The Emperor of All Maladies Siddhartha Mukherjee, 2011-08-09 This edition includes a new interview with the author--P. [4] of cover.

The View from Penthouse B Elinor Lipman, 2013 Two newly-single sisters, one by a divorce, the other by a death, become roommates with a handsome, gay cupcake-baker as they try to return to the dating world of lower Manhattan in this novel from the author of *The Inn at Lake Devine*.

Pirate Cinema Cory Doctorow, 2012-10-02 From the New York Times bestselling author of *Little Brother*, Cory Doctorow, comes *Pirate Cinema*, a new tale of a brilliant hacker runaway who finds himself standing up to tyranny. Trent McCauley is sixteen, brilliant, and obsessed with one thing: making movies on his computer by reassembling footage from popular films he downloads from the net. In the dystopian near-future Britain where Trent is growing up, this is more illegal than ever; the punishment for being caught three times is that your entire household's access to the internet is cut off for a year, with no appeal. Trent's too clever for that too happen. Except it does, and it nearly destroys his family. Shamed and shattered, Trent runs away to London, where he slowly learns the ways of staying alive on the streets. This brings him in touch with a demimonde of artists and activists who are trying to fight a new bill that will criminalize even more harmless internet creativity, making felons of millions of British citizens at a stroke. Things look bad. Parliament is in power of a few wealthy media conglomerates. But the powers-that-be haven't entirely reckoned with the power of a gripping movie to change people's minds.... At the Publisher's request, this title is being sold without Digital Rights Management Software (DRM) applied.

The Annotated Mona Lisa Carol Strickland, John Boswell, 2007-10 Like music,

art is a universal language. Although looking at works of art is a pleasurable enough experience, to appreciate them fully requires certain skills and knowledge. --Carol Strickland, from the introduction to *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* * This heavily illustrated crash course in art history is revised and updated. This second edition of Carol Strickland's *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* offers an illustrated tutorial of prehistoric to post-modern art from cave paintings to video art installations to digital and Internet media. * Featuring succinct page-length essays, instructive sidebars, and more than 300 photographs, *The Annotated Mona Lisa: A Crash Course in Art History from Prehistoric to Post-Modern* takes art history out of the realm of dreary textbooks, demystifies jargon and theory, and makes art accessible—even at a cursory reading. * From Stonehenge to the Guggenheim and from Holbein to Warhol, more than 25,000 years of art is distilled into five sections covering a little more than 200 pages.

Cuisine and Culture Linda Civitello, 2011-03-29 An illuminating account of how history shapes our diets—now in a new revised and updated Third Edition Why did the ancient Romans believe cinnamon grew in swamps guarded by giant killer bats? How did African cultures imported by slavery influence cooking in the American South? What does the 700-seat McDonald's in Beijing serve in the age of globalization? With the answers to these and many more such questions, *Cuisine and Culture*, Third Edition presents an engaging, entertaining, and informative exploration of the interactions among history, culture, and food. From prehistory and the earliest societies in the Fertile Crescent to today's celebrity chefs, *Cuisine and Culture*, Third Edition

presents a multicultural and multiethnic approach to understanding how and why major historical events have affected and defined the culinary traditions in different societies. Now revised and updated, this Third Edition is more comprehensive and insightful than ever before. Covers prehistory through the present day—from the discovery of fire to the emergence of television cooking shows Explores how history, culture, politics, sociology, and religion have determined how and what people have eaten through the ages Includes a sampling of recipes and menus from different historical periods and cultures Features French and Italian pronunciation guides, a chronology of food books and cookbooks of historical importance, and an extensive bibliography Includes all-new content on technology, food marketing, celebrity chefs and cooking television shows, and Canadian cuisine. Complete with revealing historical photographs and illustrations, Cuisine and Culture is an essential introduction to food history for students, history buffs, and food lovers.

Handbook of Medical Hallucinogens Charles S. Grob, Jim Grigsby, 2023-01-13
This handbook reviews promising applications of psychedelics in treatment of such challenging psychiatric problems as posttraumatic stress disorder, major depression, substance use disorders, and end-of-life anxiety. Experts from multiple disciplines synthesize current knowledge on psilocybin, MDMA, ketamine, and other medical hallucinogens. The volume comprehensively examines these substances' neurobiological mechanisms, clinical effects, therapeutic potential, risks, and anthropological and historical contexts. Coverage ranges from basic science to practical clinical considerations, including patient screening and selection, dosages and routes of administration, how psychedelic-assisted sessions are structured and conducted, and management of adverse reactions.

