The Man Who Mistook His Wife for a Hat Oliver Sacks,2021-09-14 In his most extraordinary book, the bestselling author of *Awakenings* and poet laureate of medicine" (The New York Times) recounts the case histories of patients inhabiting the compelling world of neurological disorders, from those who are no longer able to recognize common objects to those who gain extraordinary new skills. Featuring a new preface, Oliver Sacks's *The Man Who Mistook His Wife for a Hat* tells the stories of individuals afflicted with perceptual and intellectual disorders: patients who have lost their memories and with them the greater part of their pasts; who are no longer able to recognize people and common objects; whose limbs seem alien to them; who lack some skills yet are gifted with uncanny artistic or mathematical talents. In Dr. Sacks's splendid and sympathetic telling, his patients are deeply human and his tales are studies of struggles against incredible adversity. A great healer, Sacks never loses sight of medicine's ultimate responsibility: "the suffering, afflicted, fighting human subject."

Two Owls at Eton - A True Story Jonathan Franklin,2016-10-13 'A CLASSIC OF WILDLIFE WRITING' - THE FIELD Listed as one of its five best nature books - 2010 Country Life When Jonathan Franklin takes two baby tawny owls back to Eton, he has no idea how chaotic the following months will be. The birds show no respect for Etonian routine and tradition. They trash his room and rule his daily life, and are known throughout the school as 'Dum' and 'Dee' . Although a keen naturalist, Jonathan struggles to understand his charges and to find the right food for them; at first meat and feathers, soon mice and rats. Even so, they nearly die of malnutrition on two occasions. Frantic, he searches for natural food. How to keep them alive is a constant worry. He watches them grow from ugly balls of fluff into beautiful adults, every change of plumage and behaviour noted. They play truant, they shock others, and lead Jonathan into hilarious adventures. They charm his housemaster and everybody who meets them. Best of all is seeing them flying about over those famous playing fields. All the time, Jonathan works to train them for eventual return to the wild. Will that be possible? He is never sure whether he will succeed. Now updated by the author to tell the end of this extraordinary story, *Two Owls at Eton* - very British, very witty, yet always close to the rawness of the natural world - is a story to delight everyone - whether they ever trod those playing fields, or have never wished to set eyes on the place.

The Origins of Self Martin P. J. Edwardes,2019-07-22 *The Origins of Self* explores the role that selfhood plays in defining human society, and each human individual in that society. It considers the genetic and cultural origins of self, the role that self plays in socialisation and language, and the types of self we generate in our individual journeys to and through adulthood. Edwardes argues that other awareness is a relatively early evolutionary

development, present throughout the primate clade and perhaps beyond, but self-awareness is a product of the sharing of social models, something only humans appear to do. The self of which we are aware is not something innate within us, it is a model of our self produced as a response to the models of us offered to us by other people. Edwardes proposes that human construction of selfhood involves seven different types of self. All but one of them are internally generated models, and the only non-model, the actual self, is completely hidden from conscious awareness. We rely on others to tell us about our self, and even to let us know we are a self.

The Art of Cross-examination Francis Lewis Wellman,1904

Summer of '42 Herman Raucher,2015-05-03 “A chronicle of one summer in a boy’s coming of age”—the international bestselling classic that became the basis for the Oscar-winning film (Medium). Captivating and evocative, Herman Raucher’s semi-autobiographical tale has been made into a record-breaking Academy Award-winning hit movie, adapted for the stage, and enchanted readers for generations. In the summer of 1942, Hermie is fifteen. He is wildly obsessed with sex, and passionately in love with an “older woman” of twenty-two, whose husband is overseas and at war. Ambling through Nantucket Island with his friends, Hermie’s indelible narration chronicles his frantic efforts to become a man, especially one worthy of the lovely Dorothy, as well as his glorious and heartbreaking initiation into sex. “Mr. Raucher scores most tellingly. His recall of nervous teen-age gaucheries is dead accurate, hilarious, tinged with sadness.”—The New York Times Book Review “A charming and tender novel . . . The overall effect is one of high hilarity. Raucher is a comic-artist who is able to convey the fears and joys . . . of the boy and at the same time give older readers a wrench in the heart. ”—Publishers Weekly

