A Pattern Language Christopher Alexander, 2018-09-20 You can use this book to design a house for yourself with your family; you can use it to work with your neighbors to improve your town and neighborhood; you can use it to design an office, or a workshop, or a public building. And you can use it to guide you in the actual process of construction. After a ten-year silence, Christopher Alexander and his colleagues at the Center for Environmental Structure are now publishing a major statement in the form of three books which will, in their words, lay the basis for an entirely new approach to architecture, building and planning, which will we hope replace existing ideas and practices entirely. The three books are *The Timeless Way of Building*, *The Oregon Experiment*, and this book, *A Pattern Language*. At the core of these books is the idea that people should design for themselves their own houses, streets, and communities. This idea may be radical (it implies a radical transformation of the architectural profession) but it comes simply from the observation that most of the wonderful places of the world were not made by architects but by the people. At the core of the books, too, is the point that in designing their environments people always rely on certain languages, which, like the languages we speak, allow them to articulate and communicate an infinite variety of designs within a forma system which gives them coherence. This book provides a language of this kind. It will enable a person to make a design for almost any kind of building, or any part of the built environment. Patterns, the units of this language, are answers to design problems (How high should a window sill be? How many stories should a building have? How much space in a neighborhood should be devoted to grass and trees?). More than 250 of the patterns in this pattern language are given: each consists of a problem statement, a discussion of the problem with an illustration, and a solution. As the authors say in their introduction, many of the patterns are archetypal, so deeply rooted in the nature of things that it seems likely that they will be a part of human nature, and human action, as much in five hundred years as they are today.

Ferry and Brandon's Cost Planning of Buildings Richard Kirkham, 2013-02-05 Ferry and Brandon's *Cost Planning of Buildings* provides a comprehensive introduction to the practice and procedures of cost planning in the procurement of buildings. The eighth edition of this leading textbook has been thoroughly updated to reflect the significant changes that have occurred in the UK construction industry since the new millennium. Whilst retaining its core structure of the three-phase cost planning process originally developed by Ferry and Brandon, the text provides a thorough grounding in contemporary issues including procurement innovation, whole life-cycle costing and modelling techniques. Designed to support the core cost planning studies covered by students reading for degrees in quantity surveying and construction management, it provides a platform for understanding the fundamental importance of effective cost planning practice. The principals of elemental cost planning are covered from both pre- and post-contract perspectives; the role of effective briefing and client/stakeholder engagement as best practice is also reinforced in this text. In his revisions, Richard Kirkham reflects the many changes in the construction industry in the past eight years: procurement is given prominence early in the book; the changing role of the quantity surveyor and building economist is discussed, as is the crucial role they assume throughout the project

life cycle. He emphasises the importance of early and collaborative working in the design team, as well as the impact of whole life-cycle costing.

Working Drawings Handbook Keith Styles, 2014-05-16 Working Drawings Handbook focuses on the principles, styles, methodologies, and approaches involved in drawings. The book first takes a look at the structure of information, types of drawing, and draftsmanship. Discussions focus on dimensioning, drawing conventions, techniques, materials, drawing reproduction, location drawing, component and sub-component drawings, assembly drawing, schedule, pictorial views, and structure of working drawings. The manuscript then ponders on working drawing management and other methods. Topics include planning the set, drawing register, drawing office programming, and introducing new methods. Building elements and external features, conventions for doors and windows, symbols indicating materials, electrical, telecommunications, and fire symbols, and non-active lines and symbols are also discussed. The book is a fine reference for draftsmen and researchers interested in studying the elements of drawing.

Little Free Libraries & Tiny Sheds Philip Schmidt, Little Free Library, 2019-03-26 Expand the sharing movement to your community with Little Free Libraries and Tiny Sheds—your complete source for building tiny sharing structures, including plans for 12 different structures, step-by-step photography and instructions, inspirational examples, and maintenance. Around the world, a community movement is underway featuring quaint landscape structures mounted on posts in front yards and other green spaces. Some are built for personal use, as miniature sheds for gardeners or as decorative accent pieces. More commonly, though, they are evidence of the growing trend toward neighborhood organization and community outreach. This movement has been popularized by Wisconsin-based Little Free Library (LFL), whose members currently include 75,000 stewards seeking to build community togetherness and promote reading at the same time by sharing books among neighbors. LFL has inspired builders to use similar structures to share things like CDs, food, garden tools, and seeds in the community. Produced in cooperation with Little Free Library, *Little Free Libraries and Tiny Sheds* is the builder's complete source of inspiration and how-to knowledge. Illustrated throughout with colorful step-by-step photography and a gallery of tiny structures for further inspiration, *Little Free Libraries and Tiny Sheds* covers every step: planning and design, tools and building techniques, best materials, and 12 complete plans for structures of varying size and aesthetics. In addition, author and professional carpenter Phil Schmidt includes information on proper installation of small structures and common repairs and maintenance for down the road. *Little Free Libraries and Tiny Sheds* even includes information on how to become a steward, getting the word out about your little structure once it's up and running, and tips for building a lively collection. Community togetherness has never been so at the fore of our consciousness—or so important. *Little Free Libraries and Tiny Sheds* is one tool on the road to helping you build community in your neighborhood.

Librarians and Educators Collaborating for Success Marcia A. Mardis,2016-12-05 The first in the IASL-Libraries Unlimited partnership series, this book features contributions written by authors from around the world about their effective collaboration experiences. Collaboration between teachers and school librarians is a topic that is often discussed in the quest for educational excellence, but the international perspective is something that is rarely explored. This text documents the collaboration endeavors in international school libraries and--drawing upon research and direct experience--demonstrates effective collaboration experiences in a range of countries. It also features selected brief case studies as well as several original essays on the topic of collaboration between teachers and teacher librarians in curriculum planning. The result of a joint effort between Libraries Unlimited and the International Association of School Librarianship (IASL), this book shows how collaboration with teachers looks in the international arena. It addresses topics such as collaborating for success with student searching, the roles of librarians and teachers in the research process, principal involvement, information literacy, inquiry-based learning, use of digital resources, models of collaboration for diversity, and evaluation of collaboration. Additionally, the current research findings presented will offer readers new insights into their profession.
