**I'd Like to Play Alone, Please** Tom Segura, 2022-06-14 A #2 NEW YORK TIMES BESTSELLER From a massively successful stand-up comedian and co-host of chart-topping podcasts "2 Bears 1 Cave" and "Your Mom's House," hilarious real-life stories of parenting, celebrity encounters, youthful mistakes, misanthropy, and so much more. Tom Segura is known for his twisted takes and irreverent comedic voice. But after a few years of crazy tours and churning out podcasts weekly, all while parenting two young children, he desperately needs a second to himself. It's not that he hates his friends and family – he's not a monster – he's just beat, which is why his son's (ruthless) first full sentence, "I'd like to play alone, please," has since become his mantra. In this collection of stories, Tom combines his signature curmudgeonly humor with a revealing look at some of the ridiculous situations that shaped him and the ludicrous characters who always seem to seek him out. The stories feature hilarious anecdotes about Tom's time on the road, including some surreal encounters with celebrities at airports; his unfiltered South American family; the trials and tribulations of parenting young children with bizarrely morbid interests; and, perhaps most memorably, experiences with his dad who, like any good Baby Boomer father, loves to talk about his bowel movements and share graphic Vietnam stories at inappropriate moments. All of this is enough to make anyone want some peace and quiet. I'D LIKE TO PLAY ALONE, PLEASE will have readers laughing out loud and nodding in agreement with Segura's message: in a world where everyone is increasingly insane, sometimes you just need to be alone.

**Measuring Globalisation** Axel Dreher, Noel Gaston, Pim Martens, 2008-12-05 Globalisation is a timely and controversial topic. Against the chorus of globalisation's proponents and detractors, the authors propose an approach for measuring globalisation and its consequences. Undertaking a comprehensive review of the literature on globalisation and using data from the MGI and KOF indices, the well-respected authors build a framework for defining globalisation and analyzing the relationships among economic, political, and social variables.

**Biology, Ecology and Management of Aquatic Plants** Joseph Caffrey, Philip R.F. Barrett, Maria Teresa Ferreira, Ilidio S. Moreira, Kevin J. Murphy, Philip Max Wade, 2013-04-17 There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.

**Moon Tiger** Penelope Lively, 2007-12-01 "A powerful, moving and beautifully wrought novel about the ways in which lives are molded by personal memory and the collective past." –The Boston Globe Winner of the Man Booker Prize Elderly, uncompromising Claudia Hampton lies in a London hospital bed with memories of life fluttering through her fading consciousness. An author of popular history, Claudia proclaims she's carrying out her last project: a history of the world. This history turns out to be a mosaic of her life, her own story tangled with those of her brother, her lover and father of her daughter, and the center of her life, Tom, her one great love found and lost in war-torn Egypt. Always the independent woman, often with contentious relationships, Claudia's personal history is complex and fascinating. As people visit Claudia, they shake and twist the mosaic, changing speed, movement, and voice, to reveal themselves and Claudia's impact on their world. "Emotionally, Moon Tiger is kaleidoscopic, deeply satisfying. The all too brief encounter between Claudia and Tom will surely rate as one of the most memorable of contemporary fictional affairs. This is one of the best novels I have read for years." –The London Sunday Telegraph "It pulls us in; it engages us and saddens us. It is also unexpectedly funny . . . It leaves its traces in the air long after you've put it away." –The New York Times Book Review "One of the very best Booker winners . . . it asks hard questions about memory and history and personal legacy; it's stylistically demanding and inventive . . . a wonderful book." –The Guardian

**Clinical Pathways in Stroke Rehabilitation** Thomas Platz, 2021-01-14 This open access book focuses on practical clinical problems that are frequently encountered in stroke rehabilitation. Consequences of diseases, e.g. impairments and activity limitations, are addressed in rehabilitation with the overall goal to reduce disability and promote participation. Based on the available best external evidence, clinical pathways are described for stroke rehabilitation bridging the gap between clinical evidence and clinical decision-making. The clinical pathways answer the questions which rehabilitation treatment options are beneficial to overcome specific impairment constellations and activity limitations and are well acceptable to stroke survivors, as well as when and in which settings to provide rehabilitation over the course of recovery post stroke. Each chapter starts with a description of the clinical problem encountered. This is followed by a systematic, but concise review of the evidence (RCTs, systematic reviews and meta-analyses) that is relevant for clinical decision-making, and comments on assessment, therapy (training, technology, medication), and the use of technical aids as appropriate. Based on these summaries, clinical algorithms / pathways are provided and the main clinical-decision situations are portrayed. The book is invaluable for all neurorehabilitation team members, clinicians, nurses, and therapists in neurology, physical medicine and rehabilitation, and related fields. It is a World Federation for NeuroRehabilitation (WFNR) educational initiative, bridging the gap between the rapidly expanding clinical research in stroke rehabilitation and clinical practice across societies and continents. It can be used for both clinical decision-making for individuals and as well as clinical background knowledge for stroke rehabilitation service development initiatives.

