Transdisciplinary Engineering: A Paradigm Shift C.-H. Chen,A.C. Trappey,M. Peruzzini,2017-07-20 Concurrent Engineering is based on the concept that different phases of a product life cycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). Its main goal is to increase the efficiency and effectiveness of the PCP and reduce errors in the later stages, and to incorporate considerations for the full lifecycle, through-life operations, and environmental issues of the product. It has become the substantive basic methodology in many industries, and the initial basic concepts have matured and become the foundation of many new ideas, methodologies, initiatives, approaches and tools. This book presents the proceedings of the 24th ISPE Inc. International Conference on Transdisciplinary (formerly: Concurrent) Engineering (TE 2017), held in Singapore, in July 2017. The 120 peer-reviewed papers in the book are divided into 16 sections: air transport and traffic operations and management; risk-aware supply chain intelligence; product innovation and marketing management; human factors in design; human engineering; design methods and tools; decision supporting tools and methods; concurrent engineering; knowledge-based engineering; collaborative engineering; engineering for sustainability; service design; digital manufacturing; design automation; artificial intelligence and data analytics; smart systems and the Internet of Things. The book provides a comprehensive overview of recent advances in transdisciplinary concurrent engineering research and applications, and will be of interest to researchers, design practitioners and educators working in the field.

Cereals and Millets Chittaranjan Kole,2006-10-28 Part of the seven-volume series Genome Mapping and Molecular Breeding in Plants, this book covers Cereals and Millets, which provide staple food for most of the earth's population. This book includes chapters on rice, wheat, maize, barley, oats, rye, sorghum, pearl millet, foxtail millet and finger millet. The emphasis is on advanced research on the major crops, including the model plants maize and rice, as well as on future road maps of genomic research for the less-often considered but equally deserving cereals and millets.

The Routledge Handbook of Taxation and Philanthropy Henry Peter,Giedre Lideikyte Huber,2021-12-24 The Routledge Handbook of Taxation and Philanthropy ventures into a territory that is still widely unexplored. It contains 30 academic contributions that aim to provide a better understanding of whether, why, and how philanthropic initiatives, understood as voluntary contributions for the common good, can and should be fostered by states through tax incentives. The topic has been addressed from a multidisciplinary and multicultural perspective – covering neuroeconomics, sociology, political science, psychology, affective sciences, philosophy, behavioral economy, and law – because of its global and multifaceted nature. It also contains the OECD report on Taxation and Philanthropy released in November 2020, which was prepared in this context as a result of a collaboration with the Geneva Centre for Philanthropy of the University of Geneva. The book is divided into four sections, exploring, respectively, the justification of tax incentives for philanthropy, theoretical and empirical insights about taxes, efficiency and donor behavior in that context, and tax incentives for cross-border philanthropy and for hybrid entities and social entrepreneurship. It is believed that this volume will be a landmark yet only the beginning of a journey in which a lot remains to be studied, learned, and said.

The Migration Conference 2020 Book of Abstracts and Programme The Migration Conference Team,2020-09-03 This is the book of abstracts for the Migration Conference 2020, 8 to 11 September. We're pleased to welcome you to the 8th Migration Conference. The Migration Conference 2020 is held online via Microsoft Teams platform due to COVID-19 Pandemic restrictions. We have as usual covering a wide array of topics in this year's edition too. There are about 350 presentations and debates running over 4 days from 8th to 11th September 2020. We have tried to address the time zone differences by moving sessions towards mid-day and grouping presentations, where possible, according to time zones. However, we believe this is not perfect to accommodate hundreds of colleagues from Brazil to Japan, and Australia to Canada. PLEASE NOTE all times are GMT+1 British Summer Time (BST). MS Teams will normally show the times according to your computers local time. Our all-women keynote speakers line up this year features Nissa Finney, Jelena Dzankic, Martina Cvajner, Elli Heikkilä, Agnes Igoye, and Helén Nilsson. Although the main language of the conference is English, this year we will have linguistic diversity as usual and there will also be some sessions in Spanish and Turkish. We thank all participants, invited speakers and conference committees for their efforts and contribution. We are particularly grateful to hundreds of colleagues who served as reviewers and helped the selection process.

