Wall Street Journal's Five Best Books on the Confederates' Lost Cause Southern Association for Women Historians Julia Cherry Spruill Prize Even without the right to vote, members of the United Daughters of the Confederacy proved to have enormous social and political influence throughout the South—all in the name of preserving Confederate culture. Karen Cox traces the history of the UDC, an organization founded in 1894 to vindicate the Confederate generation and honor the Lost Cause. In this edition, with a new preface, Cox acknowledges the deadly riots in Charlottesville, Virginia, showing why myths surrounding the Confederacy continue to endure. The Daughters, as UDC members were popularly known, were daughters of the Confederate generation. While southern women had long been leaders in efforts to memorialize the Confederacy, UDC members made the Lost Cause a movement about vindication as well as memorialization. They erected monuments, monitored history for truthfulness, and sought to educate coming generations of white southerners about an idyllic past and a just cause—states' rights. Soldiers' and widows' homes, perpetuation of the mythology of the antebellum South, and pro-southern textbooks in the region's white public schools were all integral to their mission of creating the New South in the image of the Old. UDC members aspired to transform military defeat into a political and cultural victory, in which states' rights and white supremacy remained intact. To the extent they were successful, the Daughters helped to preserve and perpetuate an agenda for the New South that included maintaining the social status quo. Placing the organization's activities in the context of the postwar and Progressive-Era South, Cox describes in detail the UDC's origins and early development, its efforts to collect and preserve manuscripts and artifacts and to build monuments, and its later role in the peace movement and World War I. This remarkable history of the organization presents a portrait of two generations of southern women whose efforts helped shape the social and political culture of the New South. It also offers a new historical perspective on the subject of Confederate memory and the role southern women played in its development.

The Young Atheist's Handbook Alom Shaha,2012-07-19 Growing up in a strict Muslim community in south-east London, Alom Shaha learnt that religion was not to be questioned. Reciting the Qur'an without understanding what it meant was simply a part of life; so, too, was obeying the imam and enduring beatings when he failed to attend the local mosque. But Alom was more drawn to science and its power to illuminate. As a teen, he lived between two worlds: the home controlled by his authoritarian father, and a school alive with books and ideas. In a charming blend of memoir, philosophy and science, Alom explores the questions about faith and the afterlife that we all ponder. This is a book for anyone who wonders what they should believe and how they should live. It's for those who may need the facts and the ideas, as well as the courage, to break free from inherited beliefs. In this powerful narrative, Alom shows that it is possible to live a compassionate, fulfilling and meaningful life without God.

Racial Folly Gordon Briscoe,2010-02-01 Briscoe's grandmother remembered stories about the first white men coming to the Northern Territory. This extraordinary memoir shows us the history of an Aboriginal family who lived under the race laws, practices and policies of Australia in the twentieth century. It tells the story of a people trapped in ideological folly spawned to solve 'the half-caste problem'. It gives life to those generations of Aboriginal people assumed to have no history and whose past labels them only as shadowy figures. Briscoe's enthralling narrative combines his, and his contemporaries, institutional and family life with a high-level career at the heart of the Aboriginal political movement at its most dynamic time. It also documents the road he travelled as a seventeen year old fireman on the South Australia Railways to becoming the first Aboriginal person to achieve a PhD in history.

Marine Anthropogenic Litter Melanie Bergmann,Lars Gutow,Michael Klages,2015-06-01 This book describes how man-made litter, primarily plastic, has spread into the remotest parts of the oceans and covers all aspects of this pollution problem from the impacts on wildlife and human health to socio-economic and political issues. Marine litter is a prime threat to marine wildlife, habitats and food webs worldwide. The book illustrates how advanced technologies from deep-sea research, microbiology and mathematic modelling as well as classic beach litter counts by volunteers contributed to the broad awareness of marine litter as a problem of global significance. The authors summarise more than five decades of marine litter research, which receives growing attention after the recent discovery of great oceanic garbage patches and the ubiquity of microscopic plastic particles in marine organisms and habitats. In 16 chapters, authors from all over the world have created a universal view on the diverse field of marine litter pollution, the biological impacts, dedicated research activities, and the various national and international legislative efforts to combat this environmental problem. They recommend future research directions necessary for a comprehensive understanding of this environmental issue and the development of efficient management strategies. This book addresses scientists, and it provides a solid knowledge base for policy makers, NGOs, and the broader public.
