Copyright Law in an Age of Limitations and Exceptions Ruth L. Okediji, 2017-03-30 Copyright Law in an Age of Limitations and Exceptions brings together leading copyright scholars and the field's foremost authorities to consider the critical role of copyright law in shaping the complex social, economic, and political interaction critical for cultural productivity and human flourishing. The book addresses defining issues facing copyright law today, including justifications for copyright law's limitations and exceptions (L&Es), the role of authors in copyright, users' rights, fair use politics and reform, the three-step test in European copyright law, the idea/expression principle with respect to functional works, limits on the use of L&Es in scientific innovation, and L&Es as a tool for economic development in international copyright law. The book also presents case studies on the historical development of the concept of 'neighboring rights' and on Harvard Law School's pioneering model of global copyright education, made possible by the exercise of L&Es across national borders.

Behavioral Finance: The Second Generation Meir Statman, 2019-12-02 Behavioral finance presented in this book is the second-generation of behavioral finance. The first generation, starting in the early 1980s, largely accepted standard finance's notion of people's wants as "rational" wants—restricted to the utilitarian benefits of high returns and low risk. That first generation commonly described people as "irrational"—succumbing to cognitive and emotional errors and misled on their way to their rational wants. The second generation describes people as normal. It begins by acknowledging the full range of people's normal wants and their benefits—utilitarian, expressive, and emotional—distinguishes normal wants from errors, and offers guidance on using shortcuts and avoiding errors on the way to satisfying normal wants. People's normal wants include financial security, nurturing children and families, gaining high social status, and staying true to values. People's normal wants, even more than their cognitive and emotional shortcuts and errors, underlie answers to important questions of finance, including saving and spending, portfolio construction, asset pricing, and market efficiency.

The Digital Person Daniel J Solove, 2004 In a revealing study of how digital dossiers are created (usually without our knowledge), the author argues that we must rethink our understanding of what

privacy is and what it means in the digital age, and then reform the laws that define and regulate it. Reprint.

The Craft of Research, 2nd edition Wayne C. Booth,Gregory G. Colomb,Joseph M. Williams,2008-04-15 Since 1995, more than 150,000 students and researchers have turned to The Craft of Research for clear and helpful guidance on how to conduct research and report it effectively . Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, The Craft of Research explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding

question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources

Between the World and Me Ta-Nehisi Coates, 2015-07-14 #1 NEW YORK TIMES BESTSELLER • NATIONAL BOOK AWARD WINNER • NAMED ONE OF TIME’S TEN BEST NONFICTION BOOKS OF THE DECADE • PULITZER PRIZE FINALIST • NATIONAL BOOK CRITICS CIRCLE AWARD FINALIST • ONE OF OPRAH’S “BOOKS THAT HELP ME THROUGH” • NOW AN HBO ORIGINAL SPECIAL EVENT Hailed by Toni Morrison as “required reading,” a bold and personal literary exploration of America’s racial history by “the most important essayist in a generation and a writer who changed the national political conversation about race” (Rolling Stone) NAMED ONE OF THE MOST INFLUENTIAL BOOKS OF THE DECADE BY CNN • NAMED ONE OF PASTE’S BEST MEMOIRS OF THE DECADE • NAMED ONE OF THE TEN BEST BOOKS OF THE YEAR BY The New York Times Book Review • O: The Oprah Magazine • The Washington Post • People • Entertainment Weekly • Vogue • Los Angeles Times • San Francisco Chronicle • Chicago Tribune • New York • Newsday • Library Journal • Publishers Weekly In a profound work that pivots from the biggest questions about American history and ideals to the most intimate concerns of a father for his son, Ta-Nehisi Coates offers a powerful new framework for understanding our nation’s history and current crisis. Americans have built an empire on the idea of “race,” a falsehood that damages us all but falls most heavily on the bodies of black women and men—bodies exploited through slavery and segregation, and, today, threatened, locked up, and murdered out of all proportion. What is it like to inhabit a black body and find a way to live within it? And how can we all honestly reckon with this fraught history and free ourselves from its burden? *Between the World and Me* is Ta-Nehisi Coates’s attempt to answer these questions in a letter to his adolescent son. Coates shares with his son—and readers—the story of his awakening to the truth about his place in the world through a series of revelatory experiences, from Howard University to Civil War battlefields, from the South Side of Chicago to Paris, from his childhood home to the living rooms of mothers whose children’s lives were taken as American plunder. Beautifully woven from personal narrative, reimagined history, and fresh, emotionally charged reportage, *Between the World and Me* clearly illuminates the past, bracingly confronts our present, and offers a transcendent vision for a way forward.

