**The Tomb of Meryneith at Saqqara** Maarten J. Raven,René van Walsem,Willem F. M. Beex,Amanda Dunsmore,Ladislava Horáčková,2014 This funerary monument of a high Memphite official was discovered by a joint expedition of the Leiden Museum of Antiquities and Leiden University in 2001. Meryneith started his career as steward of the Memphite temple of the sun god Aten during the reign of the heretic pharaoh Akhenaten. During midlife, he may have joined the court set up by the Pharaoh at the new capital at Amarna. He ended his career under Tutankhamun as high-priest of the Aten in the Memphite temple again. Thereby, the importance of the tomb of Meryneith lies in the fact that for the first time it allows us to witness various stages in the rise and fall of the Amarna heresy from a Memphite point of view. Thus the tomb-owner was apparently forced to change his name from Meryneith - with its reference to the now proscribed goddess Neith - into Meryre. Several other variants of his name and some additional titles came to light, revealing various stages in his career. These stages mirror the ideological developments of the Amarna Period and its immediate aftermath, which are further illustrated by the different styles of the decoration of the tomb. This proved to be remarkably well preserved and consists of both wall-reliefs and paintings on mud plaster. Thanks to the evidence of the inscriptions, it can be observed how the tomb was built and decorated in various stages, each characterized by a marked change in style and iconography. The present report includes a full description of these wall scenes, as well as chapters on the career of the tomb-owner, on the double statue of Meryneith and his wife found in one of the west chapels, and on the objects, pottery, and skeletal material found in the course of the excavations.

**Biological Invasions in the South American Anthropocene** Fabián M. Jaksic,Sergio A. Castro,2021-03-31 This book provides a conceptually organized framework to understand the phenomenon of biological invasions at the Anthropocene global scale. Most advances toward that aim have been provided from North American and European researchers, with fewer contributions from Australia and South Africa. Here we fill the void from the Neotropics, focusing on the research experience in South American countries, with a strong emphasis on Argentina and Chile. The text is divided into two parts: The first half comprises self-contained chapters, providing a conceptual, bibliographic and empirical foundation in the field of invasion biology, from an Anthropocene perspective. The second half reviews the ecology, biogeography, and local impacts in South America of exotic species groups (European rabbit, Eurasian wild boar, Canadian beaver, North American mink, and Holarctic freshwater fishes), which are shown to be useful models for case studies of global relevance.

**Aqueous Lubrication** Nicholas D Spencer,2014-03-12 Man lubricates mostly with oil. Nature lubricates exclusively with water. Pure water is a poor lubricant, but the addition of proteins, especially glycoproteins, can modify surfaces to make them far more lubricating at slow speeds. Understanding how nature does this, and the physical structures involved, is not only important for the understanding of diseases such as osteoarthritis, but also essential for the successful application of articulating implants, such as hips and knees, as well as the development of medical devices such as catheters and contact lenses. A host of important applications of water-based lubrication are already in place in the personal care and food industries, and further industrial applications of water-based lubrication could have a significant positive impact on the environment. This book is the first of its kind. It brings together the latest research in biological and biomimetic, water-based lubrication and is authored by the world's experts in the field. Contents:Tribology of Natural Articular Joints (Rowena Crockett)Sticky and Slippery: Interfacial Forces of Mucin and Mucus Gels (Seunghwan Lee)Aqueous Lubrication and Food Emulsions (Jason R Stokes)Aqueous Lubrication in Cosmetics (Gustavo S Luengo, Anthony Galliano and Claude Dubief)Hydrogel Friction and Lubrication (Jian Liu and Jian Ping Gong)Aqueous Lubrication with Polymer Brushes (Suzanne Giasson and Nicholas D Spencer)Water-Like Lubrication of Hard Contacts by Polyhydric Alcohols (Jean Michel Martin and Maria Isabel De Barros-Bouchet)Aqueous Lubrication of Ceramics (Mitjan Kalin) Readership: Academic and industrial tribologists, materials scientists, biomechanics professionals, and physicists and chemists with an interest in tribology. Keywords:Lubrication;Water;Polymers;Cartilage;Mucin;Ceramics;Gels;Personal Care;Food Emulsion

