2 The Lawson Sisters Janet Gover,2020-02-01 A heartfelt and compelling story of family, secrets and second chances, set in the heart of the beautiful Hunter Valley of NSW, from an award-winning new voice in Australian fiction. Family, fortune and holding on to what counts... For many years Elizabeth Lawson has battled single-handedly to run the family’s historic horse stud in memory of her beloved father. But a devastating loss puts her dreams at risk. With no options left, Liz is forced to turn to her estranged sister Kayla for help. Kayla has built a new life in the city as a wedding planner, far removed from the stableyard sweat and dust of her rural upbringing. She never thought she’d go back. But when Liz calls out of the blue, Kayla forms a plan that could save their childhood home. Kayla’s return forces Liz to confront her past ... and her future, in the shape of Mitch, her first and only love, who still watches over her from the other side of the creek. But Liz still hides a terrible secret. When Kayla learns the truth, will the Lawson sisters find common ground or will their conflict splinter the family once again? Praise for Janet Gover: ‘A stirring family drama, set to a spectacular rural stage ... The Lawson Sisters is an exceptional read from cover to cover.’ - Mrs B’s Book Reviews ‘Easy to read and beautifully written - the characters came to life...’ - Beauty and Lace ‘With the scent of eucalyptus on the air, estranged sisters and a homestead echoing past regrets and missed chances, The Lawson Sisters has everything you want in an Aussie romance.’ - Fiona Lowe, bestselling Australian author

2 Mapping Different Geographies Karel Kriz,William Cartwright,Lorenz Hurni,2010-09-15 This book is the outcome of the work of contributors who participated in the wo- shop “Mapping Different Geographies (MDG)” in February 2010, held in Puchberg am Schneeberg, Austria. This meeting brought together cartographers, artists and geoscientists who research and practice in applications that focus on enhancing o- to-one communication or develop and evaluate methodologies that provide inno- tive methods for sharing information. The main intention of the workshop was to investigate how ‘different’ geographies are being mapped and the possibilities for developing new theories and techniques for information design and transfer based on place or location. So as to communicate these concepts it was important to appreciate the many contrasting meanings of ‘mapping’ that were held by workshop participants. Also, the many (and varied) viewpoints of what different geographies are, were ela- rated upon and discussed. Therefore, as the focus on space and time was embedded within everyone’s felds of investigation, this was addressed during the workshop. This resulted in very engaging discourse, which, in some cases, exposed the restrictions that certain approaches need to consider. For participants, this proved to be most useful, as this allowed them to appreciate the limits and restrictions of their own approach to understanding and representing different geographies. As well, the workshop also was most helpful as a vehicle for demonstrating the common ground of interest held by the very diverse areas of endeavour that the workshop participants work within.

2 Cartographic Relief PresentationEduard Imhof,2007 This new edition of Cartographic Relief Presentation was edited for clarity and consistency but preserves Imhof’s insightful commentary and analytical style. Color maps, aerial photographs, and instructive illustrations are faithfully reproduced. The book offers guidelines for properly rendering terrain in maps of all types and scales whether drawn by traditional means or with the aid of a computer. Cartographic Relief Presentation was among the essential mapping and graphical design books of the twentieth century. Its continuing relevance for the twenty-first century is assured with this publication.--BOOK JACKET.

2 Sun Bread Elisa Kleven,2004-03-30 Winter’s gray chill has set in and everyone misses the sun-especially the baker. So she decides to bring some warmth to the town by making sun bread. And as the bread bakes, rising hot and delicious, everyone comes out to share in its goodness. Everyone, including the sun itself. With a lilting, rhyming text, colorful illustrations, and a recipe for baking your own sun bread, this tasty treat from the illustrator of the best-selling Abuela is just right for all ages to enjoy.

2 Map Use A. Jon Kimerling,2010 Map Use: Reading and Analysis demonstrates the importance of understanding the significant distinctions, formats, and functionality of maps. The book is specifically designed for course adoption, but is written for anyone who wants to effectively read and use maps. Map Use: Reading and Analysis will likely remain a permanent fixture in any cartographic resource library.

2 True-3D in Cartography Manfred Buchroithner,2014-02-22 As corroborated by the never-sagging and even increasing interest within the last decade, the intuitive attraction of True 3D in geodata presentation is well worth covering its current status and recent developments in a compendium like the present one. It covers most aspects of (auto-) stereoscopic representation techniques of both topographic and thematic geodata, be they haptic or not. Theory is treated as well as are many fields of concrete applications. Displays for big audiences and special single-user applications are presented, well-established technologies like classical manual fabrication of landscape reliefs contrast with cutting-edge developments