Before and Beyond Divergence Jean-Laurent Rosenthal,R. Bin Wong,2011-04-01 China has reemerged as a powerhouse in the global economy, reviving a classic question in economic history: why did sustained economic growth arise in Europe rather than in China? Many favor cultural and environmental explanations of the nineteenth-century economic divergence between Europe and the rest of the world. This book, the product of over twenty years of research, takes a sharply different tack. It argues that political differences which crystallized well before 1800 were responsible both for China's early and more recent prosperity and for Europe's difficulties after the fall of the Roman Empire and during early industrialization. Rosenthal and Wong show that relative prices matter to how economies evolve; institutions can have a large effect on relative prices; and the spatial scale of politics can affect the choices of institutions in the long run. Their historical perspective on institutional change has surprising implications for understanding modern transformations in China and Europe and for future expectations. It also yields insights in comparative economic history, essential to any larger social science account of modern world history.

Studies on Large Branchiopod Biology and Conservation Marie A. Simovich,Clay Sassaman,Denton Belk,2011-01-28 This volume is a collection of papers concerning the biology of large branchiopod crustaceans: Anostraca, Conchostraca, and Notostraca. Many of the individual papers were first presented at the Third International Large Branchiopod Symposium (ILBS-3) held at the University of San Diego, CA, USA, July 15-18, 1996. Contributions on additional topics from participants at the symposium, and from colleagues not able to join us in San Diego, are also included. In addition, there is a supplement to the 1995 'Checklist of the Anostraca'. The theme of the ILBS-3 was 'understanding and conserving large branchiopod diversity'. Researchers from around the world presented papers on a variety of topics related to conservation of large branchiopods, with contributions ranging from alpha-taxonomy and zoogeography to community structure and studies of ecology and evolution. One important issue developed in many of the papers in this volume is the need to advance our understanding of basic aspects of branchiopod biology throughout the world in order to enhance our efforts to conserve them. Although we have made important strides in understanding the biology of large branchiopods, we have, with few notable exceptions, made little progress in assuring the conservation of their diversity. We hope this volume will supply the reader with new ideas,

and generate enthusiasm for research and public education efforts on behalf of branchiopod conservation.

Distributed Denial of Service Attacks İlker Özçelik,Richard Brooks,2020-08-03 Distributed Denial of Service (DDoS) attacks have become more destructive, wide-spread and harder to control over time. This book allows students to understand how these attacks are constructed, the security flaws they leverage, why they are effective, how they can be detected, and how they can be mitigated. Students use software defined networking (SDN) technology to created and execute controlled DDoS experiments. They learn how to deploy networks, analyze network performance, and create resilient systems. This book is used for graduate level computer engineering instruction at Clemson University. It augments the traditional graduate computing curricula by integrating: Internet deployment, network security, ethics, contemporary social issues, and engineering principles into a laboratory based course of instruction. Unique features of this book include: A history of DDoS attacks that includes attacker motivations Discussion of cyber-war, censorship, and Internet black-outs SDN based DDoS laboratory assignments Up-to-date review of current DDoS attack techniques and tools Review of the current laws that globally relate to DDoS Abuse of DNS, NTP, BGP and other parts of the global Internet infrastructure to attack networks Mathematics of Internet traffic measurement Game theory for DDoS resilience Construction of content distribution systems that absorb DDoS attacks This book assumes familiarity with computing, Internet design, appropriate background in mathematics, and some programming skills. It provides analysis and reference material for networking engineers and researchers. By increasing student knowledge in security, and networking; it adds breadth and depth to advanced computing curricula.

Swoon: Great Seducers and Why Women Love Them Betsy Prioleau,Elizabeth Stevens Prioleau,2013-02-04 Casanovas: where are those great romancers of women? In *Swoon*, Betsy Prioleau gives us a smart, entertaining study of ladies' men, demystifying their character, seductive secrets, and killer charm. Combining history, science, culture, and colorful contemporary research, Prioleau gives us a portrait of the successful seducer that explodes every stereotype and shatters every cliché. Instead of a satanic rake, slick player, or rich, handsome powerbroker, he's an unlikely, often homely Romeo who cares about women and understands what they want. Through analyses of history's legendary lovers and interviews with today's heartthrobs, Prioleau uncovers the surprising seductive secrets that really rock female hearts, from unfeigned ardor to conversational flair. In doing so, she destroys the pick-up artists' advice of such books as *The Game*. Finally, Prioleau critiques the twenty-first-century sexual malaise, especially women's record discontent with men, and argues that it's high time to retrieve and celebrate the great seducer.

