Genome Mapping and Genomics in Animal-Associated Microbes Vishvanath Nene, Chittaranjan Kole, 2008-11-24 Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include Brucella, Mycobacterium, Anaplasma and Ehrlichia, as well as the protozoan pathogens Cryptosporidium and Theileria, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

Food Provisioning in Complex Societies Levent Atici, Benjamin S. Arbuckle, 2023-03-15 Through creative combinations of ethnohistoric evidence, iconography, and contextual analysis of faunal remains, this work offers new insight into the mechanisms involved in food provisioning for complex societies. Contributors combine zooarchaeological and historical data from global case studies to analyze patterns in centralization and bureaucratic control, asymmetrical access and inequalities, and production-distribution-consumption dynamics of urban food provisioning and animal management. Taking a global perspective and including both prehistoric and historic case studies, the chapters in the volume reflect some of the current best practices in the zooarchaeology of complex societies. Embedding faunal evidence within a broader anthropological explanatory framework and integrating archaeological contexts, historic texts, iconography, and ethnohistorical sources, the book discerns myriad ways that animals are key contributors to, and cocreators of, complex societies in all periods and all places. Chapters cover the diverse sociopolitical and economic roles wild animals played in Bronze Age Turkey; the production and consumption of animal products in medieval Ireland; the importance of belief systems, politics, and cosmologies in Shang Dynasty animal provisioning in the Yellow River Valley; the significance of external trade routes in the kingdom of Aksum (modern Sudan); hunting and animal husbandry at El Zotz; animal economies from two Mississippian period sites; and more. Food Provisioning in Complex Societies provides an optimistic roadmap and heuristic tools to explore the diverse, resilient, and contingent processes involved in food provisioning. The book represents a novel and productive way forward for understanding the unique, yet predictably structured, provisioning systems that emerged in the context of complex societies in all parts of the world. It will be of interest to zooarchaeologists and

archaeologists alike. Contributors: Joaquin Arroyo-Cabrales, Fiona Beglane, Roderick Campbell, Kathryn Grossman, Patricia Martinez-Lira, Jacqueline S. Meier, Sarah E. Newman, Terry O'Connor, Tanya M. Peres, Gypsy C. Price, Elizabeth J. Reitz, Kim Shelton, Marcus Winter, Helina S. Woldekiros

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

Tourism and Development Richard Sharpley, David J. Telfer, 2002 This text explores the role of tourism as a potential contributor to socio-economic development in destination areas. Establishing a link between tourism studies and development studies, it considers what is meant by development, the processes through which development may be achieved and, in particular, a number of fundamental issues related to the use of tourism as a development agent. The Poetics of Science Fiction Peter Stockwell, 2014-06-11 The Poetics of Science Fiction uniquely uses the science of linguistics to explore the literary universe of science fiction. It also uses the extreme conditions offered by science fiction to develop new insights into the language of the literary context. The discussion ranges from a detailed investigation of new words and metaphors, to the exploration of new worlds, from pulp science fiction to the genre's literary masterpieces, its special effects and poetic expression. Speculations and extrapolations throughout the book engage the reader in thought-experiments and discussion points, with selected further reading making it a useful source book for classroom and seminar.

Hearing Impairment and Disability Ariel Tenenbaum,Joav Merrick,Mohd N. Zakaria,2020 Much research has been conducted to provide researchers and hearing healthcare professionals with updated information in regard to hearing assessments, results interpretation and case management. This ongoing research is particularly imperative to guide clinicians with optimized methods in assessing and managing pediatric patients with hearing impairment and disability. As such, tremendous research efforts have been made in determining the most optimum methods in assessing hearing using both subjective and objective tests. Since hearing loss can occur due to disrupted peripheral and/or central auditory pathway, there is also a growing interest to study children with auditory processing disorder (APD). Even though notable achievements have been observed in understanding APD, more research is required, particularly in establishing a gold standard APD test and its specific interventions. Additionally, having an objective test such as speech-evoked auditory brainstem response is beneficial to understand how speech sounds are encoded within the brainstem region in hearing-impaired children, as well as in those with compromised neural function. In this book, we have gathered research from Malaysia and India in this field and hope it will be of interest to our readers--