Tatsinda Elizabeth Enright,1991 When a giant invades the peaceful kingdom of the Tatrajanni and takes the different-looking girl prisoner, it takes the combined efforts of the wise woman of the mountain, the Prince, and the girl herself to rid the kingdom of the intruder.

A Thesaurus of English Word Roots Horace Gerald Danner,2014-03-27 Horace G. Danner's A Thesaurus of English Word Roots is a compendium of the most-used word roots of the English language. As Timothy B. Noone notes in his foreword: "Dr. Danner's book allows you not only to build up your passive English vocabulary, resulting in word recognition knowledge, but also gives you the rudiments for developing your active English vocabulary, making it possible to infer the meaning of words with which you are not yet acquainted. Your knowledge can now expand and will do so exponentially as your awareness of the roots in English words and your corresponding ability to decode unfamiliar words grows apace. This is the beginning of a fine mental linguistic library: so enjoy!" In A Thesaurus of English Word Roots, all word roots are listed alphabetically, along with the Greek or Latin words from which they derive, together with the roots' original meanings. If the current meaning of an individual root differs from the original meaning, that is listed in a separate column. In the examples column, the words which contain the root are then listed, starting with their prefixes, for example, dysacousia, hyperacousia. These root-starting terms then are followed by terms where the root falls behind the word, e.g., acouesthesia and acoumeter. These words are followed by words where the root falls in the middle or the end, as in such terms as bradyacusia and odyacusis.. In this manner, A Thesaurus of English Word Roots places the word in as many word families as there are elements in the word. This work will interest linguists and

philologists and anyone interested in the etymological aspects of English language.

Kabbalah, Magic, and the Great Work of Self-transformation Lyam Thomas Christopher, 2006 Advancing to higher levels of ritual magic with purpose and power requires an exaltation of consciousness—a spiritual transformation that can serve as an antidote to the seeming banality of modern life. Based on Kabbalistic techniques, the teachings of the Hermetic Order of the Golden Dawn, and an Hermetic tradition spanning nearly two thousand years, this innovative new work introduces the history of the Golden Dawn and its mythology, the Tree of Life, Deities, demons, rules for practicing magic, and components of effective ritual. A comprehensive course of self-initiation using Israel Regardie's seminal Golden Dawn as a key reference point, Kabbalah, Magic and the Great Work of Self-Transformation guides you through the levels of the Golden Dawn system of ritual magic. Each grade in this system corresponds with a sphere in the Kabbalistic Tree of Life and includes daily rituals, required reading, written assignments, projects, and additional exercises. Knowledgeable and true to tradition, author Lyam Thomas Christopher presents a well-grounded and modern step-by-step program toward spiritual attainment, providing a lucid gateway toward a more awakened state. Finalist for the Coalition of Visionary Resources Award for Best Magick/Shamanism Book

Deep Space Propulsion K. F. Long, 2011-11-25 The technology of the next few decades could possibly allow us to explore with robotic probes the closest stars outside our Solar System, and maybe even observe some of the recently discovered planets circling these stars. This book looks at the reasons for exploring our stellar neighbors and at the technologies we are developing to

build space probes that can traverse the enormous distances between the stars. In order to reach the nearest stars, we must first develop a propulsion technology that would take our robotic probes there in a reasonable time. Such propulsion technology has radically different requirements from conventional chemical rockets, because of the enormous distances that must be crossed. Surprisingly, many propulsion schemes for interstellar travel have been suggested and await only practical engineering solutions and the political will to make them a reality. This is a result of the tremendous advances in astrophysics that have been made in recent decades and the perseverance and imagination of tenacious theoretical physicists. This book explores these different propulsion schemes - all based on current physics - and the challenges they present to physicists, engineers, and space exploration entrepreneurs. This book will be helpful to anyone who really wants to understand the principles behind and likely future course of interstellar travel and who wants to recognize the distinctions between pure fantasy (such as Star Trek's 'warp drive') and methods that are grounded in real physics and offer practical technological solutions for exploring the stars in the decades to come.

The Norton Field Guide to Writing Richard Harvey Bullock, 2013 Flexible, easy to use, just enough detail--and now the number-one best seller.

