Operation Paperclip Annie Jacobsen,2014-02-11 The explosive story of America's secret post-WWII science programs, from the author of the New York Times bestseller Area 51 In the chaos following World War II, the U.S. government faced many difficult decisions, including what to do with the Third Reich's scientific minds. These were the brains behind the Nazis' once-indomitable war machine. So began Operation Paperclip, a decades-long, covert project to bring Hitler's scientists and their families to the United States. Many of these men were accused of war crimes, and others had stood trial at Nuremberg; one was convicted of mass murder and slavery. They were also directly responsible for major advances in rocketry, medical treatments, and the U.S. space program. Was Operation Paperclip a moral outrage, or did it help America win the Cold War? Drawing on exclusive interviews with dozens of Paperclip family members, colleagues, and interrogators, and with access to German archival documents (including previously unseen papers made available by direct descendants of the Third Reich's ranking members), files obtained through the Freedom of Information Act, and dossiers discovered in government archives and at Harvard University, Annie Jacobsen follows more than a dozen German scientists through their postwar lives and into a startling, complex, nefarious, and jealously guarded government secret of the twentieth century. In this definitive, controversial look at one of America's most strategic, and disturbing, government programs, Jacobsen shows just how dark government can get in the name of national security.

SPAD XIII vs Fokker D VII Jon Guttman,2009-04-21 Having established its SPAD VII as the most effective French fighter of 1916, the Soci  t   Pour l'Aviation at ses D  riv  s strove to improve the model with a 220hp Hispano Suiza 8B engine and two machine guns. Despite initial teething troubles with the new engine, by mid-1918 the SPAD XIII had taken its place as the principal fighter of both France and the US. Meanwhile, the German quest for a successor for their structurally flawed Albatros D V finally bore fruit with the Fokker D VII. Entering combat in May 1918, this plane earned a reputation as the most formidable fighter of the war, yet the SPAD XIII's greater speed, especially in a dive, and its outstanding durability, proved a fearsome rival. This is the gripping story of two of the best fighters produced in World War I - the SPAD XIII and the Fokker D VII - as they dueled in the skies above the trenches in the closing months of the war. Never before published artwork, including fascinating cockpit illustrations, reveal several dramatic clashes between the two foes while diary entries and first-hand accounts from the pilots bring this classic World War I duel to life with intimate detail.

Late Titian and the Sensuality of Painting Titian,2008 In the mid-sixteenth century, at almost 60 years of age, Titian invented a new way of painting: the paint was applied to the canvas rapidly and freely and overlaid with brushstrokes that were both light and dense: the forms broke up and a great sensuality and profound spirituality became evident. Titian used an extraordinarily prescient technique to create engaging, stirring painting that in some ways seems to relate to the literary work of the poet Torquato Tasso and even take up the imaginary writings of Ludovico Ariosto published in Venice in the 1530s. Such a painting style had never previously been imagined and was so revolutionary that it was to influence many artists of subsequent centuries through to the modern age. Late Titian became the yardstick not only for younger contemporary painters like Tintoretto, Veronese and Bassano, but also great artists of subsequent centuries like Rubens, Rembrandt, Velazquez, Gericault and Delacroix and on to the Expressionists.
