Recycling Christmas Cards Anneke Lipsanen, 2014-09-10 If you are a crafter, teacher or parent interested in recycling Christmas cards, then you will love these pretty eco crafts, ideas and special templates to repurpose your used Holiday cards into charming new crafted items. The full color book with instructions and photographs for the 50 projects, plus the template collection with easy craft templates, are all you need to give used greeting cards a second life. The templates are designed and adapted for greeting card sizes and can be used again and again. Don't throw away those beautiful cards after the very short holiday period! Create nifty new items for fabulous scrapbooking, pretty packaging, little personal gifts, fun favors, small tokens of appreciation, creative containers, decor, decorations and ornaments! There are bonus projects, printable pattern paper and a second set of blank craft templates too. Make them for yourself, or to sell at craft markets and fundraising events. And use them for school arts and crafts projects too, as many projects are suitable for children. No fancy coordinated craft shop designs or expensive embellishments are needed. Just use what you have on hand. The happy patchwork medley is exactly what makes the projects in *Recycling Christmas Cards* so charming. Those lavish graphics on greeting cards were created by professional designers and make fabulous crafting material for pennies on the dollar - and in sturdy cardstock to boot. They are just waiting for the new life you can give them. Folks love to browse craft fairs and the likes for those inexpensive little something gifts. Many projects are geared towards such little gifts and stocking stuffers. Crafters will love the 45 craft templates in the book, as they have the perfect size for the projects. (Suggestions for recycling Christmas cards are easy to find, but finding templates that are ready to use and scaled to size are not). For convenience the templates are also available as printable downloads. If you have some odd cards left in a box somewhere, you can start your crafting straight away. Then ask friends, family and neighbors for theirs, as you will soon need (and want) a lot of cards. You can even arrange collection boxes at super markets, clubs and such. It is not just about recycling Christmas cards, but about recycling Christmas fun - all year long! So keep every one of your cards and get started for the next Holiday season, because 40 million recycled cards save 13 600 trees! Reuse, remake, repurpose, reduce, recycle and rethink!

4 Mexican Paper Crafts: Simple and Fun Craft Tutorials Inspired by Mexican Artisan Paper Decorations Ellen Deakin, Harry Olden, 2014-08 Description The Mexican tradition of paper crafting dates back to pre-Hispanic times when the Aztecs made paper from tree bark, called Amate. With the Spanish conquest brightly colored tissue paper or Papel de China arrived on trading boats from the Phillipines and was used in paper crafts. Pinatas, papel picado and paper flowers are important in the festivities of Cinco de Mayo and Dia de los Muertos and are also used to decorate birthday parties, weddings and baby showers amongst other celebrations. From the beginning of Happythought we have been inspired by the beauty and simplicity of these Mexican paper crafts. We have really enjoyed trying our hand at creating our own, with satisfying results! Now we have put together four of our favorite paper craft tutorials for you try in one book. The techniques we have used are not always traditional -

the projects are designed to be easy to make and use materials that you hopefully already have at home or in your craft box. The crafts are also designed with little fingers in mind - most of the activities are easy enough for a child to complete, with a little adult supervision! Tutorials How to make a paper star These stunning ornaments are partly inspired by Mexican star pinatas and partly by the beautiful Moravian tin star lanterns made by Mexican artisans. You could also attach your star decorations to a string of fairy lights to make a garland of teeny-tiny star lanterns. We have provided three colorful templates for you to use, or why not create your own using the black and white template as a starting point? How to make paper flowers These simple paper flowers are fun to make and so easy that the whole family can get involved. They can be used to decorate a party or Cinco de Mayo celebration, arranged in vases or as a centerpiece at a wedding, or placed on an ofrenda for Dia de los Muertos. You could also attach one or two flowers to a bobby pin or hair band and create a decorative hair piece! How to make papel picado Papel picado means 'punched' or 'perforated' paper, and traditionally papel picado are made from colored tissue paper and cut using chisels. We wanted to simplify the perforated paper technique so that you could create papel picado with household scissors, and after a bit of experimentation we came up with this easy method of producing your own stunning papel picado. We made ours using crepe paper as it comes in lovely, vibrant colors and we found it much easier to handle than tissue paper, which tends to tear. It also means that your papel picado last longer so you can use them again next year! How to make a mini pinata Ever since we moved our family to South America, we have all fallen head-over-heels for pinatas, so it wasn't long until we felt compelled to try making one of our own. Traditionally, you beat a pinata with a stick until it exploded and all the yummy, shiny contents fell to the ground. Now days, as a safer option, pinatas often come with a string which you pull down on to release the contents. We wanted to make a fully functioning mini pinata, so ours too has a pull string. It's been tried and tested by our children, so we can report that it works beautifully! Templates If you would like to use the templates shown in the tutorial photos they are all free with the book to download from the Happythought website. We have also included templates in this book which you can photocopy and scale up to use for your projects, copy by hand or use as inspiration for your own designs.