**Techne in Aristotle's Ethics** Tom Angier, 2010-01-01 Argues for the importance of the concept of 'techne' in constructing a new understanding of Aristotle's moral philosophy.

**The Opportunist** Tarryn Fisher, 2018-07-26 The Opportunist Olivia Kaspen never imagined she'd get a second chance with her first love, the one she foolishly let slip away. When fate brings them together in a chance encounter, Olivia discovers that not only has Caleb Drake moved on, but he's forgotten her too. Olivia finds herself asking

how far she is willing to go to get him back. Standing in her way is his new girlfriend, a red-headed viper named Leah Smith. Olivia must fight for what was once hers, and in the process discover that sometimes love falls short of redemption.

**12 Rules for Life** Jordan B. Peterson, 2018-01-23 #1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. 12 Rules for Life shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

**Textbook of Clinical Trials** David Machin, Simon Day, Sylvan Green, 2007-01-11 Now published in its Second Edition, the Textbook of Clinical Trials offers detailed coverage of trial methodology in diverse areas of medicine in a single comprehensive volume. Praise for the First Edition: ... very useful as an introduction to clinical research, or for those planning specific studies within therapeutic or disease areas. BRITISH JOURNAL OF SURGERY, Vol. 92, No. 2, February 2005 The book's main concept is to describe the impact of clinical trials on the practice of medicine. It separates the information by therapeutic area because the impact of clinical trials, the problems encountered, and the numbers of trials in existence vary tremendously from specialty to specialty. The sections provide a background to the disease area and general clinical trial methodology before concentrating on particular problems experienced in that area. Specific examples are used throughout to address these issues. The Textbook of Clinical Trials, Second Edition: Highlights the various ways clinical trials have influenced the practice of medicine in many therapeutic areas Describes the challenges posed by those conducting clinical trials over a range of medical specialties and allied fields Additional therapeutic areas are included in this Second Edition to fill gaps in the First Edition as the number and complexity of trials increases in this rapidly developing area Newly covered or updated in the Second Edition: general surgery, plastic surgery, aesthetic surgery, palliative care, primary care, anaesthesia and pain, transfusion, wound healing, maternal and perinatal health, early termination, organ transplants, ophthalmology, epilepsy, infectious disease, neuro-oncology, adrenal, thyroid and urological cancers, as well as a chapter on the Cochrane network An invaluable resource for pharmaceutical companies, the Textbook of Clinical Trials, Second Edition appeals to those working in contract research organizations, medical departments and in the area of public health and health science alike.

**Bifurcation Stenting** Ron Waksman, John A. Ormiston, 2012-03-22 Here is expert guidance on one of the most vexing clinical challenges faced by interventional cardiologists. Written by global thought leaders in the area and edited by two internationally-recognized pioneers in interventional cardiology, Bifurcation Stenting covers all techniques, imaging modalities, and devices in current use, including VH-IVUS and OCT. It includes practical tips/tricks from leading experts and a section of challenging cases to further illustrate the material and help readers better understand the treatment of bifurcation lesions.

**Modern Portfolio Theory** Jack Clark Francis, Dongcheol Kim, 2013-01-18 A through guide covering Modern Portfolio Theory as well as the recent developments surrounding it Modern portfolio theory (MPT), which originated with Harry Markowitz's seminal paper Portfolio Selection in 1952, has stood the test of time and continues to be the intellectual foundation for real-world portfolio management. This book presents a comprehensive picture of MPT in a manner that can be effectively used by financial practitioners and understood by students. Modern Portfolio Theory provides a summary of the important findings from all of the financial research done since MPT was created and presents all the MPT formulas and models using one consistent set of mathematical symbols. Opening with an informative introduction to the concepts of probability and utility theory, it quickly moves on to discuss Markowitz's seminal work on the topic with a thorough explanation of the underlying mathematics. Analyzes portfolios of all sizes and types, shows how the advanced findings and formulas are derived, and offers a concise and comprehensive review of MPT literature Addresses logical extensions to Markowitz's work, including the Capital Asset Pricing Model, Arbitrage Pricing Theory, portfolio ranking models, and performance attribution Considers stock market developments like decimalization, high frequency trading, and algorithmic trading, and reveals how they align with MPT Companion Website contains Excel spreadsheets that allow you to compute and graph Markowitz efficient frontiers with riskless and risky assets If you want to gain a complete understanding of modern portfolio theory this is the book you need to read.

