The Prop Builder's Molding & Casting Handbook Thurston James,1989-11-15 The Prop Builder's Molding & Casting Handbook & break;& break;This is the first book to contain, in one comprehensive volume, every molding and casting procedure of use to the theater props builder (no matter what his or her level or proficiency). The author demonstrates the techniques involved in using more than thirty different materials ranging from papier-mache to breakaway glass. & break;& break;While the use of some materials—plaster and polyester resins, for example—is covered to some extent in other publications, information on the selection and use of rubber materials (latex, neoprene, silicone, and the urethanes) and the procedure for making breakaway windows and bottles is available only in The Prop Builder's Molding & Casting Handbook. & break;& break;Written in an easy, conversational style, the book will be useful to anyone involved with theater properties, puppetry, and costuming (as professionals or amateurs). It will also serve admirably the needs of students taking classes in those subjects. & break;& break;Completing the book is a special section on designing and building a vacuum forming machine suitable for use in constructing theater props. More than 450 photographs illustrate the step-by-step procedures explained throughout the entire text.

The Imperial Infantryman's Uplifting Primer - The Damocies Gulf Edition Matt Ralphs,2008-01-08 Pocket book of the Imperial Guard styled in the form of an artefact of the 41st millennium. The book is filled with numerous sketches and diagrams to accompany the text. This second edition has additional sections on fighting in space and combating the alien Tau.

Imperial Munitorum Manual Graham McNeill,2007-11-13 In the style of a military weapons catalogue, this text features over 60 entries on weapons, kit and equipment utilised by the Imperial Guard, as well as details about the organisation that provides it, the Departmento Munitorum.