The Woman in the Woods John Connolly,2018-06-12 “With its singular characters, eerie subject matter, and socko style” (The New York Times), this gripping thriller from the internationally bestselling author John Connolly follows Private Investigator Charlie Parker as he is hired to track down the identity of a dead woman—who apparently died in childbirth—and her missing child. In the beautiful Maine woods, a partly preserved body is discovered. Investigators realize that the young woman gave birth shortly before her death. But there is no sign of a baby. Private detective Charlie Parker is hired by a lawyer to shadow the police investigation and find the infant but Parker is not the only one searching. Someone else is following the trail left by the woman, someone with an interest in much more than a missing child...someone prepared to leave bodies in his wake. And in a house by the woods, a toy telephone begins to ring and a young boy is about to receive a call from a dead woman. With breathless pacing and shivery twists and turns, “this is Connolly’s masterpiece” (Publishers Weekly, starred review).

Learning the bash Shell Cameron Newham,2005-03-29 O'Reilly's bestselling book on Linux's bash shell is at it again. Now that Linux is an

established player both as a server and on the desktop Learning the bash Shell has been updated and refreshed to account for all the latest changes. Indeed, this third edition serves as the most valuable guide yet to the bash shell. As any good programmer knows, the first thing users of the Linux operating system come face to face with is the shell the UNIX term for a user interface to the system. In other words, it's what lets you communicate with the computer via the keyboard and display. Mastering the bash shell might sound fairly simple but it isn't. In truth, there are many complexities that need careful explanation, which is just what Learning the bash Shell provides. If you are new to shell programming, the book provides an excellent introduction, covering everything from the most basic to the most advanced features. And if you've been writing shell scripts for years, it offers a great way to find out what the new shell offers. Learning the bash Shell is also full of practical examples of shell commands and programs that will make everyday use of Linux that much easier. With this book, programmers will learn: How to install bash as your login shell The basics of interactive shell use, including UNIX file and directory structures, standard I/O, and background jobs Command line editing, history substitution, and key bindings How to customize your shell environment without programming The nuts and bolts of basic shell programming, flow control structures, command-line options and typed variables Process handling, from job control to processes, coroutines and subshells Debugging techniques, such as trace and verbose modes Techniques for implementing system-wide shell customization and features related to system security

A Course in Mathematical Logic Yu.I. Manin, 2013-06-29 1. This book is above all addressed to mathematicians. It is intended to be a textbook of mathematical logic on a sophisticated level, presenting the reader with several of the most significant discoveries of the last ten or fifteen years. These include: the independence of the continuum hypothesis, the Diophantine nature of enumerable sets, the impossibility of finding an algorithmic solution for one or two old problems. All the necessary preliminary material, including predicate logic and the fundamentals of recursive function theory, is presented systematically and with complete proofs. We only assume that the reader is familiar with naive set theoretic arguments. In this book mathematical logic is presented both as a part of mathematics and as the result of its self-perception. Thus, the substance of the book consists of difficult proofs of subtle theorems, and the spirit of the book consists of attempts to explain what these theorems say about the mathematical way of thought. Foundational problems are for the most part passed over in silence. Most likely, logic is capable of justifying mathematics to no greater extent than biology is capable of justifying life. 2. The first two chapters are devoted to predicate logic. The presentation here is fairly standard, except that semantics occupies a very dominant position, truth is introduced before deducibility, and models of speech in formal languages precede the systematic study of syntax.

The World, the Text, and the Critic Edward W. Said, 1983 Said demonstrates that critical discourse has been strengthened by the writings of Derrida and Foucault and by influences like Marxism, structuralism, linguistics, and psychoanalysis. But, he argues, these forces have compelled literature to meet the requirements of a theory or system, ignoring complex affiliations binding the texts to the world.