**Love and Math** Edward Frenkel, 2013-10-01 An awesome, globe-spanning, and New York Times bestselling journey through the beauty and power of mathematics What if you had to take an art class in which you were only taught how to paint a fence? What if you were never shown the paintings of van Gogh and Picasso, weren't even told they existed? Alas, this is how math is taught, and so for most of us it becomes the intellectual equivalent of watching paint dry. In Love and Math, renowned mathematician Edward Frenkel reveals a side of math we've never seen, suffused with all the beauty and elegance of a work of art. In this heartfelt and passionate book, Frenkel shows that mathematics, far from occupying a specialist niche, goes to the heart of all matter, uniting us across cultures, time, and space. Love and Math tells two intertwined stories: of the wonders of mathematics and of one young man's journey learning and living it. Having braved a discriminatory educational system to become one of the twenty-first century's leading mathematicians, Frenkel now works on one of the biggest ideas to come out of math in the last 50 years: the Langlands Program. Considered by many to be a Grand Unified Theory of mathematics, the Langlands Program enables researchers to translate findings from one field to another so that they can solve problems, such as Fermat's last theorem, that had seemed intractable before. At its core, Love and Math is a story about accessing a new way of thinking, which can enrich our lives and empower us to better understand the world and our place in it. It is an invitation to discover the magic hidden universe of mathematics.

*Everyone You Hate Is Going to Die* Daniel Sloss,2021-10-12 One of this generation's hottest and boldest young comedians presents a transgressive and hilarious analysis of all of our dysfunctional relationships, and attempts to point us in the vague direction of sanity. Daniel Sloss's stand-up comedy engages, enrages, offends, unsettles, educates, comforts, and gets audiences roaring with laughter—all at the same time. In his groundbreaking specials, seen on Netflix and HBO, he has brilliantly tackled everything from male toxicity and friendship to love, romance, and marriage—and claims (with the data to back it up) that his on-stage laser-like dissection of relationships has single-handedly caused more than 300 divorces and 120,000 breakups. Now, in his first book, he picks up where his specials left off, and goes after every conceivable kind of relationship—with one's country (Sloss's is Scotland); with America; with lovers, ex-lovers, ex-lovers who you hate, ex-lovers who hate you; with parents; with best friends (male and female), not-best friends; with children; with siblings; and even with the global pandemic and our own mortality. In *Everyone You Hate Is Going to Die*, every human connection gets the brutally funny (and unfailingly incisive) Sloss treatment as he illuminates the ways in which all of our relationships are fragile and ridiculous and awful—but also valuable and meaningful and important.

*The Daily Stoic* Ryan Holiday,Stephen Hanselman,2016-10-18 From the team that brought you *The Obstacle Is the Way* and *Ego Is the Enemy*, a daily devotional of Stoic meditations—an instant Wall Street Journal and USA Today Bestseller. Why have history's greatest minds—from George Washington to Frederick the Great to Ralph Waldo Emerson, along with today's top performers from Super Bowl-winning football coaches to CEOs and celebrities—embraced the wisdom of the ancient Stoics? Because they realize that the most valuable wisdom is timeless and that philosophy is for living a better life, not a classroom exercise. *The Daily Stoic* offers 366 days of Stoic insights and exercises, featuring all-new translations from the Emperor Marcus Aurelius, the playwright Seneca, or slave-turned-philosopher Epictetus, as well as lesser-known luminaries like Zeno, Cleanthes, and Musonius Rufus. Every day of the year you'll find one of their pithy, powerful quotations, as well as historical anecdotes, provocative commentary, and a helpful glossary of Greek terms. By following these teachings over the course of a year (and, indeed, for years to come) you'll find the serenity, self-knowledge, and resilience you need to live well.

Understanding Society and Natural Resources Michael J. Manfredo,Jerry J. Vaske,Andreas Rechkemmer,Esther A. Duke,2014-06-11 In this edited open access book leading scholars from different disciplinary backgrounds wrestle with social science integration opportunities and challenges. This book explores the growing concern of how best to achieve effective integration of the social science disciplines as a means for furthering natural resource social science and environmental problem solving. The chapters provide an overview of the history, vision, advances, examples and methods that could lead to integration. The quest for integration among the social sciences is not new. Some argue that the social sciences have lagged in their advancements and contributions to society due to their inability to address integration related issues. Integration merits debate for a number of reasons. First, natural resource issues are complex and are affected by multiple proximate driving social factors. Single disciplinary studies focused at one level are unlikely to provide explanations that represent this complexity and are limited in their ability to inform policy recommendations. Complex problems are best explored across disciplines that examine social-ecological phenomenon from different scales. Second, multi-disciplinary initiatives such as those with physical and biological scientists are necessary to understand the scope of the social sciences. Too frequently there is a belief that one social scientist on a multi-disciplinary team provides adequate social science representation. Third, more complete models of human behavior will be achieved through a synthesis of diverse social science perspectives.

*Logo Design Workbook* Sean Adams,Noreen Morioka,Terry Lee Stone,2006-03-01 *Logo Design Workbook* focuses on creating powerful logo designs and answers the question, What makes a logo work? In the first half of this book, authors Sean Adams and Noreen Morioka walk readers step-by-step through the entire logo-development process. Topics include developing a concept that communicates the right message and is appropriate for both the client and the market; defining how the client's long-term goals might affect the look and needs of the mark; choosing colors and typefaces; avoiding common mistakes; and deciphering why some logos are successful whereas others are not. The second half of the book comprises in-depth case studies on logos designed for various industries. Each case study explores the design brief, the relationship with the client, the time frame, and the results.