**Water and Tribal Settlement in South-East Arabia** J. C. Wilkinson,2013-05 This book is a study of the traditional relationships that exist in Oman between land and social organization, and how they have evolved. The author starts with the theme of aridity and, using the extensive literature of the 1200 year old Ibadi community to supplement his field work, shows how the techniques of water exploitation have influenced the country's social organization and its political ideology. He describes how the settlement organization has evolved in two stages; the first in the years before Islam when the Persians irrigated the land using aflaj or horizontal water channels; the second after the Arabs had overthrown the Persians and, influenced by Ibadism, established a more democratic society dominated by a strong tribal structure in the villages. The tribal structure is then examined in detail and the author shows how close the links are between the Islamic ideology, land use, and social organization. As a contribution to the human geography of Oman as well as to general knowledge of the Middle East the book will interest Arabists, Islamic historians and social anthropologists, as well as hydrologists and geographers.

**I Feel Jealous** Stephanie Finne,2021-06-15 In this book, readers will learn about jealousy and envy in themselves and others, how and why they feel it, how to best respond to it, and how to communicate these feelings. Social and emotional learning (SEL) concepts support growth mindset throughout, while Try This! and Grow with Goals activities at the end of the book further reinforce the content. Vibrant, full-color photos and carefully leveled text engage young readers as they learn more about states of mind, moods, and emotions. Also includes sidebars, a table of contents, glossary, index, and tips for educators and caregivers. I Feel Jealous is part of Jump!'s States of Mind series.

The Internet Playground Ellen Seiter,2005 Based on four years of experience teaching computers to 8-12 year olds, media scholar Ellen Seiter offers parents and educators practical advice on what children need to know about the Internet and when they need to know it. The Internet Playground argues that, contrary to the promises of technology boosters, teaching with computers is very difficult. Seiter points out that the Internet today resembles a mall more than it does a library. While children love to play online games, join fan communities, and use online chat and instant messaging, the Internet is also an appallingly aggressive marketer to children and, as this book passionately argues, an educational boondoggle.

**Genetic Resources of Phaseolus Beans** Paul Gepts,2012-12-06 The period following the second world war has witnessed an expanding commitment to incr~ased food production in tropical countries. Public and private initiatives at the national and international levels have led to the creation of programs geared specifically towards the improvement of food crops in tropical conditions. Examples of this increased commitment are the network of international agricultural research centers and numerous bilateral aid projects. As a consequence, crop improvement has become a truly worldwide endeavor, relying on an international network of institutions and collaborators. This holds also for Phaseolus beans. Following the discovery of the Americas, Phaseolus beans became distributed on all six continents. Yet, until not so long ago, most of the research on Phaseolus improvement took place in developed countries. In recognition of the nutritional importance of Phaseolus beans in developing countries, this has changed considerably in the last years, principally perhaps through the activities of the Centro Internacional de Agricultura Tropical (CIAT) and the International Board for Plant Genetic Resources (IBPGR). Consequently, the scope of the research on Phaseolus has broadened considerably and the number of Phaseolus researchers is larger than ever before.

**Good Luck** Alex Rovira,Fernando Trias De Bes,2004-08-24 Good Luck is a whimsical fable that teaches a valuable lesson: good luck doesn’t just come your way—it’s up to you to create the conditions to bring yourself good luck. Written by Alex Rovira and Fernando Trias de Bes—two leading marketing consultants—this simple tale is universally applicable and uniquely inspirational. Good Luck tells the touching story of two old men, Max and Jim, who meet by chance in Central Park fifty years after they last saw each other as children. Max achieved great success in life; Jim sadly did not. The secret to Max’s success lies in a story his grandfather told him long ago. This story within a story has a tone reminiscent of the classic The Alchemist and shows how to seize opportunity and achieve success in life. In a surprise ending, Good Luck comes full circle, offering the reader inspiration, instruction, and an engaging tale.
