**The Emperor of All Maladies** Siddhartha Mukherjee,2011-08-09 Winner of the Pulitzer Prize and a documentary from Ken Burns on PBS, this New York Times bestseller is “an extraordinary achievement” (The New Yorker)—a magnificent, profoundly humane “biography” of cancer—from its first documented appearances thousands of years ago through the epic battles in the twentieth century to cure, control, and conquer it to a radical new understanding of its essence. Physician, researcher, and award-winning science writer, Siddhartha Mukherjee examines cancer with a cellular biologist’s precision, a historian’s perspective, and a biographer’s passion. The result is an astonishingly lucid and eloquent chronicle of a disease humans have lived with—and perished from—for more than five thousand years. The story of cancer is a story of human ingenuity, resilience, and perseverance, but also of hubris, paternalism, and misperception. Mukherjee recounts centuries of discoveries, setbacks, victories, and deaths, told through the eyes of his predecessors and peers, training their wits against an infinitely resourceful adversary that, just three decades ago, was thought to be easily vanquished in an all-out “war against cancer.” The book reads like a literary thriller with cancer as the protagonist. Riveting, urgent, and surprising, The Emperor of All Maladies provides a fascinating glimpse into the future of cancer treatments. It is an illuminating book that provides hope and clarity to those seeking to demystify cancer.

*The Continental Army* Robert K. Wright,1983 A narrative analysis of the complex evolution of the Continental Army, with the lineages of the 177 individual units that comprised the Army, and fourteen charts depicting regimental organization.

*The American Yawp* Joseph L. Locke,Ben Wright,2019-01-22 I too am not a bit tamed—I too am untranslatable / I sound my barbaric yawp over the roofs of the world.—Walt Whitman, Song of Myself, Leaves of Grass The American Yawp is a free, online, collaboratively built American history textbook. Over 300 historians joined together to create the book they wanted for their own students—an accessible, synthetic narrative that reflects the best of recent historical scholarship and provides a jumping-off point for discussions in the U.S. history classroom and beyond. Long before Whitman and long after, Americans have sung something collectively amid the deafening roar of their many individual voices. The Yawp highlights the dynamism and conflict inherent in the history of the United States, while also looking for the common threads that help us make sense of the past. Without losing sight of politics and power, The American Yawp incorporates transnational perspectives, integrates diverse voices, recovers narratives of resistance, and explores the complex process of cultural creation. It looks for America in crowded slave cabins, bustling markets, congested tenements, and marbled halls. It navigates between maternity wards, prisons, streets, bars, and boardrooms. The fully peer-reviewed edition of The American Yawp will be available in two print volumes designed for the U.S. history survey. Volume I begins with the indigenous people who called the Americas home before chronicling the collision of Native Americans, Europeans, and Africans.The American Yawp traces the development of colonial society in the context of the larger Atlantic World and investigates the origins and ruptures of slavery, the American Revolution, and the new nation's development and rebirth through the Civil War and Reconstruction. Rather than asserting a fixed narrative of American progress, The American Yawp gives students a starting point for asking their own questions about how the past informs the problems and opportunities that we confront today.

**Scenes from an Unfinished War** Daniel P. Bolger,Combat Studies Institute,2011-01-01 Low-intensity conflict (LIC) often has been viewed as the wrong kind of warfare for the American military, dating back to the war in Vietnam and extending to the present conflicts in Iraq and Afghanistan. From the American perspective, LIC occurs when the U.S. military must seek limited aims with a relatively modest number of available regular forces, as opposed to the larger commitments that bring into play the full panoply of advanced technology and massive commitments of troops. Yet despite the conventional view, U.S. forces have achieved success in LIC, albeit under the radar and with credit largely assigned to allied forces, in a number of counterinsurgency wars in the 1960s.Scenes from an Unfinished War: Low-Intensity Conflict in Korea, 1966-1969 focuses on what the author calls the Second Korean conflict, which flared up in November 1966 and sputtered to an ill-defined halt more than three years later. During that time, North Korean special operations teams had challenged the U.S. and its South Korean allies in every category of low-intensity conflict - small-scale skirmishes along the Demilitarized Zone between the two Koreas, spectacular terrorist strikes, attempts to foment a viable insurgency in the South, and even the seizure of the USS Pueblo - and failed. This book offers a case study in how an operational-level commander, General Charles H. Bonesteel III, met the challenge of LIC. He and his Korean subordinates crafted a series of shrewd, pragmatic measures that defanged North Korea's aggressive campaign. According to the convincing argument made by Scenes from an Unfinished War, because the U.S. successfully fought the wrong kind of war, it likely blocked another kind of wrong war - a land war in Asia. The Second Korean Conflict serves as a corrective to assumptions about the American military's abilities to formulate and execute a winning counterinsurgency strategy. Originally published in 1991. 180 pages. maps. ill.