The Purpose of Power Alicia Garza, 2020-10-20 An essential guide to building transformative movements to address the challenges of our time, from one of the country's leading organizers and a co-creator of Black Lives Matter "Excellent and provocative . . . a gateway [to] urgent debates."--Keeanga-Yamahtta Taylor, *The New Yorker* NAMED ONE OF THE BEST BOOKS OF THE YEAR BY Time • Marie Claire • Kirkus Reviews In 2013, Alicia Garza wrote what she

called “a love letter to Black people” on Facebook, in the aftermath of the acquittal of the man who murdered seventeen-year-old Trayvon Martin. Garza wrote: Black people. I love you. I love us. Our lives matter. With the speed and networking capacities of social media, #BlackLivesMatter became the hashtag heard 'round the world. But Garza knew even then that hashtags don't start movements—people do. Long before #BlackLivesMatter became a rallying cry for this generation, Garza had spent the better part of two decades learning and unlearning some hard lessons about organizing. The lessons she offers are different from the “rules for radicals” that animated earlier generations of activists, and diverge from the charismatic, patriarchal model of the American civil rights movement. She reflects instead on how making room amongst the woke for those who are still awakening can inspire and activate more people to fight for the world we all deserve. This is the story of one woman's lessons through years of bringing people together to create change. Most of all, it is a new paradigm for change for a new generation of changemakers, from the mind and heart behind one of the most important movements of our time.

Weapon of Choice Charles H. Briscoe, Richard L. Kiper, James A. Schroder, 2010-01 First published in 2003, this is the first unclassified official history authored by the U.S. Army Special Operations Command relating to Operation Enduring Freedom. Contains extensive maps and illustrations. Previously difficult to obtain, this extensive study shows what Army Special Operations Forces (ARSOF) accomplished to drive the Taliban from power and to destroy al-Qaeda and Taliban strongholds as part of the global war on terrorism during Operation Enduring Freedom.

Poucher's Perfumes, Cosmetics and Soaps H. Butler, 2013-06-29 Poucher's

Perfumes Cosmetics and Soaps has been in print since 1923 and is the classic reference work in the field of cosmetics. Now in a fully updated 10th edition, this new volume provides a firm basic knowledge in the science of cosmetics (including toiletries) as well as incorporating the latest trends in scientific applications and legislation which have occurred since the 9th edition. This edition will not only be an excellent reference book for students entering the industry but also for those in specialized research companies, universities and other associated institutions who will be able to gain an overall picture of the modern cosmetic science and industry. The book has been logically ordered into four distinct parts. The historical overview of Part 1 contains an essay demonstrating William Arthur Poucher's influence on the 20th Century cosmetics industry as well as a chapter detailing the long history of cosmetics. Part 2 is a comprehensive listing of the properties and uses of common cosmetic types, ranging from Antiperspirants through to Sunscreen preparations. There are an increased number of raw materials in use today and their chemical, physical and safety benefits are carefully discussed along with formulation examples. The many additions since the last edition demonstrate the dramatic recent expansion in the industry and how changes in legal regulations affecting the development, production and marketing of old, established and new products are operative almost worldwide. Information on specialist products for babies and others is included within individual chapters. The chapters in Part 3 support and outline the current guidelines regarding the assessment and control of safety and stability. This information is presented chemically, physically and microbiologically. Part 3 chapters also detail requirements for the consumer acceptability of both existing and new products. Those legal regulations now

in force in the EU, the USA and Japan are carefully described in a separate chapter and the remaining chapters have been extensively updated to explain the technical and practical operations needed to comply with regulations when marketing. This information will be invaluable to European Union and North American companies when preparing legally required product information dossiers. The final chapters in Part 4 contain useful information on the psychology of perfumery as well as detailing methods for the conduct of assessment trials of new products. As ingredient labelling is now an almost universal legal requirement the International Nomenclature of Cosmetics Ingredients (INCI) for raw materials has been used wherever practicable. The advertised volume is the 10th edition of what was previously known as volume 3 of Poucher's Cosmetics and Soaps. Due to changes in the industry there are no plans to bring out new editions of volume 1 and 2.

