Six Men Built the Modern Auto Industry Richard Alan Johnson, This is the story of six extraordinary men who each built something from nothing, redefined the automotive industry after World War II, and redirected its course for the future: Henry Ford II (visionary autocrat with an iron

will), Shoichiro Honda (most successful automotive entrepreneur since Henry Ford I), Eberhard von Kuenheim (founder of the modern BMW), Lee Iacocca, Ferdinand Piech (builder of Volkswagen Group) and Robert Lutz (who left retirement at 70 and is still highly influential at General Motors). What made them special was the sheer volume of fundamental change they brought to the largest industry in the history of the world. They not only re-shaped the auto business, the six made a sizable dent in the societies they lived in. To a man they were great cognitive thinkers. Their minds worked with animal speed, even instinct speed. But more than anything these were brave and cantankerous souls who rode the waves of history. Each could see the future. They could just make it out-sometimes imperfectly, but could see it nonetheless. They took a business that had begun to mature and decline by the 1930s and found ways to make it fresh and whole again.- The compelling story of the global car business over the past half-century.- A lively and engaging narrative that recounts some times collaborative, sometimes archly antagonistic interactions among the men- Full of business revelations at the highest level, written by a journalist operating at the heart of the industry- Global appeal that shows how automotive groups in the USA, Europe and Asia have influenced each other- A business story interlaced with personal details that explains why the six were determined to be successful

About the Author For two decades, Richard Johnson has worked for Crain Communications, publisher of the world's leading automotive business publications. Founding editor of Crain's Automotive News Europe, he has been a reporter and editor for the group in Detroit, Tokyo, Frankfurt and London. He is currently a senior editor with Automotive News in Detroit and regularly talks to the most senior executives in the leading car manufacturing groups.

Martin Brundle Scrapbook Martin Brundle, Philip Porter, 2013-07-01 Starting his career with banger racing as a child, Martin Brundle routinely beat adults on the track. Brundle would go on to

beat some of the biggest names in motor sports. The Martin Brundle Scrapbook is a fascinating look at his remarkable career. You'll see his battles with Senna, experience being F1 team members with legends like Michael Schumacher and Mika Hakkinen, his luminary TV career, to name a few. This massive book is loaded with Brundle's own memorabilia and contributions from over 50 personalities in the racing world. It all makes for an informative, surprising, and humorous romp through the life and times of an incredible figure.

Two Billion Cars Daniel Sperling, Deborah Gordon, 2009-01-13 Today there are over a billion vehicles in the world, and within twenty years, the number will double, largely a consequence of China's and India's explosive growth. Given that greenhouse gases are already creating havoc with our climate and that violent conflict in unstable oil-rich nations is on the rise, will matters only get worse? Or are there hopeful signs that effective, realistic solutions can be found? Blending a concise history of cars and their impact on the world, leading transportation experts Daniel Sperling and Deborah Gordon explain how we arrived at this state, and what we can do about it. Sperling and Gordon assign blame squarely where it belongs--on the auto-industry, short-sighted government policies, and consumers. They explore such solutions as getting beyond the gas-guzzler monoculture, re-inventing cars, searching for low-carbon fuels, and more. Promising advances in both transportation technology and fuel efficiency together with shifts in traveler behavior, they suggest, offer us a way out of our predicament. The authors conclude that the two places that have the most troublesome emissions problems--California and China--are the most likely to become world leaders on these issues. Arnold Schwarzenegger's enlightened embrace of eco-friendly fuel policies, which he discusses in the foreword, and China's forthright recognition that it needs far-reaching environmental

and energy policies, suggest that if they can tackle the issue effectively and honestly, then there really is reason for hope. Updated with a new afterword that sheds light on the profound changes in the global economy in the last year, *Two Billion Cars* makes the case for why and how we need to transform transportation now more than ever. Authoritatively prescriptive. --Tom Vanderbilt, *Wilson Quarterly* Provocative and pleasurable, far-seeing and refreshing, fact-based and yet a page-turner, global in scope but rooted in real places. The authors make a convincing case that smart consumers driving smart electric-drive cars can find the critical path to a safer planet. --Robert Socolow, Princeton University In this insightful and persuasive book, Sperling and Gordon highlight one of the biggest environmental challenges of this century: two billion cars. They rightly contend that we cannot avert the worst of global warming without making our cars cleaner and petroleum-free. Luckily the authors also offer a roadmap for navigating this problem that is both visionary and achievable. --Frances Beinecke, President, Natural Resources Defense Council

The Challenge of Remaining Innovative Sally H. Clarke, Naomi R. Lamoreaux, Steven W. Usselman, 2009 The contributors explore two main themes: the challenge of remaining innovative and the necessity of managing institutional boundaries in doing so. The book is organized into four parts, which move outward from individual firms; to networks or clusters of firms; to consultants and other intermediaries in the private economy who operate outside of the firms themselves; and finally to government institutions and politics. --Editor.

