Pattern Recognition Theory and Applications Pierre A. Devijver, Josef Kittler, 2012-12-06

This book is the outcome of a NATO Advanced Study Institute on Pattern Recognition Theory and Applications held in Spa-Balmoral, Belgium, in June 1986. This Institute was the third of a series which started in 1975 in Bandol, France, at the initiative of Professors K. S. Fu and A. Whinston, and continued in 1981 in Oxford, UK, with Professors K. S. Fu, J. Kittler and L. -F. Pau as directors. As early as in 1981, plans were made to pursue the series in about 1986 and possibly in Belgium, with Professor K. S. Fu and the present editors as directors. Unfortunately, the sort of decision that would have made this a reality: Professor Fu passed away in the spring of 1985. His sudden death was an irreparable loss to the scientific community and to all those who knew him as an inspiring colleague, a teacher or a dear friend. Soon after, Josef Kittler and I decided to pay a small tribute to his memory by helping some of his plans to materialize. With the support of the NATO Scientific Affairs Division, the Institute became a reality. It was therefore but natural that the proceedings of the Institute be dedicated to him. The book contains most of the papers that were presented at the Institute. Papers are grouped along major themes which hopefully represent the major areas of contemporary research. These are: 1. Statistical methods and clustering techniques 2. Probabilistic relaxation techniques 3. From Markovian to connectionist models 4.

Why Do I Need a Teacher When I've got Google? Ian Gilbert, 2014-06-27 Why do I need a teacher when I've got Google? is just one of the challenging, controversial and thought-provoking questions Ian Gilbert poses in this urgent and invigorating book. Questioning the unquestionable, this fully updated new edition will make you re-consider everything you thought you knew about teaching and learning, such as: • Are you simply preparing the next generation of unemployed accountants? • What do you do for the 'sweetcorn kids' who come out of the education system in pretty much the same state as when they went in? • What's the real point of school? • Exams - So whose bright idea was that? • Why 'EQ' is fast becoming the new 'IQ'. • What will your school policy be on brain-enhancing technologies? • Which is the odd one out between a hamster and a caravan? With his customary combination of hard-hitting truths, practical classroom ideas and irreverent sense of humour, Ian Gilbert takes the reader on a breathless rollercoaster ride through burning issues of the twenty-first century, considering everything from the threats facing the world and the challenge of the BRIC economies to the link between eugenics and the 11+. As wide-ranging and exhaustively-researched as it is entertaining and accessible, this book is designed to challenge teachers and inform them - as well as encourage them - as they strive to design a twenty-first century learning experience that really does bring the best out of all young people. After all, the future of the world may just depend on it

Atomic Highway Colin Chapman, Manchester City Art Gallery, 2010-06-22 Civilization came crashing down. Billions died. A new Dark Age has begun. The descendants of the apocalypse's survivors scavenge the remnants of the Before Times, struggling to build a new life amidst the ruins of the old. In a savage world where the strong ravage and exploit the weak, the survivors' settlements are oases, connected only by convoys of armed and armoured vehicles that run the gauntlet of raiders... and worse. Though the threats of chemical and biological agents and radiation have all but faded, their taint lingers on in every mutant born to man and beast. This is the world of Atomic Highway. Atomic Highway is a complete roleplaying game. All you need to play it is this book, a few friends, paper and pencils, and a few ordinary dice.

Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Wealth 2021 Valentin Luboya, 2020-11-12 In these gruesome times, many of you might not

have been impacted by the economic effects of this virus, probably because you are more blessed than the masses around you. But truth be told, the economic disadvantages of this virus have shaken many families to their foundations. People have lost their jobs, food to eat, clothes to wear, and what not. All because our world is currently on lockdown and may perhaps face grave inflation. But is it necessary for you to go out to be able to support your household? I don't think so! You can certainly stay at home and start a business, or you can take the necessary precautions and do it physically.