Recolonizing Africa Mariam Mniga, 2024-03-19 Explaining how the legacy of colonialism and the nature of the liberal economy play a significant role in the development of Africa today, keeping Africa

poor and dependent, this book explains how trade liberalization, deregulation, and privatization had opened doors for the New Scramble for Africa. Green technology and the high demand for electronics have intensified Africa's role as a supplier of raw materials, natural resources, and cheap labor and as a large market of more than one billion people in the global economy. This unique ethnographic study, with elements of autoethnography, starts with the author's journey to Bulyanhulu, Tanzania, one of the largest gold mines in Africa, and moves to a broader analysis that reveals the systemic violence of resource extraction. Focus groups, interviews, and observations demonstrate the lack of distributive justice and intersectional equality in the process of land acquisition and resource extraction, described by villagers in racialized and gendered terms as exploitative and part of a racist system that fails to provide a fair distribution of benefits to local people. *Recolonizing Africa* examines resource conflicts among local people, governments, and transnational corporations from Europe, North America, and Asia, revealing how global systemic violence and irresponsible business practices precipitate economic inequality between African and financially rich nations – threatening peace and security, indigenous rights, and the environment.

Free Culture Lawrence Lessig, 2015-11-13 How big media uses technology and the law to lock down culture and control creativity. *Free Culture* is an entertaining and important look at the past and future of the cold war between the media industry and new technologies. - Marc Andreessen, cofounder of Netscape. *Free Culture* goes beyond illuminating the catastrophe to our culture of increasing regulation to show examples of how we can make a different future. These new-style heroes and examples are rooted in the traditions of the founding fathers in ways that seem obvious after reading this book. China's Way to Carbon Emissions Reduction Ying Shen, 2015-08-18 Now that the most recent scientific estimates have shown that China has become the world's largest source of greenhouse gas emissions, China's influence on the world's environment and sustainable development highlights the importance of tailoring Chinese climate change law to conform with the requirements of international conventions and agreements on climate change. This thorough analysis, based on an examination of

climate status, legal background, and current regulatory systems in China, examines the potential role of different policy instruments in reducing carbon emissions in order to find an appropriate choice for China, and recommends approaches to key issues for relevant authorities. The author conducts a comprehensive and in-depth study on the three mainstream environmental policy instruments used to control carbon emissions – the cap-and-trade system, the carbon tax, and command-and-control regulations – in a Chinese context. She reviews China's current policies, and elucidates how the issues of climate change and global warming call for social, environmental, economic, and legal reforms in China, especially in the areas of administrative law and property rights law. Among the issues and topics covered are the following: - key issues on designing and implementing each of the three policy instruments; - the choice of regulatory instruments for carbon emissions reduction in a socialist market economy based on the discussion of market failure and government failure theories; - legal challenges from China's current administrative legislation and the definition of carbon emissions entitlements; - practical effect of China's climate change policy at the national, provincial, and local levels; - effectiveness of China's implementation of its international obligations; - lessons learned from schemes implemented in the United States and Australia; - comparison of China's seven regional pilot emissions trading scheme (ETS) programmes with the well-established EU ETS; - linkage between China's ETS and other ETSs from a global perspective; and - future direction of an emerging carbon market in China. The analysis assesses the critical costs and benefits of each approach in the context of selected case studies, taking legal literature in the field fully into account. Given that the Chinese government is taking steps to reduce emissions by altering energy production and usage and is signalling a willingness to make similar commitments in a multilateral treaty, it is very timely and important for lawmakers and scholars, within and outside China, to think about new and appropriate regulatory measures to respond to the crisis and plan for a sustainable future. This study provides not only a useful benchmark for both China and other countries in formulating initiatives on enhancing climate protection, but also details the global implications for governments and for international organizations concerned with the understanding between China and the rest of the world in the context of climate change mitigation.
