Angel Exterminatus Graham McNeill, 2013-01-29 The latest title in Black Library's premium line. Perturabo – master of siegecraft, and executioner of Olympia. Long has he lived in the shadow of his more favoured primarch brothers, frustrated by the mundane and ignominious duties which regularly fall to his Legion. When Fulgrim offers him the chance to lead an expedition in search of an ancient and destructive xenos weapon, the Iron Warriors and the Emperor's Children unite and venture deep into the heart of the great warp-rift known only as 'the Eye'. Pursued by a ragged band of survivors from Istvan V and the revenants of a dead eldar world, they must work quickly if they are to unleash the devastating power of the Angel Exterminatus!

The Influence of Global Environmental Change on Infectious Disease Dynamics Institute of Medicine, Board on Global Health, Forum on Microbial Threats, 2014-09-03 The twentieth century witnessed an era of unprecedented, large-scale, anthropogenic changes to the natural environment. Understanding how environmental factors directly and indirectly affect the emergence and spread of infectious disease has assumed global importance for life on this planet. While the causal links between environmental change and disease emergence are complex, progress in understanding these links, as well as how their impacts may vary across space and time, will require transdisciplinary, transnational, collaborative research. This research may draw upon the expertise, tools, and approaches from a variety of disciplines. Such research may inform improvements in global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health. The Influence of Global Environmental Change on Infectious Disease Dynamics is the summary of a workshop hosted by the Institute of Medicine Forum on Microbial Threats in September 2013 to explore the scientific and policy implications of the impacts of global environmental change on infectious disease emergence, establishment, and spread. This report examines the observed and potential influence of environmental factors, acting both individually and in synergy, on infectious disease dynamics. The report considers a range of approaches to improve global readiness and capacity for surveillance, detection, and response to emerging microbial threats to plant, animal, and human health in the face of ongoing global environmental change.

Great Naval Battles of the Ancient Greek World Owen Rees, 2018-12-31 Naval warfare is the unsung hero of ancient Greek military history, often overshadowed by the more glorified land battles. Owen Rees looks to redress the balance, giving naval battles their due attention. This book presents a selection of thirteen naval battles that span a defining century in ancient Greek history, from the Ionian Revolt and Persian Invasion to the rise of external naval powers in the Mediterranean Sea, such as the Carthaginians. Each battle is set in context. The background, wider military campaigns, and the opposing forces are discussed, followed by a narrative and analysis of the fighting. Finally, the aftermath of the battles are dealt with, looking at the strategic implications of the outcome for both the victor and the defeated. The battle narratives are supported by maps and tactical diagrams, showing the deployment of the fleets and the wider geographical factors involved in battle. Written in an accessible tone, this book successfully shows that Greek naval warfare did not start and end at the battle of Salamis.

While their allies wage war on a thousand different fronts, the XVIth Legion descend upon the Knight world of Molech - home to the ruling House Devine, and a principal stronghold of the Imperial Army. Heritage Building Information Modelling Yusuf Arayici, John Counsell, Lamine Mahdjoubi, Gehan Ahmed Nagy, Soheir Hawas, Khaled Dweidar, 2017-02-10 Building Information Modelling (BIM) is being debated, tested and implemented wherever you look across the built environment sector. This book is about Heritage Building Information Modelling (HBIM), which necessarily differs from the commonplace applications of BIM to new construction. Where BIM is being used, the focus is still very much on design and construction. However, its use as an operational and management tool for existing buildings, particularly heritage buildings, is lagging behind. The first of its kind, this book aims to clearly define the scope for HBIM and present cutting-edge research findings alongside international case studies, before outlining challenges for the future of HBIM research and practice. After an extensive introduction to HBIM, the core themes of the book are arranged into four parts: Restoration philosophies in practice Data capture and visualisation for maintenance and repair Building performance Stakeholder engagement This book will be a key reference for built environment practitioners, researchers, academics and students engaged in BIM, HBIM, building energy modelling, building surveying, facilities management and heritage conservation more widely.

State-Owned Enterprises in Middle East, North Africa, and Central Asia: Size, Costs, and Challenges Mr. Ernesto Ramirez Rigo, Christine J. Richmond, Oluremi Akin Olugbade, Gareth Anderson, Maria Atamanchuk, Mr. Hatim Bukhari, Iacovos Ioannou, Deeksha Kale, Tannous Kass-Hanna, Mr. Maximilien Queyranne, Wei Shi, Joyce Wong, 2021-09-20 Prior to the COVID-19 shock, the key challenge facing policymakers in the Middle East, North Africa, and Central Asia region was how to generate strong, sustainable, job-rich, inclusive growth. Post-COVID-19, this challenge has only grown given the additional reduction in fiscal space due to the crisis and the increased need to support the recovery. The sizable state-owned enterprise (SOE) footprint in the region, together with its cost to the government, call for revisiting the SOE sector to help open fiscal space and look for growth opportunities.

Titanicus Dan Abnett, 2009-11 Originally published: Nottingham: Black Library, 2008.

Mark of Calth Laurie Goulding, 2014-01-28 Anthology of short stories revealing the untold tales of the Underworld War. The Heresy came to Calth without warning. In just a few hours of betrayal and bloodshed, the proud warriors of the XIIIth Legion – Guilliman's own Ultramarines – were laid low by the treachery of their erstwhile brothers of the XVIIth. Now, as the planet is scoured by solar flares from the wounded Veridian star, the survivors must take the fight to the remaining Word Bearers and their foul allies, or face damnation in the gloomy arcology shelters beneath the planet's surface. A collection of stories by authors including Dan Abnett, Aaron Demsbki-Bowden and Rob Sanders. The battle for Calth is far from over...

The Eye of Medusa David Guymer, 2017-11-14 The coldly methodical and unrelenting Iron Hands Space Marine Chapter clash with the cybernetic soldiers of the Adeptus Mechanicus over control of the world of Thennos. Ever since the dark days of the Great Heresy, the Iron Hands have a long and tortured history. Their years of suffering and war has left them hardened and believing in a brutal tenet: the flesh is

weak. Heavily cybernetic, their flesh extensively altered, these warriors of the Imperium are more machine than man, cold in aspect as well as demeanour. Their methods of recruitment are harsh, their rituals arcane, their pride unshakable. So when a world under the protection of the Chapter falls foul of insurrection, the Iron Hands answer with fire and cold retribution. It matters not that Thennos is considered sovereign territory by the Adeptus Mechanicus - the Iron Hands' campaign is one of extermination. But there is something dark lurking within Thennos, a horror that defies the purity of cold logic and the machine, and threatens something more, something ruinous...

The Battle of Fontenoy 1745 James Falkner,2019 The Battle of Fontenoy marked a turning point in the War of the Austrian Succession, yet it has rarely been analyzed in depth and the Europe-wide conflict in which it played a part is little understood. James Falkner, in this perceptive and original account, puts the record straight by describing the fighting in graphic detail and setting it in the context of the sequence of wars that determined the shape of Europe during the eighteenth century. Great Britain with her Austrian and Dutch allies fought to ensure that Maria Theresa of Austria should be able to take the throne of the Holy Roman Empire. Ranged against her interests was the might of Louis XV's France, which strove to weaken Austria by promoting a Bavarian aspirant to the Imperial throne. On 11 May 1745 at Fontenoy in the Austrian Netherlands the two sides met in a ferocious day-long struggle that changed course of the war. James Falkner's narrative gives a fascinating insight into the Battle of Fontenoy itself and more widely into the nature of warfare in Europe 250 years ago.
