Blown to Bits Harold Abelson,Ken Ledeen,Harry R. Lewis,2008 'Blown to Bits' is about how the digital explosion is changing everything. The text explains the technology, why it creates so many surprises and why things often don't work the way we expect them to. It is also about things the information explosion is destroying: old assumptions about who is really in control of our lives.

The Mom Test Rob Fitzpatrick,2013-10-09 The Mom Test is a quick, practical guide that will save you time, money, and heartbreak. They say you shouldn't ask your mom whether your business is a good idea, because she loves you and will lie to you. This is technically true, but it misses the point. You shouldn't ask anyone if your business is a good idea. It's a bad question and everyone will lie to you at least a little . As a matter of fact, it's not their responsibility to tell you the truth. It's your responsibility to find it and it's worth doing right . Talking to customers is one of the foundational skills of both Customer Development and Lean Startup. We all know we're supposed to do it, but nobody seems willing to admit that it's easy to screw up and hard to do right. This book is going to show you how customer conversations go wrong and how you can do better.

The Anarchist Cookbook William Powell,2018-02-05 The Anarchist Cookbook will shock, it will disturb, it will provoke. It places in historical perspective an era when Turn on, Burn down, Blow up are revolutionary slogans of the day. Says the author This book... is not written for the members of fringe political groups, such as the Weatherman, or The Minutemen. Those radical groups don't need this book. They already know everything that's in here. If the real people of America, the silent majority, are going to survive, they must educate themselves. That is the purpose of this book. In what the author considers a survival guide, there is explicit information on the uses and effects of drugs, ranging from pot to heroin to peanuts. There i detailed advice concerning electronics, sabotage, and surveillance, with data on everything from bugs to scramblers. There is a comprehensive chapter on natural, non-lethal, and lethal weapons, running the gamut from cattle prods to sub-machine guns to bows and arrows.

The Craft of Scientific Presentations Michael Alley,2006-05-17 This timely and hugely practical work provides a score of examples from contemporary and historical scientific presentations to show clearly what makes an oral presentation effective. It considers presentations made to persuade an audience to adopt some course of action (such as funding a proposal) as well as presentations made to communicate information, and it considers these from four perspectives: speech, structure, visual aids, and delivery. It also discusses computer-based projections and slide shows as well as overhead projections. In particular, it looks at ways of organizing graphics and text in projected images and of using layout and design to present the information efficiently and effectively.

Hiroshima John Hersey,2020-06-23 Hiroshima is the story of six people—a clerk, a widowed seamstress, a physician, a Methodist minister, a young surgeon, and a German Catholic priest—who lived through the greatest single manmade disaster in history. In vivid and indelible prose, Pulitzer Prize-winner John Hersey traces the stories of these half-dozen individuals from 8:15 a.m. on August 6, 1945, when Hiroshima was destroyed by the first atomic bomb ever dropped on a city, through the hours and days that followed. Almost four decades after the original publication of this celebrated book, Hersey went back to Hiroshima in search of the people whose stories he had told, and his account of what he discovered is now the eloquent and moving final chapter of Hiroshima.

How to Build a Nuclear Bomb Frank Barnaby,2004 Outlines what it takes to make chemical, biological, and nuclear weapons; suggests who might be able to produce and use such weapons; and examines how effective countermeasures might be.

Ignition! John Drury Clark,2018-05-23 This newly reissued debut book in the Rutgers University Press Classics Imprint is the story of the search for a rocket propellant which could be trusted to take man into space. This search was a hazardous enterprise carried out by rival labs who worked against the known laws of nature, with no guarantee of success or safety. Acclaimed scientist and sci-fi author John Drury Clark writes with irreverent and eyewitness immediacy about the development of the explosive fuels strong enough to negate the relentless restraints of gravity. The resulting volume is as much a memoir as a work of history, sharing a behind-the-scenes view of an enterprise which eventually took men to the moon, missiles to the planets, and satellites to outer space. A classic work in the history of science, and described as “a good book on rocket stuff...that’s a really fun

one" by SpaceX founder Elon Musk, readers will want to get their hands on this influential classic, available for the first time in decades.

We Beat the Street Sampson Davis, George Jenkins, Rameck Hunt, Sharon Draper, 2006-04-20 Growing up on the rough streets of Newark, New Jersey, Rameck, George, and Sampson could easily have followed their childhood friends into drug dealing, gangs, and prison. But when a presentation at their school made the three boys aware of the opportunities available to them in the medical and dental professions, they made a pact among themselves that they would become doctors. It took a lot of determination—and a lot of support from one another—but despite all the hardships along the way, the three succeeded. Retold with the help of an award-winning author, this younger adaptation of the adult hit novel *The Pact* is a hard-hitting, powerful, and inspirational book that will speak to young readers everywhere.

The Ethnic Cleansing of Palestine Ilan Pappé, 2007-09-01 The book that is providing a storm of controversy, from 'Israel's bravest historian' (John Pilger) Renowned Israeli historian, Ilan Pappé's groundbreaking work on the formation of the State of Israel. 'Along with the late Edward Said, Ilan Pappé is the most eloquent writer of Palestinian history.' NEW STATESMAN Between 1947 and 1949, over 400 Palestinian villages were deliberately destroyed, civilians were massacred and around a million men, women, and children were expelled from their homes at gunpoint. Denied for almost six decades, had it happened today it could only have been called 'ethnic cleansing'. Decisively debunking the myth that the Palestinian population left of their own accord in the course of this war, Ilan Pappé offers impressive archival evidence to demonstrate that, from its very inception, a central plank in Israel's founding ideology was the forcible removal of the indigenous population. Indispensable for anyone interested in the current crisis in the Middle East. *** 'Ilan Pappé is Israel's bravest, most principled, most incisive historian.' JOHN PILGER 'Pappé has opened up an important new line of inquiry into the vast and fateful subject of the Palestinian refugees. His book is rewarding in other ways. It has at times an elegiac, even sentimental, character, recalling the lost, obliterated life of the Palestinian Arabs and imagining or regretting what Pappé believes could have been a better land of Palestine.' TIMES LITERARY SUPPLEMENT 'A major intervention in an argument that will, and must, continue. There's no hope of lasting Middle East peace while the ghosts of 1948 still walk.' INDEPENDENT
