Happiness 6 Shuzo Oshimi, 2017-12-19 A supernatural story of sexual awakening, growing up, and suburban vampirism, Happiness follows a dorky boy who is attacked by a girl in an alley. She sucks his blood and gives him a choice: life or death. He chooses life, but finds himself nearly overwhelmed by a new thirst and a fascination with the necks of his classmates... Praise for Flowers of Evil: A shockingly readable story that vividly--one might even say queasily--evokes the fear and confusion of discovering one's own sexuality. Recommended. -The Manga Critic A page-turning tale of sordid middle school blackmail. -Otaku USA Magazine By loving this manga I recognize what a sick and twisted individual I have become. While I can still say that I am not truly deviant, Flowers of Evil is a great reminder of my own thirst for power and my own personal corruption. -Otaku Champloo

Special Relativity and Motions Faster than Light Moses

Fayngold, 2008-09-08 While the theory of special relativity is often associated with the idea of traveling faster than light, this book shows that in all these cases subtle forces of nature conspire to prevent these motions being harnessed to send signals faster than the speed of light. The author tackles these topics both conceptually, with minimal or no mathematics, and quantitatively, making use of numerous illustrations to clarify the discussion. The result is a joy to read for both scientists familiar with the subject and laypeople wishing to understand something of special relativity.

Hidden Danger in the Classroom Pearl Evans, 1990-01-01 From ideas of psychologist William Coulson, Ph.D., Ed.D., former educator Pearl Evans offers hope for public education. (Coulson was on Today Show in 1990.) Coulson understands education's problem because he helped Carl Rogers & Abraham Maslow introduce psychotherapy into the classroom. At first enthusiastic, later reluctant, finally with clear vision, Coulson now warns about harm caused by education's focal shift from objective to subjective. Although historically education has swings in style & method, classroom psychotherapy breaks the mold altogether. This radical change to probing children's inner life derails education from its task of imparting knowledge & skills. Education thus sacrifices intellect for emotion in order to pursue moral issues in a decision making, feeling-centered framework. It applies humanism's amorality to life & death topics like sex, drugs, death, dying,

depression, suicide, stress, conflict resolution. Descriptive titles include values, value-free, affective, nondirective, problem-solving, self-esteem. Some programs are commercial, like Quest Project Charlie; DARE. Others are locally designed. Nevertheless, all share a psychotherapeutic approach. Chapters: What is this education that harms? The failed test of experience. The failed test of research. If this doesn't work, who pushes it? Why does this education cause harm? What education works? Timeless principles for good education.

The Hidden Light of Objects Mai Al-Nakib, 2014-06-05 For fans of Alice Munro and Lorrie Moore. A young girl, renamed Amerika in honour of the US role in the liberation of Kuwait, finds her name has become a barometer of her country's growing hostility towards the West. A middle-aged man dying from cancer looks back on his extramarital affairs and the abiding forgiveness of his wife. The headlines tell of war, unrest and religious clashes. But if you look beyond them you will see life in the Middle East as it is really lived – adolescent love, the fragility of marriage, pain of the most quotidian kind. Mai Al-Nakib's luminous stories unveil the lives of ordinary people – and the power of objects to hold extraordinary memories.

Mathematical Models of Fluid Dynamics Rainer

Ansorge, 2006-03-06 This introduction to the field contains a careful selection of topics and examples without sacrificing scientific strictness. The author guides readers through mathematical modelling, the theoretical treatment of the underlying physical laws and the construction and effective use of numerical procedures to describe the behaviour of the dynamics of physical flow. Both students and experts intending to control or predict the behavior of fluid flows by theoretical and computational fluid dynamics will benefit from the combination of all relevant aspects in one handy volume. The book consists of three main parts: - The design of mathematical models of physical fluid flow; - A theoretical treatment of the equations representing the model, as Navier-Stokes, Euler, and boundary layer equations, models of turbulence, in order to gain qualitative as well as quantitative insights into the processes of flow events; - The construction and effective use of numerical procedures in order to find quantitative descriptions of concrete physical or technical fluid flow situations. This is the first text of its kind to merge all these subjects so thoroughly.

Midnight Blue-Light Special Seanan McGuire, 2013-03-05 The second book in New York Times-bestselling Seanan McGuire's witty urban fantasy InCryptid series about a family of cryptozoologists who act as a buffer between humans and the magical creatures living in secret around us. The only thing more fun than an October Daye book is an InCryptid book. —Charlaine Harris, #1 New York Times-bestselling author of Sookie Stackhouse series Normal, adjective: Conforming to the standard or common type. See also ordinary. Abnormal, adjective: Deviating from the common type, such as playing monster-human on the rooftops of Manhattan. See also Verity Price. The Price family has spent generations studying the monsters of the world, working to protect them from humanity—and to protect humanity from them. Verity Price is just trying to do her job, keeping the native cryptid population of Manhattan from getting into trouble, and doing a little ballroom dancing on the side. Enter Dominic De Luca, an operative for the Covenant of St. George, and Verity's on-again, off-again boyfriend. When he tells her that the Covenant is sending a full team to assess how ready the city is for a purge, Verity finds herself between a rock and a hard place. Stay, and risk her almost-certain death, or flee, and leave the cryptids of New York with nothing between them and the Covenant. With allies and enemies on every side, and no safe way to turn, it's going to take some quickstepping for Verity to waltz out of this one. There's just

one question on everyone's mind: Is this the last dance for Verity Price?

1636: The Devil's Opera Eric Flint, David Carrico, 2013-09-16 A new addition to the multiple New York Times best-selling Ring of Fire series. After carving a place for itself in war-torn 17th century Europe, citizens of the modern town of Grantville, West Virginia take on a murderous conspiracy of operatic proportions in Magdeburg, the capital of the United States of Europe. New York Times Best Selling Series Eric Flint and David Carrico serve up the latest entry in the best-selling alternate history saga of them all, the Ring of Fire! It is the year 1636. The United States of Europe, the new nation formed by an alliance between the Swedish king Gustavus Adolphus and the West Virginians hurled back in time by a cosmic accident, is on the verge of civil war. His brain injured in the war with Poland, the USE's emperor Gustavus Adolphus is no longer in command. Enter Swedish chancellor Oxenstierna, a leader of aristocratic reaction against democracy. His goal: to assemble the forces of the hidebound ruling class in Berlin and drown the revolution in a bloodbath. In Magdeburg, the capital of the USE, Mike Stearns' wife Rebecca Abrabanel is organizing popular resistance to Oxenstierna's plot. As part of the resistance, the American musician Marla Linder and her company of down-time musical partners are staging an opera that will celebrate the struggle against oppression. Princess Kristina, the heir to the USE's throne, is now residing in Magdeburg and is giving them her support and encouragement. But another plot is underway--this one right in the heart of the capital itself, and with murder as its method. The only people standing in the way are a crippled boy and the boxing champion who befriended him, and an unlikely pair of policemen. Can the American detective Byron Chieske and his down-

timer partner Gotthilf Hoch thwart the killers before they succeed in their goal?
