Aqueous Lubrication Nicholas D Spencer, 2014-03-12 Man lubricates mostly with oil. Nature lubricates exclusively with water. Pure water is a poor lubricant, but the addition of proteins, especially glycoproteins, can modify surfaces to make them far more lubricating at slow speeds. Understanding how nature does this, and the physical structures involved, is not only important for the understanding of diseases such as osteoarthritis, but also essential for the successful application of articulating implants, such as hips and knees, as well as the development of medical devices such as catheters and contact lenses. A host of important applications of water-based lubrication are already in place in the personal care and food industries, and further industrial applications of water-based lubrication could have a significant positive impact on the environment. This book is the first of its kind. It brings together the latest research in biological and biomimetic, water-based lubrication and is authored by the world's experts in the field.

The Internet Playground Ellen Seiter, 2005 Based on four years of experience teaching computers to 8-12 year olds, media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it. The Internet Playground argues that, contrary to the promises of technology boosters, teaching with computers is very difficult. Seiter points out that the Internet today resembles a mall more than it does a library. While children love to play online games, join fan communities, and use online chat and instant messaging, the Internet is also an appallingly aggressive marketer to children and, as this book passionately argues, an educational boondoggle.

Television and New Media Audiences Ellen Seiter, 1998-12-17 Why is talk about television forbidden at certain schools? Why does a mother feel guilty

about watching Star Trek in front of her four-year-old child? Why would retired men turn to daytime soap operas for entertainment? Cliches about television mask the complexity of our relationship to media technologies. Through case studies, the author explains what audience research tells us about the uses of technologies in the domestic sphere and the classroom, the relationship between gender and genre, and the varied interpretation of media technologies and media forms. Television and New Media Audiences reviews the most important research on television audiences and recommends the use of ethnographic, longitudinal methods for the study of media consumption and computer use at home as well as in the workplace. The book discusses reactions of audiences to many internationally known television programmes including The Flintstones, The Jetsons, Street Fighter, Mighty Morphin Power Rangers, X-Men, Sesame Street, Dallas, Star Trek, The Cosby Show, Teenage Mutant Ninja Turtles, National Geographic, etc.

"This is how I Think" Emily A. Chivers Yochim, 2007 This Is How I Think contributes to our understanding of the politics of youth consumer culture by discussing the ways in which white masculinity is presented in youth media and elaborating young men's reactions to these portrayals. Contemporary media representations of white male youth present alternative masculinities that rely on both dominant American values and the mockery of non-whites, homosexuals, and women to maintain men's power. Utilizing theories of the media audience, youth culture, race, and gender to discuss ethnographic data collected in a community of skateboarders, I contend that skate culture produces alternative modes of masculinity that are not anti-patriarchal, and thus do not disrupt normative power relations. Further, I suggest, skate culture creates a space in which young men can experience the mental and emotional pleasure of escape and self-expression--an experience often denied young men in a dominant culture that expects them to be emotionally reticent and in control.

Youthscares Sunaina Maira, Elisabeth Soep, 2013-07-20 Young people, it seems, are both everywhere and nowhere. The media are crowded with images of youth as deviant or fashionable, personifying a society's anxieties and hopes about its own transformation. However, theories of globalization, nationalism, and citizenship tend to focus on adult actors. Youthscares sets youth at the heart of globalization by exploring the meanings young people have created for themselves through their engagements with popular cultures, national ideologies, and global markets. The term youthscares places local youth practices within the context of ongoing shifts in national and global forces. Using this framework, the book revitalizes discussions about youth cultures and social movements, while simultaneously reflecting on the uses of youth as an academic and political category. Tracing young people's movements across physical and imagined spaces, the authors examine various cases of young people as they participate in social relations; use and invent technology; earn, spend, need, and despise money; comprise target markets while producing their own original media; and create their own understandings of citizenship. The essays examine young Thai women working in the transnational beauty industry, former child soldiers in Sierra Leone, Latino youth using graphic art in political organizing, a Sri Lankan refugee's fan relationship with Jackie Chan, and Somali high school students in the United States and Canada. Drawing on methodologies and frameworks from multiple fields, such as anthropology, sociology, and film studies, the volume is useful to those studying and teaching issues of youth culture, popular culture, globalization, social movements, education, and media. By focusing on the intersection between globalization studies and youth culture, the authors offer a vital contribution to the development of a new, interdisciplinary approach to youth culture studies.