*American Military History, Volume II* ,2010 From the Publisher: This latest edition of an official U.S. Government military history classic provides an authoritative historical survey of the organization and accomplishments of the United States Army. *The Anatomy of Fascism* Robert O. Paxton,2007-12-18 What is fascism? By focusing on the concrete: what the fascists did, rather than what they said, the esteemed historian Robert O. Paxton answers this question. From the first violent uniformed bands beating up “enemies of the state,” through Mussolini’s rise to power, to Germany’s fascist radicalization in World War II, Paxton shows clearly why fascists came to power in some countries and not others, and explores whether fascism could exist outside the early-twentieth-century European setting in which it emerged. A deeply

intelligent and very readable book. . . . Historical analysis at its best. –The Economist The Anatomy of Fascism will have a lasting impact on our understanding of modern European history, just as Paxton’s classic Vichy France redefined our vision of World War II. Based on a lifetime of research, this compelling and important book transforms our knowledge of fascism–“the major political innovation of the twentieth century, and the source of much of its pain.”

Sicily and the Surrender of Italy Lieutenant Albert Garland,Howard Smyth,2015-07-16 (Includes maps) This volume, the second to be published in the Mediterranean Theater of Operations subseries, takes up where George F. Howe's Northwest Africa: Seizing the Initiative in the West left off. It integrates the Sicilian Campaign with the complicated negotiations involved in the surrender of Italy. The Sicilian Campaign was as complex as the negotiations, and is equally instructive. On the Allied side it included American, British, and Canadian soldiers as well as some Tabors of Goums; major segments of the U.S. Army Air Forces and of the Royal Air Force; and substantial contingents of the U.S. Navy and the Royal Navy. Opposing the Allies were ground troops and air forces of Italy and Germany, and the Italian Navy. The fighting included a wide variety of operations: the largest amphibious assault of World War II; parachute jumps and air landings; extended overland marches; tank battles; precise and remarkably successful naval gunfire support of troops on shore; agonizing struggles for ridge tops; and extensive and skillful artillery support. Sicily was a testing ground for the U.S. soldier, fighting beside the more experienced troops of the British Eighth Army, and there the American soldier showed what he could do. The negotiations involved in Italy's surrender were rivaled in complexity and delicacy only by those leading up to the Korean armistice. The relationship of tactical to diplomatic activity is one of the most instructive and interesting features of this volume. Military men were required to double as diplomats and to play both roles with skill.

Renewed Great Power Competition Ronald O'Rourke,2019-08-22 World events in recent years have led observers, particularly since late 2013, to conclude that the international security environment in recent years has undergone a shift from the post-Cold War era that began in the late 1980s and early 1990s, also sometimes known as the unipolar moment (with the United States as the unipolar power), to a new and different situation that features, among other things, renewed great power competition with China and Russia and challenges by these two countries and others to elements of the U.S.-led international order that has operated since World War II. The shift to renewed great power competition has become a major factor in the debate over future U.S. defense spending levels, and has led to new or renewed emphasis on the following in discussions of U.S. defense strategy, plans, and programs: \* grand strategy and geopolitics as part of the context for discussing U.S. defense budgets, plans, and programs; \* nuclear weapons and nuclear deterrence;\* new U.S. military service operational concepts;\* U.S. and NATO military capabilities in Europe;\* capabilities for conducting so-called high-end conventional warfare (i.e., largescale, high-intensity, technologically sophisticated warfare) against countries such as China and Russia; \* maintaining U.S. technological superiority in conventional weapons;\* speed of weapon system development and deployment as a measure of merit in defense acquisition policy;\* mobilization capabilities for an extended-length large-scale conflict against an adversary such as China or Russia;\* minimizing reliance in U.S. military systems on components and materials from Russia and China; and\* capabilities for countering so-called hybrid warfare and gray-zone tactics employed by countries such as Russia and China.