Foods of Association Nina Lilian Etkin, 2009 ÒWe should look for someone to eat and drink with before looking for something to eat and drink.Ó ÑEpicurus This fascinating book examines the biology and culture of foods and beverages that are consumed in communal settings, with special attention to their health implications. Nina Etkin covers a wealth of topics, exploring human evolutionary history, the Slow Food movement, ritual and ceremonial foods, caffeinated beverages, spices, the street foods of Hawaii and northern Nigeria, and even bottled water. Her work is framed by a biocultural perspective that considers both the physiological implications of consumption and the cultural construction and circulation of foods. For Etkin, the foods and beverages we consume are simultaneously Òbiodynamic substances and cultural objects.Ó The book begins with a look at the social eating habits of our primate relatives and discusses our evolutionary adaptations. It then

offers a history of social foods in the era of European expansion, with a focus on spices and ôcaffeinated cordials.ô (Of course, there were some powerful physiological consequences of eating foods brought home by returning explorers, and those are considered tooÑalong with consequences for native peoples.) From there, the book describes ôstreet food,ô which is always served in communal settings. Etkin then scrutinizes ceremonial foods and beverages, and considers their pharmacological effects as well. Her extensive examination concludes by assessing the biological and cultural implications of bottled water. While intended primarily for scholars, this enticing book serves up a tantalizing smorgasbord of food for thought.

Plate Tectonics, Volcanoes, and Earthquakes John P. Rafferty Associate Editor, Earth Sciences, 2010-08-15 Presents an introduction to volcanoes and earthquakes, explaining how the movement of the Earth's interior plates cause their formation and describing the volcanoes which currently exist around the world as well as some of the famous earthquakes of the nineteenth through twenty-first centuries.

Monster Manual Two Ed Bonny, Jeff Grubb, Rich Redman, Skip Williams, Steve Winter, 2002 This indispensable supplement contains information on nearly 200 new monsters for any D&D game. It provides descriptions for a vast array of new creatures, with an emphasis on higher-level creatures to provide experienced gamers with tougher foes to overcome. (Gamebooks)

The Spirit of Ancient Egypt Ana Ruiz, 2001 This work is filled with a mosaic of details and charming tales, and an intriguing portrait of life in the oldest of civilizations.

Aberrant White Wolf Games Studio, 1999-07 Gods once wielded this kind of power. Now it's ours. The forces of the universe respond to our will and we

shape a world in our image. We are the celebrities, the heroes, the villains, the legends, the shining icons of our times. We are novas, and we will bring about a new golden Age... and you will like it. Golden age -- or Hell on Earth? To the residents of the Trinity Universe, the 21st century was a monstrous era when mad gods ran rampant across the world. But is this truth -- or OpNet propaganda? What was the Age of Aberrants really like? Find out the truth. It's not what you expect. Aberrant is a core rulebook and prequel to the Trinity science-fiction game. Set in the early 21st century, before the devastating war against humanity, this new complete roleplaying game allows you to be one of these doomed beings of vast power, and to experience their struggles to avoid the coming cataclysm.

Stress R Us Greeley Miklashek, 2018-04-20 This book is a compilation of what a neuropsychiatrist learned about the causes and cures of human diseases in his 41 year medical practice. I treated 25,000 of my fellows and wrote 1,000,000 Rx in the process. The book is divided into 51 Topics (chapters) and contains over 100 references. It serves as an historical review of the field of stress research as well as animal crowding research, as the two morphed together in my theory of population density stress. Human overpopulation is a fact, as we have far exceeded the earth's carrying capacity for our species and mother nature is attempting to cull our numbers through our multitude of diseases of civilization. Our hunter-gatherer contemporaries, living in their traditional manner in their clan social groups widely distributed in their ecosystem, have none of our diseases. As our extreme gene based altruism has brought us tremendous compassion and technological advances in caring for the diseases of our fellows, it has also brought us tremendous overpopulation and brought us near to ecological

collapse. We must face our need to restrict our reproduction or mother nature will do it for us. A case in point: infertility in America has increased 100% in just 34 years, from 1982 to 2016. During the same period, our sperm counts have fallen 60%. No-one is willing to look at the obvious cause: neuro-endocrine inhibition of human reproduction resulting from population density stress. If any of this touches a nerve, please find the time in your busy, stressful day to stop for an hour and read this ground-breaking book. You may never have heard any of this information from any of your healthcare providers or the mass media. Big Pharma rules the minds of your healthcare providers and the mass media. At the end of my career as a practicing psychiatrist, I had become little more than a prescription writing machine and was actually instructed to stop wasting time talking to your patients and just write their prescriptions. So, I retired and spent the next 5 years writing this book. I hope you find it as illuminating as I did doing the research on our epidemic of stress diseases. No wonder that we are ever more anxious and depressed, in spite of taking our 4,300,000,000 Rx every year! The real cure for our diseases of civilization must be a worldwide reduction in family size and a concerted effort to increase the opportunities for women to access education and work, as well as birth control. The alternative is increasing human disease and infertility from population density stress. Please read this book and tell me if you don't agree with my surprising conclusions. Good luck and God bless us one and all!
