Introduction to Information Retrieval

Christopher D. Manning, Prabhakar Raghavan, Hinrich Schütze, 2008-07-07 Class-tested and coherent, this textbook teaches classical and web information retrieval, including web search and the related areas of text classification and text clustering from basic concepts. It gives an up-to-date treatment of all aspects of the design and implementation of systems for gathering, indexing, and searching documents; methods for evaluating systems; and an introduction to the use of machine learning methods on text collections. All the important ideas are explained using examples and figures, making it perfect for introductory courses in information retrieval for advanced undergraduates and graduate students in computer science. Based on feedback from extensive classroom experience, the book has been carefully structured in order to make teaching more natural and effective. Slides and additional exercises (with solutions for lecturers) are also available through the book's supporting website to help course instructors prepare their lectures.

*Historical Painting Techniques, Materials, and Studio Practice* Arie Wallert, Erma Hermens, Marja Peek, 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled *Historical Painting Techniques, Materials, and Studio Practice* at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the

University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

*The Eminent Monk* John Kieschnick, 1997-07-01 In an attempt to reconstruct an elusive aspect of the medieval Chinese imagination, *The Eminent Monk* examines biographies of Chinese Buddhist monks, from the uncompromising ascetic to the unfathomable wonder-worker. While analyzing images of the monk in medieval China, the author addresses some questions encountered along the way: What are we to make of accounts in "eminent monk" collections of deviant monks who violate monastic precepts? Who wrote biographies of monks and who read them? How did different segments of Chinese society contend for the image of the monk and which image prevailed? By placing biographies of monks in the context of Chinese political and religious rhetoric, *The Eminent Monk* explores both the role of Buddhist literature in Chinese history and the monastic imagination that inspired this literature.

*Biology, Ecology and Management of Aquatic Plants* Joseph Caffrey, Philip R.F. Barrett, Maria Teresa Ferreira, Ilidio S. Moreira, Kevin J. Murphy, Philip Max Wade, 2013-04-17 There is a growing need for appropriate management of aquatic plants in rivers and canals, lakes and reservoirs, and drainage channels and urban waterways. This management must be based on a sound knowledge of

the ecology of freshwater plants, their distribution and the different forms of control available including chemical and physical, and biological and biomanipulation. This series of papers from over 20 different countries was generated from the tenth in the highly successful series of European Weed Research Society symposia on aquatic plant management, this being the tenth. It provides a valuable insight into the complexities involved in managing aquatic systems, discusses state-of-the-art control techniques and deals with patterns of regrowth and recovery post-management. Careful consideration is given to the use of chemicals, a practice which has come under scrutiny in recent years. Underpinning the development of such control techniques is a growing body of knowledge relating to the biology and ecology of water plants. The authorship of the papers represents the collective wisdom of leading scientists and experts from fisheries agencies, river authorities, nature conservation agencies, the agrochemical industry and both governmental and non-governmental organisations.

**The Customer Centric Enterprise** Mitchell M. Tseng, Frank Piller, 2011-06-27 Companies are being forced to react to the growing individualization of demand. At the same time, cost management remains of paramount importance due to the competitive pressure in global markets. Thus, making enterprises more customer centric efficiently is a top management priority in most industries. Mass customization and personalization are key strategies to meet this challenge. Companies like Procter&Gamble, Lego, Nike, Adidas, Land's End, BMW, or Levi Strauss, among others, have started large-scale mass customization programs. This book provides insight into the different aspects of building a customer centric

enterprise. Following an interdisciplinary approach, leading scientists and practitioners share their findings, concepts, and strategies from the perspective of design, production engineering, logistics, technology and innovation management, customer behavior, as well as marketing.

**Software Quality - ECSQ 2002** Jyrki Kontio,Reidar Conradi,2003-08-01 Software professionals and companies live in a new world today. Increasingly complex systems need to be built faster and cheaper. While many of the established approaches in software quality are still valid, the software quality community is going through a paradigm shift that requires a re-assessment of our current method and tool portfolio, as well as creating new and more effective solutions. We have selected two themes for this conference to highlight this paradigm shift. Our first theme, "production of attractive and reliable software at Internet speed" sums up the dilemma many software organisations face. In order to be competitive, software should contain advanced features and run reliably - yet it should be developed quickly and cost effectively for the right market window. Finding the right balance between these objectives is a critical question that will determine business success in the years to come. Our second theme, "production of software with a dynamic partnership network" highlights the current trend of using partnerships and subcontractors as integral players in the software development process. Partnerships sometimes need to be created quickly to respond to a market opportunity, yet the costs and speed of cooperation must be competitive. Different companies have different processes, quality tools and cultures, yet they should cooperate seamlessly for the best result.