Japan's Motorcycle Wars Jeffrey W. Alexander, 2009-01-01 For decades the crown jewels of Japan's postwar manufacturing industry, motorcycles remain one of Japan's top exports. *Japan's Motorcycle Wars* assesses the historical development and societal impact of the motorcycle industry, from the influence of motor sports on vehicle sales in the early 1900s to the postwar developments

that led to the massive wave of motorization sweeping the Asia-Pacific region today. Jeffrey Alexander brings a wealth of information to light, providing English translations of transcripts, industry publications, and company histories that have until now been available only in Japanese. By exploring the industry as a whole, he reveals that Japan's motorcycle industry was characterized not by communitarian success but by misplaced loyalties, technical disasters, and brutal competition.

Evolutionary Humanoid Robotics Malachy Eaton, 2015-02-02 This book examines how two distinct strands of research on autonomous robots, evolutionary robotics and humanoid robot research, are converging. The book will be valuable for researchers and postgraduate students working in the areas of evolutionary robotics and bio-inspired computing.

Autocourse 60 Years of World Championship Grand Prix Motor Racing Alan Henry, 2010-10-01 This book tells the story of the globally successful FIA Formula 1 World Championship from its roots before the Second World War to the present day. Early chapters cover the growth of motor sport from the first recorded race in 1894 through the 1990s. Despite the credit crunch and worldwide recession Formula 1 has still managed to retain its position as a powerful global sport as the calendar heads towards a twenty race season.

Ayrton Senna Giorgio Terruzzi, 2016 Telling the story of Ayrton Senna is not easy. It means retracing an intense competitive career, looking into the vulnerable soul of a complex man, and reliving his tragic death, which came during the bloodiest weekend in the history of modern motor racing. It also means paying homage to a truly heroic figure, whose grace and appeal remain intact. In other words, we are talking about a journey into the collective memory, within which each racing fan cherishes particular moments, personal memories, emotions and grief related to a figure who in

some way continues to appear and to race in a highly colourful firmament. This brings us to Ercole Colombo. His photos. His passion for Formula 1, and his innate ability as a reporter, combined with the aesthetic touch of a great photographer.

Living with Robots Richard Pak, Ewart J. de Visser, Ericka Rovira, 2019-12-04 Living with Robots: Emerging Issues on the Psychological and Social Implications of Robotics focuses on the issues that come to bear when humans interact and collaborate with robots. The book dives deeply into critical factors that impact how individuals interact with robots at home, work and play. It includes topics ranging from robot anthropomorphic design, degree of autonomy, trust, individual differences and machine learning. While other books focus on engineering capabilities or the highly conceptual, philosophical issues of human-robot interaction, this resource tackles the human elements at play in these interactions, which are essential if humans and robots are to coexist and collaborate effectively. Authored by key psychology robotics researchers, the book limits its focus to specifically those robots who are intended to interact with people, including technology such as drones, self-driving cars, and humanoid robots. Forward-looking, the book examines robots not as the novelty they used to be, but

rather the practical idea of robots participating in our everyday lives.

The Death of Ayrton Senna Richard Williams, 2010-09-02 The most definitive and compelling book about the legendary racing driver, now a BAFTA award-winning documentary. 'For the casual racing fan it's a mighty good read, for the Senna fan it's indispensable' Time Out Millions of people around the world watched in horror on that fateful day in Imola at the 1994 San Marino Grand Prix when Ayrton Senna's car careered off the track at 190mph. The greatest driver in Formula One history was dead. In this classic sports book, Richard Williams explores the complex Brazilian who was a hero in his own country and an icon to everyone who loved not just motor-racing but sport itself. In his drive to win and his desire always to test himself to the limit, Senna embodied all that is best and most thrilling in sport.
