Test Of Gas Masks And Respirators For Protection From Locomotive Smoke In Railroad Tunnels With Analysies Of Tunnel Atmospheres Arno Carl Fieldner,Sidney H Katz,Selwyne Perez Kinney,2023-07-18 The development of gas masks and respirators has been a key priority for safety engineers since the early 20th century. In this fascinating and informative book, Arno Carl Fieldner, Selwyne Perez Kinney, and Sidney H. Katz cover the science behind gas mask testing, with a particular focus on the challenges posed by locomotive smoke in rail tunnels. A must-read for anyone interested in the science of respiratory protection. **The World of WearableArt** Martin De Ruyter,2009 One of the most interesting cultural phenomena in New Zealand over the past 20 years has been the spectacular success of the World of WearableArt. This annual competition and award show that explores the intersection between fashion and art, through a genre popularly known as wearable art. This unique event, which draws an audience in Wellington of around 35,000 people, has encouraged an explosion of creative activity, inspiring a wide range of fashion designers, artists, costume makers and other craft artists from all over the world to participate. The garments are constructed from an extraordinary array of materials - car parts, wood shavings, zips, silk, potato chip packets, seaweed, slices of toast, old telephone parts, paper clips, corrugated iron, gloves, feathers - the list is endless. THE WORLD OF WEARABLEART is the second edition of this truly original visual design sourcebook. Completely revised with all new photographs, it features the best garments that have been entered over recent years in a remarkable celebration of the diversity and creativity of wearable art.

*Achtung-Panzer!* Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**How Writing Came About** Denise Schmandt-Besserat,2010-01-01 An “utterly lucid, thoughtfully illustrated, and thoroughly convincing” book on the origins of the world’s oldest known system of writing (American Journal of Archaeology). One of American Scientist's Top 100 Books on Science, 2001 In 1992, the University of Texas Press published *Before Writing*, Volume I: From Counting to Cuneiform and *Before Writing*, Volume II: A Catalog of Near Eastern Tokens. In these two volumes, Denise Schmandt-Besserat set forth her groundbreaking theory that the cuneiform script invented in the Near East in the late fourth millennium B.C.—the world's oldest known system of writing—derived from an archaic counting device. *How Writing Came About* draws material from both volumes of this scholarly work to present Schmandt-Besserat’s theory in an abridged version for a wide public and classroom audience. Based on the analysis and interpretation of a selection of 8,000 tokens or counters from 116 sites in Iran, Iraq, the Levant, and Turkey, it documents the immediate precursor of the cuneiform script./DIV

One Place after Another Miwon Kwon,2004-02-27 A critical history of site-specific art since the late 1960s. Site-specific art emerged in the late 1960s in reaction to the growing commodification of art and the prevailing ideals of art's autonomy and universality. Throughout the 1970s and 1980s, as site-specific art intersected with land art, process art, performance art, conceptual art, installation art, institutional critique, community-based art, and public art, its creators insisted on the inseparability of the work and its context. In recent years, however, the presumption of unrepeatability and immobility encapsulated in Richard Serra's famous dictum to remove the work is to destroy the work is being challenged by new models of site specificity and changes in institutional and market forces. *One Place after Another* offers a critical history of site-specific art since the late 1960s and a theoretical framework for examining the rhetoric of aesthetic vanguardism and political progressivism associated with its many permutations. Informed by urban theory, postmodernist criticism in art and architecture, and debates concerning identity politics and the public sphere, the book addresses the siting of art as more than an artistic problem. It examines site specificity as a complex cipher of the unstable relationship between location and identity in the era of late capitalism. The book addresses the work of, among others, John Ahearn, Mark Dion, Andrea Fraser, Donald Judd, Renee Green, Suzanne Lacy, Inigo Manglano-Ovalle, Richard Serra, Mierle Laderman Ukeles, and Fred Wilson.

**Apollo's Angels** Jennifer Homans,2013-01-03 *Apollo's Angels* is a major new history of classical ballet. It begins in the courts of Europe, where ballet was an aspect of aristocratic etiquette and a political event as much as it was an art. The story takes the reader from the sixteenth century through to our own time, from Italy and France to Britain, Denmark, Russia and contemporary America. The reader learns how ballet reflected political and cultural upheavals, how dance and dancers were influenced by the Renaissance and French Classicism, by Revolution and Romanticism, by Expressionism and Bolshevism, Modernism and the Cold War. Homans shows how and why 'the steps' were never just the steps: they were a set of beliefs and a way of life. She takes the reader into the lives of dancers and traces the formal evolution of technique, choreography and performance. Her book ends by looking at the contemporary crisis in ballet now that 'the masters are dead and gone' and offers a passionate plea for the centrality of classical dance in our civilization. *Apollo's Angels* is a book with broad popular appeal: beautifully written and illustrated, it is essential reading for anyone interested in history, culture and art.

**The Palaeolithic Origins of Human Burial** Paul Pettitt,2013-08-21 Humans are unique in that they expend considerable effort and ingenuity in disposing of the dead. Some of the recognisable ways we do this are visible in the Palaeolithic archaeology of the Ice Age. *The Palaeolithic Origins of Human Burial* takes a novel approach to the long-term development of human mortuary activity – the various ways we deal with the dead and with dead bodies. It is the first comprehensive survey of Palaeolithic mortuary activity in the English language. Observations in the modern world as to how chimpanzees behave towards their dead allow us to identify ‘core’ areas of behaviour towards the dead that probably have very deep evolutionary antiquity. From that point, the palaeontological and archaeological records of the Pliocene and Pleistocene are surveyed. The core chapters of the book survey the mortuary activities of early hominins, archaic members of the genus *Homo*, early *Homo sapiens*, the Neanderthals, the Early and Mid Upper Palaeolithic, and the Late Upper Palaeolithic world. Burial is a striking component of Palaeolithic mortuary activity, although existing examples are odd and this probably does not reflect what modern societies believe burial to be, and modern ways of thinking of the dead probably arose only at the very end of the Pleistocene. When did symbolic aspects of mortuary ritual evolve? When did the dead themselves become symbols? In discussing such questions, The

Palaeolithic Origins of Human Burial offers an engaging contribution to the debate on modern human origins. It is illustrated throughout, includes up-to-date examples from the Lower to Late Upper Palaeolithic, including information hitherto unpublished.

**The Broken God** David Zindell,2017-09-14 Book One of David Zindell's epic trilogy set in Neverness, legendary City of Light, where inner space and outer space meet ... where the god program is up and running.Into its maze of color-coded streets of ice a wild boy stumbles, starving, frostbitten and grieving, a spear in his hand: Danlo the Wild, a messenger from the deep past of man. Brought up from Neverness by the Alaloi people, Neanderthal cave-dwellers, Danlo alone of his tribe has survived a plague -- because he is not, as he thought, a misshaped Neanderthal, but human with immunity engineered into his genes. He learns that the disease was created by the sinister Architects of the Universal Cybernetic Church. The Architects possess a cure which can save other Alaloi tribes. But the Architects have migrated to the region of space known as the Vild, and there they are killing stars.All of civilization has converged on Neverness through the manifold of space travel. Beyond science, beyond decadence, sects and disciplines multiply there. Danlo, his mind shaped by the primitive man, brings to Neverness a single long-lost memory that will change them all.
