Art of the Formula 1 Race Car ,2010-04-05 Art of the Formula 1 Race Car brings a selection of these spectacular machines into the studio to expose not just the engineering brilliance of these cars, but also their inherent beauty.

Lotus 49 Manual 1967-1970 (all marks) Ian Wagstaff,2014-11-24 It was the first car to use the legendary Cosworth DFV engine. The car was designed around the DFV engine, and was highly significant in being the first successful Formula One car to feature the engine as a structural member. The Lotus 49 was also significant in being the first F1 car to feature aerodynamic wings, and was the first car to feature commercial sponsorship, in the form of the famous red, gold and white Gold Leaf Team Lotus colors. Jim Clark famously won on the car's debut at Zandvoort for the Dutch Grand Prix in 1967, and it would also provide him with the last grand prix win of his career in 1968, before Graham Hill went on to win the 1968 F1 World Championship using the car. This manual provides a fascinating insight into the design, evolution, operation, maintenance and restoration of the Lotus 49.

Trafficking in Broken Hearts Edwin Sanchez,2014-12-15 When Papo, a tough-talking Puerto Rican hustler from the Bronx, meets Brian, a frightened young lawyer from the Midwest, Papo begins to glimpse the possibility of a romantic escape from his life on the streets. At the same time, Bobby, a 17-year-old runaway who has been repeatedly raped by his older brother, offers to take care of Papo and moves in with him in his fleabag hotel room. It is then when Papo suddenly finds his defenses melting and his heart torn in two directions. **TRAFFICKING IN BROKEN HEARTS** is a gritty, urban love story. Playwright Edwin Sanchez makes a promising New York debut with **TRAFFICKING IN BROKEN HEARTS**, a grim, streetwise and bracingly compassionate work ... he convinces with the honesty of his writing and a canny, thoughtful grasp of his trio of characters. The playwright does an especially effective job in penning the gray shades of his characters ... -Greg Evans, Variety

Grand Prix Cars Denis Jenkinson, 2015-10-02 “ In compiling this brief history of Grand Prix racing, along with descriptions of the more successful cars, I have limited myself to the period since World War II as the present day Grand Prix cars are mostly derived from the development and design of the early post war years. Although many ideas were taking shape in the period of the mid-thirties — such as the use of De Dion rear axle layouts, independent front suspension systems and hydraulic brakes — the main interest lay in engine design under a free ruling on capacity. It was not until about 1950 that a renaissance began in chassis design for Grand Prix cars and from then on a great deal of knowledge was gained; enough in fact, to enable roadholding to become a very exact science rather than a hit-and-miss affair. This development in the chassis and the search for improved road holding and higher cornering power was accentuated by the beginning of the era of unsupercharged racing, when power outputs were severely curtailed and speed had to be found by other means ...” (1959 - Denis Jenkinson)
