Babel Chaim Burston, Dov Naiditch, 2016-08 Where do children play tower games with tower pieces, wear tower hats and eat tower cakes? In the city of Babel, of course! There, the people are building a tower that will reach up to the heavens. The tower is the most important thing in the world to them. But what will happen when they realize that a tower is just tower? In this contemporary retelling of the biblical Tower of Babel story, the people of Babel are presented through the lens of a very relatable family and their neighborhood. Illustrated with a fantastic attention to detail, each corner of the city and tower are filled with new discoveries that will delight every reader.

Strengthening Forensic Science in the United States National Research Council, Division on Engineering and Physical Sciences, Committee on Applied and Theoretical Statistics, Policy and Global Affairs, Committee on Science, Technology, and Law, Committee on Identifying the Needs of the Forensic Sciences Community, 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. *Strengthening Forensic Science in the United States: A Path Forward* provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. *Strengthening Forensic Science in the United States* gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

This Book Is a Camera Kelli Anderson, 2015-11-20 This is a working camera that pops up from the pages of a book. The book includes: - a piece of paper folded into a working 4x5 camera - a lightproof bag - 5 sheets of photo-paper film - development instructions (from complete DIY to outsource it) - a foil-stamped cover - a satisfying demonstration of the connection between design & science / structures & functions

Confessions of a Recovering Environmentalist and Other Essays Paul Kingsnorth, 2017-08-01 A provocative and urgent essay collection that asks how we can live with hope in "an age of ecocide" Paul Kingsnorth was once an activist—an ardent environmentalist. He fought against rampant development and the depredations of a corporate world that seemed hell-bent on ignoring a looming climate crisis in its relentless pursuit of profit. But as the environmental movement began to focus on "sustainability" rather than the defense of wild places for their own sake and as global conditions worsened, he grew disenchanted with the movement that he once embraced. He gave up what he saw as the false hope that residents of the First World would ever make the kind of sacrifices that might avert the severe consequences of climate change. Full of grief and fury as well

as passionate, lyrical evocations of nature and the wild, *Confessions of a Recovering Environmentalist* gathers the wave-making essays that have charted the change in Kingsnorth's thinking. In them he articulates a new vision that he calls "dark ecology," which stands firmly in opposition to the belief that technology can save us, and he argues for a renewed balance between the human and nonhuman worlds. This iconoclastic, fearless, and ultimately hopeful book, which includes the much-discussed "Uncivilization" manifesto, asks hard questions about how we've lived and how we should live.

A Stolen Life Jaycee Dugard, 2011-07-12 A raw and powerful memoir of Jaycee Lee Dugard's own story of being kidnapped as an 11-year-old and held captive for over 18 years On 10 June 1991, eleven-year-old Jaycee Dugard was abducted from a school bus stop within sight of her home in Tahoe, California. It was the last her family and friends saw of her for over eighteen years. On 26 August 2009, Dugard, her daughters, and Phillip Craig Garrido appeared in the office of her kidnapper's parole officer in California. Their unusual behaviour sparked an investigation that led to the positive identification of Jaycee Lee Dugard, living in a tent behind Garrido's home. During her time in captivity, at the age of fourteen and seventeen, she gave birth to two daughters, both fathered by Garrido. Dugard's memoir is written by the 30-year-old herself and covers the period from the time of her abduction in 1991 up until the present. In her stark, utterly honest and unflinching narrative, Jaycee opens up about what she experienced, including how she feels now, a year after being found. Garrido and his wife Nancy have since pleaded guilty to their crimes.

The Craft of Research, 2nd edition Wayne C. Booth, Gregory G. Colomb, Joseph M. Williams, 2008-04-15 Since 1995, more than 150,000 students and researchers have turned to *The Craft of Research* for clear and helpful guidance on how to conduct research and report it effectively. Now, master teachers Wayne C. Booth, Gregory G. Colomb, and Joseph M. Williams present a completely revised and updated version of their classic handbook. Like its predecessor, this new edition reflects the way researchers actually work: in a complex circuit of thinking, writing, revising, and rethinking. It shows how each part of this process influences the others and how a successful research report is an orchestrated conversation between a researcher and a reader. Along with many other topics, *The Craft of Research* explains how to build an argument that motivates readers to accept a claim; how to anticipate the reservations of thoughtful yet critical readers and to respond to them appropriately; and how to create introductions and conclusions that answer that most demanding question, So what? Celebrated by reviewers for its logic and clarity, this popular book retains its five-part structure. Part 1 provides an orientation to the research process and begins the discussion of what motivates researchers and their readers. Part 2 focuses on finding a topic, planning the project, and locating appropriate sources. This section is brought up to date with new information on the role of the Internet in research, including how to find and evaluate sources, avoid their misuse, and test their reliability. Part 3 explains the art of making an argument and supporting it. The authors have extensively revised this section to present the structure of an argument in clearer and more accessible terms than in the first edition. New distinctions are made among reasons, evidence, and reports of evidence. The concepts of qualifications and rebuttals are recast as acknowledgment and response. Part 4 covers drafting and revising, and offers new information on the visual representation of data. Part 5 concludes the book with an updated discussion of the ethics of research, as well as an expanded bibliography that includes many electronic sources. The new edition retains the accessibility, insights, and directness that have made *The Craft of Research* an indispensable guide for anyone doing research, from students in high school through advanced graduate study to businesspeople and government employees. The authors demonstrate convincingly that researching and reporting skills can be learned and used by all who undertake research projects. New to this edition: Extensive coverage of how to do research on the internet, including how to evaluate and test the reliability of sources New information on the visual representation of data Expanded bibliography with many electronic sources