**Digital Copyright** Jessica Litman, Professor  
Litman's work stands out as well-researched,

doctrinally solid, and always piercingly well-written.-JANE GINSBURG, Morton L. Janklow Professor of Literary and Artistic Property, Columbia University

Litman's work is distinctive in several respects: in her informed historical perspective on copyright law and its legislative policy; her remarkable ability to translate complicated copyright concepts and their implications into plain English; her willingness to study, understand, and take seriously what ordinary people think copyright law means; and her creativity in formulating alternatives to the copyright quagmire. -PAMELA SAMUELSON, Professor of Law and Information Management; Director of the Berkeley Center for Law & Technology, University of California, Berkeley

In 1998, copyright lobbyists succeeded in persuading Congress to enact laws greatly expanding copyright owners' control over individuals' private uses of their works. The efforts to enforce these new rights have resulted in highly publicized legal battles between established media and new upstarts. In this enlightening and well-argued book, law professor Jessica Litman questions whether copyright laws crafted by lawyers and their lobbyists really make sense for the vast majority of us. Should every interaction between ordinary consumers and copyright-protected works be restricted by law? Is it practical to enforce such laws, or expect consumers to obey them? What are the effects of such laws on the exchange of information in a free society? Litman's critique exposes the 1998 copyright law as an incoherent patchwork. She argues for reforms that reflect common sense and the way people actually behave in their daily digital interactions. This paperback edition includes an afterword that comments on recent developments, such as the end of the Napster story, the rise of peer-to-peer file sharing, the escalation of a full-fledged copyright war, the

filing of lawsuits against thousands of individuals, and the June 2005 Supreme Court decision in the Grokster case. Jessica Litman (Ann Arbor, MI) is professor of law at Wayne State University and a widely recognized expert on copyright law.

**Hotel Management and Operations** Denney G. Rutherford, 1994-08-15 In this updated edition, Rutherford reexamines the fundamentals of hotel management in light of the latest trends. The introductory and connective essays have been expanded and updated, and completely new sections have been added on the vital topics of today.

*Digital Cities* Toru Ishida, Katherine Isbister, 2003-06-26 On the way towards the Information Society, global networks such as the Internet, together with mobile computing, have made wide-area computing over virtual communities a reality. Digital city projects, with the goal of building platforms to support community networking, are going on worldwide. This is the first book devoted to digital cities. It is based on an international symposium held in Kyoto, Japan, in September 1999. The 34 revised full papers presented were carefully selected for inclusion in the book; they reflect the state of the art in this exciting new field of interdisciplinary research and development. The book is divided into parts on design and analysis, digital city experiments, community network experiments, applications, visualization technologies, mobile technologies, and social interaction and communityware.

**Practical Ship Design** D.G.M. Watson, 2002-02-22 The ever-growing demand for commercial activities at sea has meant that ships are rapidly developing

and that the rules governing their construction and operation are changing. Practical Ship Design records these changes, their outcomes and the reasoning behind them. It deals with every aspect of ship design and handles a wide range of both merchant ships and naval ships with authority. It provides coverage of cargo ships and passenger ships, tugs, dredgers and other service craft. It also includes concept design, detail design, structural design, hydrodynamics design, the effect of regulations, the preparation of specifications and matters of costs and economics. Drawing on the author's extensive practical experience, Practical Ship Design is likely to interest everybody involved in the design, construction, repair and operation of ships. Students and the most experienced professionals will all benefit from the book's vast store of design data and its conclusions and recommendations.

