An Introduction to 3D Computer Vision Techniques and Algorithms Boguslaw Cyganek, J. Paul Siebert, 2011-08-10

Computer vision encompasses the construction of integrated vision systems and the application of vision to problems of real-world importance. The process of creating 3D models is still rather difficult, requiring mechanical measurement of the camera positions or manual alignment of partial 3D views of a scene. However using algorithms, it is possible to take a collection of stereo-pair images of a scene and then automatically produce a photo-realistic, geometrically accurate digital 3D model. This book provides a comprehensive introduction to the methods, theories and algorithms of 3D computer vision. Almost every theoretical issue is underpinned with practical implementation or a working algorithm using pseudo-code and complete code written in C++ and MatLab®. There is the additional clarification of an accompanying website with downloadable software, case studies and exercises. Organised in three parts, Cyganek and Siebert give a brief history of vision research, and subsequently: present basic low-level image processing operations for image matching, including a separate chapter on image matching algorithms; explain scale-space vision, as well as space reconstruction and multiview integration; demonstrate a variety of practical applications for 3D surface imaging and analysis; provide concise appendices on topics such as the basics of projective geometry and tensor calculus for image processing, distortion and noise in images plus image warping procedures. An Introduction to 3D Computer Vision Algorithms and Techniques is a valuable reference for practitioners and programmers working in 3D computer vision, image processing and analysis as well as computer visualisation. It would also be of interest to advanced students and researchers in the fields of engineering, computer science, clinical photography, robotics, graphics and mathematics.

9th International Symposium on High-Temperature Metallurgical Processing Jiann-Yang Hwang, Tao Jiang, Mark William Kennedy, Dean Gregurek, Shijie Wang, Baojun Zhao, Onuralp Yücel, Ender Keskinilic, Jerome P Downey, Zhiwei Peng, Rafael. Padilla, 2018-01-16 In recent years, global metallurgical industries have experienced fast and prosperous growth. High-temperature metallurgical technology is the backbone to support the technical, environmental, and economical needs for the growth. This collection features contributions covering the advancements and developments of new high-temperature metallurgical technologies and their applications to the areas of processing of minerals; extraction of metals; preparation of metallic, refractory and ceramic materials; treatment and recycling of slag and wastes; and saving of energy and protection of environment. The volume will have a broad impact on the academics and professionals serving the metallurgical industries around the world.

Racing Camaros Steve Holmes, 2021-03-12 Chevrolet created the Camaro in response to the runaway sales success of the Ford Mustang, the first pony car. The Mustang went on sale in April 1964, and by August that same year, General Motors launched an intensive program to bring its own pony car to market. In September 1966, the Camaro went on sale. Chevrolet wanted the Camaro to be better than the Mustang in every area, including style, ride-quality, and performance. To that end, with the Mustang having already achieved so much racing success, Chevrolet wanted to beat it on the track also. Racing Camaros: An International Photographic History 1966 - 1984 is a photographic celebration of road racing Camaros throughout the world. It focuses on production-based cars, rather than the heavily modified tube-frame silhouette machines that began appearing in the late 1970s. Included are images of big-budget factory-supported cars competing in the Trans-Am series, right through to low-buck independents, and cars competing throughout the

world. For the first time, the international road racing representation of the Camaro is featured in a book, which includes countless photos that have never been published. Technical detail is provided throughout, from concept and design, right through its racing career, and the challenges and developments that took place to make it a winner. Only period images have been used. This is a true photographic history depicting the global popularity of the Chevrolet Camaro as a road racing car.

How to Pass OSCP Series: Windows Privilege Escalation Step-By-Step Guide Alan Wang, 2020-11-13 This book is the first of a series of How To Pass OSCP books and focus on techniques used in Windows Privilege Escalation. This is a step-by-step guide that walks you through the whole process of how to escalate privilege in Windows environment using many common techniques. We

start by gathering as much information about the target as possible either manually or using automated scripts. Next, we search for misconfigured services or scheduled tasks, insufficient file permission on binaries or services, vulnerable kernel, vulnerable software running with high privileges, sensitive information stored on local files, credential saved in the memory, registry settings that always elevate privileges before executing a binary, hard-coded credential contained in the application configuration files, and many more. Moon-face and Other Stories Jack London,1906 JACK

LONDON (1876-1916), American novelist, born in San Francisco, the son of an itinerant astrologer and a spiritualist mother. He grew up in poverty, scratching a living in various legal and illegal ways -robbing the oyster beds, working in a canning factory and a jute mill, serving aged 17 as a common sailor, and taking part in the Klondike gold rush of 1897. This various experience provided the material for his works, and made him a socialist. The son of the Wolf (1900), the first of his collections of tales, is based upon life in the Far North, as is the book that brought him recognition, The Call of the Wild (1903), which tells the story of the dog Buck, who, after his master's death, is lured back to the primitive world to lead a wolf pack. Many other tales of struggle, travel, and adventure followed, including The Sea-Wolf (1904), White Fang (1906), South Sea Tales (1911), and Jerry of the South Seas (1917). One of London's most interesting novels is the semi-autobiographical Martin Eden (1909). He also wrote socialist treatises, autobiographical essays, and a good deal of journalism.

Sintering Applications Burcu Ertug,2013-02-06 Sintering is one of the final stages of ceramics fabrication and is used to increase the strength of the compacted material. In the Sintering of Ceramics section, the fabrication of electronic ceramics and glass-ceramics were presented. Especially dielectric properties were focused on. In other chapters, sintering behaviour of ceramic tiles and nano-alumina were investigated. Apart from oxides, the sintering of non-oxide ceramics was examined. Sintering the metals in a controlled atmosphere furnace aims to bond the particles together metallurgically. In the Sintering of Metals section, two sections dealt with copper containing structures. The sintering of titanium alloys is another topic focused in this section. The chapter on lead and zinc covers the

sintering in the field of extractive metallurgy. Finally two more chapter focus on the basics of sintering,i.e viscous flow and spark plasma sintering.

Kumba Africa Sampson Ejike Odum,2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying

heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Where am I Wearing? Kelsey Timmerman, 2008-11-24

Globalization makes it difficult to know where the things you buy come from. Journalist and travel writer Kelsey Timmerman wanted to know where his clothes came from and who made them, so he traveled from Honduras to Bangladesh to Cambodia to China and back. Along the way, he met the people who made his favorite clothes and learned as much about them as he did about globalization itself. Enlightening and controversial at once, this book puts a human face on globalization.

Un prince cruel Sophie Lark, 2022-01-20 Il n'a rien d'un prince charmant... Callum Griffin est l'héritier de la mafia irlandaise. Il est impitoyable, arrogant, et il veut me tuer. Nous sommes partis du mauvais pied, tous les deux, quand j'ai allumé un (tout petit) feu dans sa maison. Nos familles estiment qu'un pacte nuptial est le seul moyen d'empêcher une guerre ouverte. Je crois que je vais devoir l'assassiner dans son sommeil. Ce serait bien plus facile si Callum n'était pas aussi beau. Mais je protège mon cœur dans une boîte fermée à double tour. Parce que même si je suis forcée de l'épouser... Je ne pourrais jamais aimer un prince cruel. * * * Un prince cruel est le premier acte

explosif de la saga épique Le sang en héritage. C'est une romance dark sur fond de mafia avec une fin heureuse, qui peut se lire indépendamment des autres tomes et ne se termine pas sur un suspense.
