*Nutrient Requirements of Dogs and Cats* National Research Council, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Committee on Animal Nutrition, Subcommittee on Dog and Cat Nutrition, 2006-07-01

Updating recommendations last made by the National Research Council in the mid-1980s, this report provides nutrient recommendations based on physical activity and stage in life, major factors that influence nutrient needs. It looks at how nutrients are metabolized in the bodies of dogs and cats, indications of nutrient deficiency, and diseases related to poor nutrition. The report provides a valuable resource for industry professionals formulating diets, scientists setting research agendas, government officials developing regulations for pet food labeling, and as a university textbook for dog and cat nutrition. It can also guide pet

owners feeding decisions for their pets with information on specific nutrient needs, characteristics of different types of pet foods, and factors to consider when feeding cats and dogs.

**After You Get Your Puppy** Ian Dunbar, 2001 Now you have your puppy, the clock is ticking and you need to meet three more Developmental Deadlines before your puppy is five months old.

4th Developmental Deadline - Socializing Your Puppy to People Your Most Urgent Priority is to socialize your puppy to a wide variety of people, especially children, men, and strangers, before he is twelve weeks old. Well-socialized puppies grow up to be wonderful companions, whereas antisocial dogs are difficult, time-consuming, and potentially dangerous. As a rule of thumb, your puppy needs to meet at least one hundred people before he is three months old. Since your puppy is still too young to venture out to dog parks and sidewalks, you'll need to start inviting people to your home right away.

5th Developmental Deadline - Teaching Bite Inhibition Your Most Important Priority is that your puppy learns to inhibit the force of his bites and develop a soft mouth; before he is eighteen weeks old. Whenever a dog bites a person, or fights with another dog, the single most important prognostic factor is the degree of bite inhibition and hence, the likelihood and seriousness of injury.

Accidents happen. Someone may tread on the dog's paw, or a child may trip over the dog while he's gnawing a bone. A dog may snap and lunge at a person when hurt or frightened, but if the dog has well-established bite inhibition, it is unlikely the dog's teeth will puncture, or even touch the skin.

6th Developmental Deadline - Continuing Socialization in The World at Large

The Most Enjoyable Priority of dog ownership is to introduce your well-socialized puppy to the world at large. Your dog will only remain sociable and confident if he continues to meet and greet at least three unfamiliar people and three unfamiliar dogs every day. Meeting the same people and dogs over and over is not sufficient. Your dog needs to practice meeting, greeting, and getting along with strangers, not simply getting along with old friends. Regular walks with your dog are as essential as they are enjoyable.

### **How Stella Learned to Talk Christina Hunger, 2021-05-04**

INSTANT NEW YORK TIMES BESTSELLER An incredible, revolutionary true story and surprisingly simple guide to teaching your dog to talk from speech-language pathologist Christina Hunger, who has taught her dog, Stella, to communicate using simple paw-sized buttons associated with different words. When speech-language pathologist Christina Hunger first came home with her puppy, Stella, it didn't take long for her to start drawing connections between her job and her new pet. During the day, she worked with toddlers with significant delays in language development and used Augmentative and Alternative Communication (AAC) devices to help them communicate. At night, she wondered: If dogs can understand words we say to them, shouldn't they be able to say words to us? Can dogs use AAC to communicate with humans? Christina decided to put her theory to the test with Stella and started using a paw-sized button programmed with her voice to say the word "outside" when clicked, whenever she took Stella out of the house. A few years later, Stella now has a bank of more than thirty word buttons, and uses them daily either individually or together to create near-

complete sentences. *How Stella Learned to Talk* is part memoir and part how-to guide. It chronicles the journey Christina and Stella have taken together, from the day they met, to the day Stella “spoke” her first word, and the other breakthroughs they’ve had since. It also reveals the techniques Christina used to teach Stella, broken down into simple stages and actionable steps any dog owner can use to start communicating with their pets. Filled with conversations that Stella and Christina have had, as well as the attention to developmental detail that only a speech-language pathologist could know, *How Stella Learned to Talk* will be the indispensable dog book for the new decade.
