The High-Velocity Edge: How Market Leaders Leverage Operational Excellence to Beat the Competition Steven J. Spear, 2010-05-07 Generate Better, Faster Results—Using Less Capital and Fewer Resources! “[The High-Velocity Edge] contains ideas that form the basis for structured continuous learning and improvement in every aspect of our lives. While this book is tailored to business leaders, it should be read by high school seniors, college students, and those already in the workforce. With the broad societal application of these ideas, we can achieve levels of accomplishment not even imagined by most people.” The Honorable Paul H. O’Neill, former CEO and Chairman, Alcoa, and Former Secretary of the Treasury “Some firms outperform competitors in many ways at once—cost, speed, innovation, service. How? Steve Spear opened my eyes to the secret of systemizing innovation: taking it from the occasional, unpredictable ‘stroke of genius’ to something you and your people do month-in, month-out to outdistance rivals.” Scott D. Cook, founder and Chairman of the Executive Committee, Intuit, Inc. “Steven Spear connects a deep study of systems with practical management insights and does it better than any organizational scholar I know. [This] is a profoundly important book that will challenge and inspire executives in all industries to think more clearly about the technical and social foundations of organizational excellence.” Donald M. Berwick, M.D., M.P.P., President and CEO, Institute for Healthcare Improvement About the Book How can some companies perform so well that their industry counterparts are competitors in name only? Although they operate in the same industry, serve the same market, and even use the same suppliers, these extraordinary, high-velocity organizations consistently outperform all the competition—and, more importantly, continually widen their leads. In *The High-Velocity Edge*, the reissued edition of five-time Shingo Prize winner Steven J. Spear’s critically acclaimed book *Chasing the Rabbit*, Spear describes what sets market-dominating companies apart and provides a detailed framework you can leverage to surge to the lead in your own industry. Spear examines the internal operations of dominant organizations across a wide spectrum of industries, from technology to design and from manufacturing to health care. While he investigates several great operational triumphs, like top-tier teaching hospitals’ fantastic improvements in quality of care, Pratt & Whitney’s competitive gains in jet engine design, and the U.S. Navy’s breakthroughs in inventing and applying nuclear propulsion, *The High-Velocity Edge* is not just about the adoration of success. It also takes a critical look at some of the operational missteps that have humbled even the most reputable and respected of companies and organizations. The decades-long prominence of Toyota, for example, is contrasted with the many factors leading to the automaker’s sweeping 2010 product recalls. Taken together, these multiple perspectives and in-depth case studies show how to: Build a system of “dynamic discovery” designed to reveal operational problems and weaknesses as they arise Attack and solve problems when and where they occur, converting weaknesses into strengths Disseminate knowledge gained from solving local problems throughout the company as a whole Create managers invested in developing everyone’s capacity to continually innovate and improve Whatever kind of company you operate—from technology to finance to healthcare—mastery of these four key capabilities will put you on the fast track to operational excellence, where you will generate faster, better results—using less capital and fewer resources. Apply the lessons of Steven J. Spear and gain a high-velocity edge over every competitor in your industry.

Globalization or Regionalization of the American and Asian Car Industry? M. Freyssenet, K. Shimizu, G. Volpato, 2003-01-01 The automobile sector is one of the most archetypal global industries and is seen by many as one of the main drivers behind the homogenisation of world markets due to firms' internationalization strategies and the social practices that firms impose. This book argues that this is not entirely the case due to the heterogeneity of firms and the diversity of strategies pursued. It highlights the diversity and forms of internationalization and the preference for regionalization rather than globalization that has occurred over the past decade. This book looks specifically at the American and Asian car industry.

Radar Instruction Manual United States. Maritime Administration,United States Marine Corps,2005 Since 1958 the Maritime Administration has continuously conducted instructions in use of collision avoidance radar for qualified U.S. seafaring personnel and representatives of interested Federal and State Agencies.Beginning in 1963, to facilitate the expansion of training capabilities and at the same time to provide the most modern techniques in training methods, radar simulators were installed in Maritime Administration's three region schools.It soon became apparent that to properly instruct the trainees, even with the advanced equipment, a standardize up-to-date instruction manual was needed. The first manual was later revised to serve both as a classroom textbook and as an onboard reference handbook.This newly updated manual, the fourth revision, in keeping with Maritime Administration policy, has been restructured to include improved and more effective methods of plotting techniques for use in Ocean, Great Lakes, Coastwise and Inland Waters navigation.Robert J. Hitotsubashi on Knowledge Management Hirotaka Takeuchi,Ikujiro Nonaka,2004-02-09 Knowledge Management (KM) is the art and science of utilizing knowledge as the most important resource towards gaining competitive advantage in today's business environment. Despite the huge and growing interest in KM, there has been no serious attempt to bridge theory and practice, the practices of East and West, the soft side (organizational capabilities) with the hard side (information technology), or the practices of large companies with start-ups. Until now. Written by the Dean of Hitotsubashi Business School in Tokyo, the world's leading centre of KM, and featuring contributions from thought leaders around the world, this book will provide a synthesis towards the emerging field of KM. It brings together the latest trends in the field and re-ignites the debate on the future form of knowledge management.

The Watery Maze Bernard Fergusson,1961 During Britain's darkest hour, in 1940, extraordinary measures were necessary for survival. This bleak period of defense against the Axis led to the formation of Combined Operations, a semi-independent unit composed of admirals, generals, and air marshals. It became Britain's offensive team which, in the end, was instrumental in the successful invasions of North Africa, Sicily, and Normandy. Here is the complete story of the creation of that unit, beginning with a series of daring raids on the coasts of Norway, France, Africa, and Madagascar. These raids often resulted in great loss of life, but the lessons they taught the command led to dramatic successes. Combined Operations grew up with the war and played a part in the ultimate Allied victory in Europe and also in the Suez campain of 1956--Taken from the book jacket flap.
