Armour Modelling John Prigent, 2006-11-28 This book sets out to answer a wide range of modelers' 'how-to' questions. It begins by showing all the things that need to be done to build a first model. Paints, glues, knives and other basic tools are introduced. Then it moves on to the use of accessories - etched metal sets, turned metal gun barrels, and simple resin conversions. Here the more specialised tools, such as those made for work with etched metal, are discussed. The book includes sections covering working safely with resin, adding camouflage finishes by brush, spray can and airbrush, and ways of reproducing the German anti-magnetic Zimmerit finish that troubles many modellers. The various types of replacement tank tracks are shown with ways to build and paint them, and the different challenges of modeling wheeled vehicles are also addressed. The book continues with demonstrations of how to build a complex conversion or a complete resin kit as well as more simple scratchbuilding (working from raw materials rather than prefabricated kit parts). Researching

and making decals for markings when there are no ready-made ones available, display bases and figures are also covered. Everything is straightforwardly explained and clearly illustrated by numerous photographs of steps in the various processes and of finished models.

The Penguin Book of Exorcisms Joseph P. Laycock, 2020-09-08 Haunting accounts of real-life exorcisms through the centuries and around the world, from ancient Egypt and the biblical Middle East to colonial America and twentieth-century South Africa A Penguin Classic Levitation. Feats of superhuman strength. Speaking in tongues. A hateful, glowing stare. The signs of spirit possession have been documented for thousands of years and across religions and cultures, even into our time: In 2019 the Vatican convened 250 priests from 50 countries for a weeklong seminar on exorcism. The Penguin Book of Exorcisms brings together the most astonishing accounts: Saint Anthony set upon by demons in the form of a lion, a bull, and a panther, who are no match for his devotion and prayer; the

Prophet Muhammad casting an enemy of God out of a young boy; fox spirits in medieval China and Japan; a headless bear assaulting a woman in sixteenth-century England; the possession in the French town of Loudun of an entire convent of Ursuline nuns; a Zulu woman who floated to a height of five feet almost daily; a previously unpublished account of an exorcism in Earling, Iowa, in 1928--an important inspiration for the movie *The Exorcist*; poltergeist activity at a home in Maryland in 1949--the basis for William Peter Blatty's novel *The Exorcist*; a Filipina girl bitten by devils; and a rare example of a priest's letter requesting permission of a bishop to perform an exorcism--after witnessing a boy walk backward up a wall. Fifty-seven percent of Americans profess to believe in demonic possession; after reading this book, you may too. For more than seventy-five years, Penguin has been the leading publisher of classic literature in the English-speaking world. With more than 2,000 titles, Penguin Classics represents a global bookshelf of the best works throughout history and across genres and disciplines. Readers trust the series to provide authoritative texts enhanced by introductions and notes by distinguished scholars and contemporary authors, as well as up-to-date translations by award-

winning translators.

The Imperial Body, 2015 Through 'The Imperial Body', Fiona Amundsen investigates the ways in which Yasukuni Shrine produces and politicises historical practices of remembrance. No longer functioning as a keeper of memory to be passively consumed by the public, this shrine has come to be remade as a combination of people's past and present. Analysed as a text, as a body, both cultural and personal, it offers a view of the end of World War II as literally woven into the fabric of the Japanese landscape.--P.4.