**The Alkhan** Hans T. Bakker, 2020-03-12 This book is the first fascicle in a series that is designed as a reader's Companion to a Sourcebook that presents all written sources with regard to Hunnic Peoples in Central and South Asia from the 4th to the 6th centuries of the Common Era. Both these books are the outcome of an international research project, funded by the European Research Council, which aimed at collecting and exploring the texts regarding the Eastern, non-European Huns in more than a dozen original languages. The first fascicle of the Companion Series focuses on the history of Hunnic People in South Asia, where they are known as Hūṇa in Sanskrit literature or Alkhan according to their own coinage. These Alkhan entered the Subcontinent in the 4th century. The fascicle reconstructs the history of the Alkhan kings, Kṣiṅgila Toramāṇa, and Mihirakula, and the impact of their invasion and control of large parts of Northern and Western

India on Indian history and culture, in particular on the Gupta Empire. This history is shown to be interrelated with historic developments within the Sasanian Empire and historic events to the north of the Hindu Kush. This first fascicle of the Companion and the Sourcebook (D. Balogh, ed.) are published simultaneously by Barkhuis, Groningen. In the coming years other fascicles in this series will appear, exploring the collected sources with a focus on the history of Hunnic Peoples in Central Asia.

**Blue Dreams** Nancy ABELMANN, John Lie, Nancy Abelman, 2009-06-30 No one will soon forget the image, blazed across the airwaves, of armed Korean Americans taking to the rooftops as their businesses went up in flames during the Los Angeles riots. Why Korean Americans? What stoked the wrath the riots unleashed against them? *Blue Dreams* is the first book to make sense of these questions, to show how Korean Americans, variously depicted as immigrant seekers after the American dream or as racist merchants exploiting African Americans, emerged at the crossroads of conflicting social reflections in the aftermath of the 1992 riots. The situation of Los Angeles's Korean Americans touches on some of the most vexing issues facing American society today: ethnic conflict, urban poverty, immigration, multiculturalism, and ideological polarization. Combining interviews and deft socio-historical analysis, *Blue Dreams* gives these problems a human face and at the same time clarifies the historical, political, and economic factors that render them so complex. In the lives and voices of Korean Americans, the authors locate a profound challenge to cherished assumptions about the United States and its minorities. Why did Koreans come to the United States? Why did they set up shop in poor inner-city neighborhoods? Are they in conflict with African Americans? These are among

the many difficult questions the authors answer as they probe the transnational roots and diversity of Los Angeles's Korean Americans. Their work finally shows us in sharp relief and moving detail a community that, despite the blinding media focus brought to bear during the riots, has nonetheless remained largely silent and effectively invisible. An important corrective to the formulaic accounts that have pitted Korean Americans against African Americans, *Blue Dreams* places the Korean American story squarely at the center of national debates over race, class, culture, and community. Table of Contents: Preface The Los Angeles Riots, the Korean American Story Reckoning via the Riots Diaspora Formation: Modernity and Mobility Mapping the Korean Diaspora in Los Angeles Korean American Entrepreneurship American Ideologies on Trial Conclusion Notes References Index Reviews of this book: *Blue Dreams*--a poetic allusion to the clear blue sky that Koreans see as a symbol of freedom--is a welcome exploration by outsiders into the vexing and largely invisible Korean-American predicament in Los Angeles and the nation.

[Abelmann and Lie 's] colorful interview subjects offer sharp observations. --K.W. Lee, *Los Angeles Times* Reviews of this book: An informed and thoughtful examination of Korean immigration to the United States since 1970...[Abelmann and Lie] show that even in a period as short as twenty-five years, there have been successive waves of differently motivated, differently resourced Korean immigrants, and their experiences and reactions have differed accordingly. --Michael Tonry, *Times Literary Supplement* Reviews of this book: [The authors'] transnational perspective is particularly effective for explicating Korean immigrants' behaviors, activities, and feelings...Interesting and readable. --Pyong Gap Min, *American Journal of Sociology* Reviews of this book: Beginning with a poetic book title, the

authors recount in depth as to how the 'Blue Dreams' of the Korean-American merchants in East Los Angeles had shattered in the midst of [the] 1992 riot that turned out to be 'elusive dreams' in America...The book not only portrays the L.A. riot surrounding the Korean merchants, but also characterizes diaspora of the Koreans in America. The authors have also examined with scholarly insights the more complex socioeconomic and political underplay the Koreans encountered in their 'Promised New Land'. --Eugene C. Kim, International Migration Review

**Magic, Witchcraft, and Ghosts in the Greek and Roman Worlds** Daniel Ogden, 2002 In a culture where the supernatural possessed an immediacy now strange to us, magic was of great importance both in the literary mythic tradition and in ritual practice. In this book, Daniel Ogden presents 300 texts in new translations, along with brief but explicit commentaries. Authors include the well known (Sophocles, Herodotus, Plato, Aristotle, Virgil, Pliny) and the less familiar, and extend across the whole of Graeco-Roman antiquity.
