*The History of Mathematics* David M. Burton,1991 This text is designed for the junior/senior mathematics major who intends to teach mathematics in high school or college. It concentrates on the history of those topics typically covered in an undergraduate curriculum or in elementary schools or high schools. At least one year of calculus is a prerequisite for this course. This book contains enough material for a 2 semester course but it is flexible enough to be used in the more common 1 semester course.

**Of the Progresse of the Bodhisattva** Richard Mahoney,2016 This is a replica edition of Mahoney, R.B., Of the progresse of the Bodhisattva: the bodhisattvamārga in the Śikṣāsamuccaya, M.A. Thesis, (University of Canterbury, 2002)--Publisher information.

*The Theory of Lexical Phonology* K.P. Mohanan,2012-12-06 This book contains some of the material which originally appeared in my Ph. D. thesis Lexical Phonology, submitted at the Massachusetts Institute of Technology, but it can hardly be called a revised version of the thesis. The theory that I propose here is in many ways radically different from the one that I proposed in the thesis, and there is a great deal of new data and analyses from English and Malayalam. Chapter VI is so new that I haven't even had the time to try it out on my friends. As everyone knows, research is a collective enterprise, even though an individual's name appears on the first page of the book or article. I would think of this book as a joint project involving dozens of people, in which I acted as the project coordinator, collecting suggestions from a wide variety of sources. Four major influences on what the book contains were Morris Halle, Paul Kiparsky, Mark Liberman, and Joan Bresnan. I learned the ropes of doing research on phonology, phonetics, and morphology from them, and almost everything that I discuss in this book owes its shape ultimately to one of them. Among the others who contributed generously to this book are: Jay Keyser, James Harris, Douglas Pulleyblank, Diana Archangeli, Donca Steriade, Elizabeth Selkirk, Francois Dell, Noam Chomsky, Philip Lesourd, Mohammed Guerssel, Michel Kenstovicz, Raj Singh, Will Leben, Joe Perkell, Victor Zue, Paroo Nihalani. P. Madhavan, and Stephanie Shattuck-Hafnagel.

A History of Mathematics Victor J. Katz,2024 This textbook grew out of the conviction that both prospective school teachers of mathematics and prospective college teachers of mathematics need a background in history to teach the subject more effectively. It is therefore designed for junior or senior mathematics majors who intend to teach in college or high school, and it concentrates on the history of those topics typically covered in an undergraduate curriculum or in elementary or high school. Because the history of any given mathematical topic often provides excellent ideas for teaching the topic, there is sufficient detail in each explanation of a new concept for the future (or present) teacher of mathematics to develop a classroom lesson or series of lessons based on history. In fact, many of the problems ask readers to develop a particular lesson. My hope is that students and prospective teachers will gain from this book a knowledge of how we got here from there, a knowledge that will provide a deeper understanding of many of the important concepts of mathematics--

Music Divided Danielle Fosler-Lussier,2007-05-24 Music Divided explores how political pressures affected musical life on both sides of the iron curtain during the early years of the cold war. In this groundbreaking study, Danielle Fosler-Lussier illuminates the pervasive political anxieties of the day through particular attention to artistic, music-theoretical, and propagandistic responses to the music of Hungary's most renowned twentieth-century composer, Béla Bartók. She shows how a tense period of political transition plagued Bartók's music and imperiled those who took a stand on its aesthetic value in the emerging socialist state. Her fascinating investigation of Bartók's reception outside of Hungary demonstrates that Western composers, too, formulated their ideas about musical style under the influence of ever-escalating cold war tensions. Music Divided surveys Bartók's role in provoking negative reactions to accessible music from Pierre Boulez, Hermann Scherchen, and Theodor Adorno. It considers Bartók's influence on the youthful compositions and thinking of Bruno Maderna and Karlheinz Stockhausen, and it outlines Bartók's legacy in the music of the Hungarian composers András Mihály, Ferenc Szabó, and Endre Szervánszky. These details reveal the impact of local and international politics on the selection of music for concert and radio programs, on composers' choices about musical style, on government radio propaganda about music, on the development of socialist realism, and on the use of modernism as an instrument of political action.
