The Mechanic's Tale Steve Matchett,2010-12-16 Essential reading for anyone interested in life behind-the-scenes at Formula One. Formula One Grand Prix mechanic Steve Matchett takes the reader on a compelling journey through his life in the pit-lane, from his beginnings as a young apprentice, through his time at Ferrari and BMW to his later success with Benetton. He gives eye-witness views of the great drivers, including Michael Schumacher, Nigel Mansell, Alain Prost and Ayrton Senna. He also talks of key Benetton personalities, and explains how the team was transformed into a strong, competitive organisation, winning three World Championships. His determination and frustration in trying - and eventually succeeding - to break into the high-pressure world of Formula One leaps off the page.

The Mechanic Marc 'Elvis' Priestley,2017-11-02 Meet Marc 'Elvis' Priestley: the former number-one McLaren mechanic, and the brains behind some of Formula One's greatest ever drivers. Revealing the most outrageous secrets and fiercest rivalries, The Mechanic follows Priestley as he travels the world working in the high-octane atmosphere of the F1 pit lane. While the spotlight is most often on the superstar drivers, the mechanics are the guys who make every World Champion, and any mistakes can have critical consequences. However, these highly skilled engineers don't just fine-tune machinery and crunch data through high-spec computers. These boys can seriously let their hair down. Whether it's partying on luxury yachts or gravity-defying photos aboard aeroplanes, this is a world which thrills on and off the track. This is Formula One, but not like you've seen it before.

Formula One John Smailes,2021-11-02 Since 1950, fifteen Australians and nine New Zealanders have raced in world championship Formula One, the pinnacle of motor racing. Three - Jack Brabham, Denny Hulme and Alan Jones - have won the world title. Two have died in the attempt without ever facing the world championship starters' lights. So few drivers make it to Formula One. Ever fewer succeed in the fastest and most challenging four-wheeled sport of all. Now John Smailes, author of the bestselling Climbing the Mountain, Race Across the World, Mount Panorama and Speed Kings, gives us the definitive story of our involvement with Formula One, from the pioneer days in the aftermath of World War II, to the championship glory of Brabham, Hulme and Jones, the grit and determination of Mark Webber, and Australia's current Formula One star, the irrepressible Daniel Ricciardo, all the way to potential champions of the future like Oscar Piastri. With over 150 stunning photographs, and interviews with drivers past and present, as well as the engineers, managers and team owners behind the scenes, this is the must-have book for every Australian and New Zealand fan of Formula One.

Formula 1 Technical Analysis 2016/2018 Giorgio Piola,2019-09-03 The last edition of an automotive literary classic: the technical analysis of Formula 1 penned by Giorgio Piola. After 25 years of publication, the historic draughtsman is bringing the curtain down on this experience with a volume that examines the last three seasons, from 2016 to 2018, as always reviewing the principal technical innovations in the spheres of chassis and engine design. This three-year analysis is appropriately completed with a retrospective of some of Piola's most important drawings from a 50-year career that began back in 1969. Formula 1 Technical Analysis is the only book of its kind that unveils all the technical secrets - even the most carefully hidden ones - of the Formula 1 World Championship cars. Engines, chassis, brakes, tires, this is an especially rigorous analysis of the car, but also their steering wheels and suspension. An essential for real Formula 1 enthusiasts for almost 30 years, this annual, this book also reviews in its second part the main new technical developments devised by the various teams during the covered seasons. The book is illustrated by more than 500 color technical designs, created by Piola himself.

Senna Versus Prost Malcolm Folley,2009-05-07 In the late eighties and early nineties, Formula One was at its most explosive, with thrilling races, charismatic drivers, nail-biting climaxes - and the most deadly rivalry ever witnessed in sport. Two of Formula One's most honoured champions and iconic figures drove together for McLaren for two seasons, and their acrimonious and hostile relationship extended even after one of them had left the team. ALAIN PROST, France's only F1 world champion, the intelligent, smooth driver with the epithet 'Le Professeur'. AYRTON SENNA, the mercurial kid from a privileged background in Sao Paulo who would become the most intense and ruthless racing driver the world has ever seen. It was a story that would have a tragic ending. As the great rivals raced to victory, their relationship deteriorated badly, beginning with the breaking of a gentleman's agreement, and public spats followed, culminating in Prost accusing Senna of deliberately trying to ride him off the circuit, and fearful that the Brazilian would get someone killed with his daring overtaking feats. And the final, sad act of this drama happened at the San Marino Grand prix at Imola in May 1994, when Senna was killed. Featuring a rare interview with Prost, and insight from Martin Brundle, Damon Hill, Sir Frank Williams, Bernie Ecclestone, Derek Warrick, Johnny Herbert, Gerhard Berger, plus McLaren insiders and other F1 figures, Malcolm Folley provides us with a breath-taking account of one of the all-time classic sporting rivalries.

Introducing New Materials in the Automotive Industry Fredrik Henriksson,2017-11-15 Passenger vehicles are central to Western society, and contribute to a significant part of our greenhouse gas emissions. In order to reduce emissions, the automotive industry as a whole is working to reduce mass in passenger vehicles in order to reduce energy consumption. One way to reduce mass is to introduce lightweight materials in the body of the vehicle. This research aims to explore the relationship between product and production system when introducing new materials. Besides a theoretical review and an industry-centered technological mapping, four case studies have been conducted during the course of this licentiate thesis.

Two case studies were conducted with engineering design students working as development teams, one case study with the author as the developer and ?nally one case study in an industrial environment at a product owning company with in-house production. The goal of the case studies has been to increase the collective knowledge of how product development decisions affect production development decisions, and vice versa, when developing passenger vehicles in new materials. In the following analysis of case study outcomes, a number of factors important for introducing new materials are discussed. The relationship between product and production is investigated, both in terms of how the production system affects the product and how the product affects the production system. The outcome from this analysis is a mapping of important factors for automotive industry companies to understand and identify when looking at introducing new materials in existing production systems. Finally, a suggestion for future research efforts is presented.

A Monastic Renaissance at St Albans James G. Clark,2004-12-09 A Monastic Renaissance at St Albans is a study of intellectual life at the abbey of St Albans - one of Britain's greatest Benedictine monasteries - during the lifetime of Thomas Walsingham (c.1340-1422), one of the most prolific scholars of the later middle ages. It has always been assumed that the monasteries fell into decline long before the dissolution and that cultural and intellectual activities were largely abandoned as the monks surrendered themselves tohigh living and low morals. This study challenges this view. Drawing on a wide variety of manuscript sources, it shows that education, independent study, and even the co-ordinated copying of books continued to flourish at St Albans (and its affiliate houses) for much of the fourteenth and fifteenth centuries. In fact theabbey emerged as one of the country's most influential centres of learning, a clearing-house for books and ideas in Ricardian and Lancastrian England.Thomas Walsingham himself played a key part in this renaissance in monastic studies; his works were copied and circulated throughout the St Albans network and his influence acted upon the next generation of monastic readers and writers. Walsingham was not only a compiler of contemporary chronicles but also a Classical scholar of extraordinary originality. His commentary on Ovid's Metamorphoses, his re-working of the histories of Alexander of Macedon and the Trojan War, and hisGenealogia deorum gentilium, are discussed in detail here for the first time. Walsingham's interest in the Classics was shared by many of his St Albans colleagues, and they in turn were members of a wider circle of literary scholars, which included the London schoolmaster, John Seward. The work of these scholars,monastic and secular, points towards a revival of Classical and literary scholarship in England long before Italian humanism and other traces of the continental Renaissance first found their way into the country.
