Television, Nation, and Culture in Indonesia Philip Kitley, 2014-07-31 The culture of television in Indonesia began with its establishment in 1962 as a public broadcasting service. From that time, through the deregulation of television broadcasting in 1990 and the establishment of commercial channels, television can be understood, Philip Kitley argues, as a part of the New Order's national culture project, designed to legitimate an idealized Indonesian national cultural identity. But Professor Kitley suggests that it also has become a site for the contestation of elements of the New Order's cultural policies. Based on his studies, he further speculates on the increasingly significant role that television is destined to play as a site of cultural and political struggle.

The Austronesians Peter Bellwood, James J. Fox, Darrell Tryon, 2006-09-01 The Austronesian-speaking population of the world are estimated to number more than 270 million people, living in a broad swathe around half the globe, from Madagascar to Easter Island and from Taiwan to New Zealand. The seventeen papers in this volume provide a general survey of these diverse populations focusing on their common origins and historical transformations. The papers examine current ideas on the linguistics, prehistory, anthropology and recorded history of the Austronesians.

American English Julie S. Amberg, Deborah J. Vause, 2009-10-30 This lively introduction to the study of language explores American English and its place within contemporary society, highlighting the role of language in our daily lives. Looking at Lovemaking John R. Clarke, 2001-04-16 Clarke teaches us to think about how this art was understood and felt by those who lived with it in their daily lives and he speculates that it might even reflect what the Romans actually did. This is the first genuinely contextual and theoretically informed study we have of a vast panoply of classical art about sex. It will be an illuminating book for classicists, historians, and anybody else who finds lovemaking interesting.—Thomas Laqueur, author of *Making Sex* There are few scholars as able to take on this material, as well versed in theories of sexuality, and as comfortable dealing with both heterosexual and homoerotic content as Clarke. The topic is timely and the execution is professional.—Natalie Kampen, Barnard College This book should attract not only classicists, but also scholars of sexuality in any field. Clarke succeeds both in introducing little-known material and in defamiliarizing the familiar examples of erotic art.—Anthony Corbeill, University of Kansas Looking at Lovemaking proves that the ancients were very different from you and me—that they saw sex not primarily as procreation and never as sin but rather as sport, art, and pleasure, an activity full of humor, tenderness and above all variety. John R. Clarke, by looking at Roman artifacts

from several centuries destined to be used by different social classes, reveals that the erotic visual record is far more varied, open-minded and playful than are written moral strictures, which were narrowly formulated by the élite and for the élite. This book is at once discreet and bold—discreetly respectful of nuance and context, boldly clear in drawing the widest possible conclusions about the malleability of human behavior. Clarke has, with meticulous scholarship and a fresh approach, vindicated Foucault's revolutionary claims for the social construction of sexuality.—Edmund White, author of The Beautiful Room is Empty

Dynamics of Industrial Revolution 4.0: Digital Technology Transformation and Cultural Evolution Ratri Wulandari,Idhar Resmadi,Vika Haristianti,Rahmiati Aulia,Riky Taufik Afif,Gema Ari Prahara,Aulia Ibrahim Yeru,2021-08-25 The 7th Bandung Creative Movement conference presented the theme Dynamics of Industrial Revolution 4.0 which discussed how the digital world and connectivity changed human culture in various aspects of life, and transformed in accordance to human needs and social culture. Digital technology has transformed society to serve people from manufacturing needs to smart cities, from network connectivity to people connectivity. The application of information technology has helped in improving live quality and environmental sustainability. Digital transformation is revolutionizing how businesses and workers interconnect to be more productive and efficient. The result is improved collaboration, faster processes and time-to-market, lower costs and better products. Devices are getting smarter, meaning they are able to perform more and more tasks without human intervention; moreover, these devices generate data that provide insights to further improve processes and gain greater efficiencies. Moreover, with the Internet of Things (IoT), all these smart devices are interconnected in ways that not only help make them even smarter, but also enhances the intelligence of the overall system. Digital technology is a formidable driver for the transformation of a highly carbon-dependent world into one that is more ecologically 'smart.' We are entering a new era of environmental innovation that is driving better alignment between technology and environmental goals. Since its first announcement in 2011, industrial revolution 4.0 has dynamically changed and transformed to adjust itself to the human needs and to serve more efficiency and effectiveness of everyday life as well as environmental enhancement. The 7th Bandung Creative Movement has brought forward discussions on dynamic changes, ups and downs, innovations, relations of industrial revolution of the internet of thing, data, automation, to human physical world, new art and aesthetic, business, product innovation, built environment, and education.

Literature of Java Theodore G. TH. Pigeaud,2013-06-29 The third, concluding volume of Literature of Java contains Addenda and a General Index, preceded by Illustrations, Facsimiles of Manuscripts, Maps and some Minor Notes, additions which may be of U'se to students of Javanese literature. The older catalogues of collections of Indonesian manuscripts (Javanese, Malay, Sundanese, Madurese, Balinese), which were written in Dutch, did not offer such additional aids to interested readers. One of the reasons was. , that the authors (Vreede, Brandes, van Ronkel, Juynboll, Berg) presupposed a certain knowledge of the Indones,ian peoples, their countries and their culture with Dutch students. As often as not the latter, or their families, had lived for many years in Java, and they were destined, when they had completed their studies in The Netherlands, to pass one or more decades of 'their active life in the ,tropics in the service of Government, the Christian Missions or the Bible Society. The Archipelago was their second home country. Some familiarity with things Indonesian was found in several circles of society in The Netherlands before the second world war, and information (though not always scholarly and exact) was supplied by quite a number of books and periodicals. For this reason it was thought superfluoU's to encumber specialistic books like catalogues of manuscripts with maps and general information which could be found easily elsewhere, for instance in the Dutch Encyclopaedie van Nederlandsch-Indie. As circumstances have changed it is.