The 71F Advantage National Defense University Press,2010-09 Includes a foreword by Major General David A. Rubenstein. From the editor: 71F, or 71 Foxtrot, is the AOC (area of concentration) code assigned by the U.S. Army to the specialty of Research Psychology. Qualifying as an Army research psychologist requires, first of all, a Ph.D. from a research (not clinical) intensive graduate psychology program. Due to their advanced education, research psychologists receive a direct commission as Army officers in the Medical Service Corps at the rank of captain. In terms of numbers, the 71F AOC is a small one, with only 25 to 30 officers serving in any given year. However, the 71F impact is much bigger than this small cadre suggests. Army research psychologists apply their extensive training and expertise in the science of psychology and social behavior toward understanding, preserving, and enhancing the health, well being, morale, and performance of Soldiers and military families. As is clear throughout the pages of this book, they do this in many ways and in many areas, but always with a scientific approach. This is the 71F advantage: applying the science of psychology to understand the human dimension, and developing programs, policies, and products to benefit the person in military operations. This book grew out of the April 2008 biennial conference of U.S. Army Research Psychologists, held in Bethesda, Maryland. This meeting was to be my last as Consultant to the Surgeon General for Research Psychology, and I thought it would be a good idea to publish proceedings, which had not been done before. As Consultant, I'd often wished for such a document to help explain to people what it is that Army Research Psychologists do for a living. In addition to our core group of 71Fs, at the Bethesda 2008 meeting we had several brand-new members, and a number of distinguished retirees, the grey-beards of the 71F clan. Together with longtime 71F colleagues Ross Pastel and Mark Vaitkus, I also saw an unusual opportunity to capture some of the history of the Army Research Psychology specialty while providing a representative sample of current 71F research and activities. It seemed to us especially important to do this at a time when the operational demands on the Army and the total force were reaching unprecedented levels, with no sign of easing, and with the Army in turn relying more heavily on research psychology to inform its programs for protecting the health, well being, and performance of Soldiers and their families.

Ramanujan Srinivasa Ramanujan Aiyangar,1995-09-07 The letters that Ramanujan wrote to G. H. Hardy on January 16 and February 27, 1913, are two of the most famous letters in the history of mathematics. These and other letters introduced Ramanujan and his remarkable theorems to the world and stimulated much research, especially in the 1920s and 1930s. This book brings together many letters to, from, and about Ramanujan. The letters came from the National Archives in Delhi, the Archives in the State of Tamil Nadu, and a variety of other sources. Helping to orient the reader is the extensive commentary, both mathematical and cultural, by Berndt and Rankin; in particular, they discuss in detail the history, up to the present day, of each mathematical result in the letters. Containing many letters that have never been published before, this book will appeal to those interested in Ramanujan's mathematics as well as those wanting to learn more about the personal side of his life. *Ramanujan: Letters and Commentary* was selected for the CHOICE list of Outstanding Academic Books for 1996.

Strategic Influence J. Michael Waller,2009-03 In this vital book, thirteen experts in public diplomacy, counterpropaganda and political warfare lay out the components of what the U.S. and its allies need to win the war of ideas around the world. Strategic influence is much more than strategic communication. Communicating with others has somehow become a goal in itself, when the real issue is influence - to modify the perceptions, attitudes, and most of all, the behavior of people, movements and governments around the world. This book is designed for the diplomat, intelligence officer, warfighter and policymaker.

Re-Thinking Economics Asimina Christoforou,Michael Lainé,2014-05-30 Once again, unfettered capitalism has failed. Promises for global prosperity and peace have given way to a world of deep recession, social

upheaval and political instability. Once again, mainstream economics has proved its inadequacy. Despite its technical rigour and mathematical virtuosity, it failed dramatically to respond to the current crisis. Why is this so? Mainstream economics turns a blind eye to society. By assumption, it maims its analyses by wiping away what makes us what we are. There is pressing need for a critical discussion and new ideas. We therefore turn to the insightful and stimulating work of Pierre Bourdieu. Arguably one of the major sociologists ever, he was also a major ‘economist’. Yet his works on the economy have received only scant attention, especially from economists, be they ‘mainstream’ or ‘heterodox’. Bourdieu helps to take a broader view and enrich our scientific imagination. By including dimensions of power, intuitive behaviour and social structures within the scope of his analysis, he provides for an alternative foundation of economics, based on an integrated, interdisciplinary theory. For the first time, this volume fills this gap in economics by featuring state-of-the-art research and experts from different social science disciplines. This book constitutes a first step, and hopes to become a milestone. The book offers an innovative outlook and a unique source for social scientists of all fields, particularly economists and sociologists, who wish to engage in the study of Bourdieu and his economics with a view to developing a more pertinent theory. It will also constitute a useful reference for university students and administrators who would like to explore the economy from a Bourdieusian perspective.
