Innovation, Sustainability and Management in Motorsports Hans Erik Næss, Anne Tjørndal, 2021-05-18 “There’s probably no better sport than Formula E to present and study the science and practice of innovation within (motor)sport, and this book is a must read for those active within this fascinating area”. - Dr. Kristof de Mey, Sports Technology, Innovation & Business Developer at Ghent University, Belgium This open access book provides novel insights on management innovation and sustainability in motorsport. Utilizing the all-electric racing championship called Formula E as case, it draws upon data from multiple sources such as sustainability reports of Formula and its stakeholders, media data, podcasts and newspaper articles, partner publications, and social media outputs. It aims to generate a theoretical model that describes and explains the optimal conditions for innovation when it comes to enhancing a sport organisation's commercial product. Apart from its general transferability to sports research, this model enables further study of a motorsport phenomenon that has been hailed by media as the championship, which affirms money in sustainability. It has also been emphasized by sport researchers as a highly relevant case to study management innovation. This book will be interesting to academics working in sports management, knowledge management, innovation and sustainability. Hans Erik Næss (b. 1978) is an Associate Professor in Sport Management at Kristiania University College, Norway. He holds a PhD in sociology from the University of Oslo and is the author of several peer-reviewed articles and books on motorsports, including A History of Organizational Change: The case of Fédération Internationale de l’Automobile (FIA) 1945-2020. Positive Pedagogy for Sport Coaching Richard Light, 2016-11-25 The concept of positive pedagogy has transformed the way we understand learning and coaching in sport. Presenting examples of positive pedagogy in action, this book is the first to apply its basic principles to individual sports such as swimming, athletics, gymnastics and karate. Using the game based approach (GBA) (an athlete-centred, inquiry-based method that involves game-like activities), this book demonstrates how positive pedagogy can be successfully employed across a range of sports and levels of performance, while also providing insight into coaches’ experiences of this approach. Divided into three sections that focus on the development, characteristics and applications of positive pedagogy, it fills a gap in coaching literature by extending the latest developments of GBA to activities beyond team sports. It pioneers a way of coaching that is both efficient in improving performance and effective in promoting positive experiences of learning across all ages and abilities. Positive Pedagogy for Sport Coaching: Athlete-centred coaching for individual sports is invaluable reading for all sports coaching students as well as any practising coach or physical education teacher looking for inspiration.

Computer Vision for Autonomous Vehicles Joel Janai, Fatma Güney, Aseem Behl, Andreas Geiger, 2020 Recent years have witnessed enormous progress in AI-related fields such as computer vision, machine learning, and autonomous vehicles. As with any rapidly growing field, it becomes increasingly difficult to stay up-to-date or enter the field as a beginner. While several survey papers on particular sub-problems have appeared, no comprehensive survey on problems, datasets, and methods in computer vision for autonomous vehicles has been published. This monograph attempts to narrow this gap by providing a survey on the state-of-the-art datasets and techniques. Our survey includes both the historically most relevant literature as well as the current state of the art on several specific topics, including recognition, reconstruction, motion estimation, tracking, scene understanding, and end-to-end learning for autonomous driving. Towards this goal, we analyze the performance of the state of the art on several challenging benchmarking datasets, including KITTI, MOT, and Cityscapes. Besides, we discuss open problems and current research challenges. To ease accessibility and accommodate missing references, we also provide a website that allows navigating topics as well as methods and provides additional information.

Use of Dietary Supplements by Military Personnel Institute of Medicine, Food and Nutrition Board, Committee on Dietary Supplement Use by Military Personnel, 2008-10-31 Dietary supplements are widely available through a rapidly expanding market of products commonly advertised as beneficial for health, performance enhancement, and disease prevention. Given the importance and frequent evaluation of physical performance and health as a criteria to join and remain in the military, the use of these products by military personnel has raised concern regarding over-all and long-term efficacy and safety. This evaluation is especially difficult, as many of these supplements contain multiple ingredients, have a changing composition over time, or are used intermittently at doses difficult to measure. This book analyzes the patterns of dietary supplement use among military personnel, examines published reviews of the scientific evidence, and identifies those dietary supplements that are beneficial and/or warrant concern due to risks to health or performance. The book also recommends a system to monitor adverse health effects and a framework to identify the need for active management of dietary supplements by military personnel. Military policy makers, personnel, and recruits will find this book useful, as will nutritionists, athletes, and others working in strenuous environments.