Understanding by Design Grant P. Wiggins,Jay McTighe,2005 What is understanding and how does it differ from

knowledge? How can we determine the big ideas worth understanding? Why is understanding an important teaching goal, and how do we know when students have attained it? How can we create a rigorous and engaging curriculum that focuses on understanding and leads to improved student performance in today's high-stakes, standards-based environment? Authors Grant Wiggins and Jay McTighe answer these and many other questions in this second edition of *Understanding by Design*. Drawing on feedback from thousands of educators around the world who have used the UbD framework since its introduction in 1998, the authors have greatly revised and expanded their original work to guide educators across the K-16 spectrum in the design of curriculum, assessment, and instruction. With an improved UbD Template at its core, the book explains the rationale of backward design and explores in greater depth the meaning of such key ideas as essential questions and transfer tasks. Readers will learn why the familiar coverage- and activity-based approaches to curriculum design fall short, and how a focus on the six facets of understanding can enrich student learning. With an expanded array of practical strategies, tools, and examples from all subject areas, the book demonstrates how the research-based principles of *Understanding by Design* apply to district frameworks as well as to individual units of curriculum. Combining provocative ideas, thoughtful analysis, and tested approaches, this new edition of *Understanding by Design* offers teacher-designers a clear path to the creation of curriculum that ensures better learning and a more stimulating experience for students and teachers alike.

Ultralearning Scott Young, 2019-08-06 Now a Wall Street Journal bestseller. Learn a new talent, stay relevant, reinvent yourself, and adapt to whatever the workplace throws your way. *Ultralearning* offers nine principles to master hard skills quickly. This is the essential guide to future-proof your career and maximize your competitive advantage through self-education. In these tumultuous times of economic and technological change, staying ahead depends on continual self-education—a lifelong mastery of fresh ideas, subjects, and skills. If you want to accomplish more and stand apart from everyone else, you need to become an ultralearner. The challenge of learning new skills is that you think you already know how best to learn, as you did as a student, so you rerun old routines and old ways of solving problems. To counter that, *Ultralearning* offers powerful strategies to break you out of those mental ruts and introduces new training methods to help you push through to higher levels of retention. Scott H. Young incorporates the latest research about the most effective learning methods and the

stories of other ultralearners like himself—among them Benjamin Franklin, chess grandmaster Judit Polgár, and Nobel laureate physicist Richard Feynman, as well as a host of others, such as little-known modern polymath Nigel Richards, who won the French World Scrabble Championship—without knowing French. Young documents the methods he and others have used to acquire knowledge and shows that, far from being an obscure skill limited to aggressive autodidacts, ultralearning is a powerful tool anyone can use to improve their career, studies, and life. Ultralearning explores this fascinating subculture, shares a proven framework for a successful ultralearning project, and offers insights into how you can organize and execute a plan to learn anything deeply and quickly, without teachers or budget-busting tuition costs. Whether the goal is to be fluent in a language (or ten languages), earn the equivalent of a college degree in a fraction of the time, or master multiple tools to build a product or business from the ground up, the principles in Ultralearning will guide you to success.
