Achtung-Panzer! Heinz Guderian, 1995 This is one of the most significant military books of the twentieth century. By an outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

The Women of Little Lon Barbara Minchinton, 2021-08-16 A vivid account of a remarkable but little-known chapter in Melbourne's history Sex workers in nineteenth-century Melbourne were judged morally corrupt by the respectable world around them. But theirs was a thriving trade, with links to the police and political leaders of the day, and the leading brothels were usually managed by women. While today a city lane is famously named after Madame Brussels, the identities of the other 'flash madams', the 'dressed girls' who worked for them and the hundreds of women who solicited on the streets of the Little Lon district of Melbourne are not remembered. Who were they? What did their daily lives look like? What became of them? Drawing on the findings of recent archaeological excavations, rare archival material and family records, historian Barbara Minchinton brings the fascinating world of Little Lon to life. Barbara Minchinton is a historian and independent researcher. For several years she collaborated with a team of archaeologists on the interpretation of artefacts from Melbourne's Little Lon district. She is the co-editor of The Commonwealth Block, Melbourne, a historical archaeology of the city's working-class and immigrant communities, and the author of The Women of Little Lon.

How To Tutor, by famed writer Samuel L. Blumenfeld, first available 38 years ago has without change, continued to be an outstanding resource to teach the Three R's. It has not changed because it works so well. Its methodology is timeless!! It is a whole school in one book for only \$ 29.95. Its three parts are (1) Sam Blumenfeld's amazingly easy to teach systematic, intensive phonics READING instruction program. (2) His effective CURSIVE HANDWRITING program and (3) his equally effective ARITHMETIC PROGRAM. Has been used by 100,000's parents, teachers and tutors. Mary Pride, leading homeschooling materials reviewer, calls it a best value. 298 pages. How To Tutor works at ALL ages. Anyone who can read can teach the 3 R's with it. WHY IS HOW TO TUTOR IMPORTANT? Dr. Blumenfeld warns: Most parents wait until their child is having difficulty at school before they think of providing remediation. Sometimes the child is so far behind, so confused, so frustrated by not learning in the first two grades, that the remedial program looks long and difficult. However, proper tutoring at the preschool level or in the first two grades, as a preventive measure, can make sure that the child has the foundation on which to build achievement. How To Tutor provides parents and teachers with a complete instructional program: step-by-step lesson plans in the Three R's. It originally was to help public school students. Since then the continued decline in many public schools made HOMESCHOOLING much more important. Homeschool families discovered what a gem this book is for them. HERE ARE THE THREE SECTIONS: PART (1) READING: The big problem in schooling today. How To Tutor shows how to avoid the confusion in teaching reading that prevails in our schools today. 117 complete lessons. Contains everything you need to teach your student to be a top reader. You learn the dirty little secret professional educators keep from you: It is really EASY TO TEACH READING! There are only 44 sounds (Phonograms) you need to teach your student to build a high level of reading skill. PART (2) CURSIVE HANDWRITING: Many Parents and Grandparents today are often shocked to learn that in many schools cursive is not taught. With How To Tutor you are given all the tools you need to teach this important skill with ease. Here is another little secret: Cursive can be taught BEFORE printing (ball & stick). There are only THREE basic strokes involved in cursive handwriting. Most children can learn these at a surprisingly early age. Learning about this will amaze you. 73 complete lessons. PART (3) ARITHMETIC: Quoting Dr. Blumenfeld: In teaching arithmetic it is important to convey the genius of the system itself. Next to the alphabet, it is the greatest mental tool

ever devised by man. We should approach the subject with the excitement it deserves. Any teacher who makes arithmetic dull does so because he does not understand its beautiful simplicity, logic and facility which permit us to do so much with so little. **HTT Arithmetic** covers addition, subtraction, multiplication, division, fractions, decimals, weights, time, and the calendar. Everything up to just before geometry and algebra. All this in 67 easy lessons. **FINAL WORD:** Anyone can use these lesson plans: Students, Parents, Teachers, Tutors, Retired Teachers, Housewives and Grandparents. Tutoring can be a good way to earn extra money while aiding people who need help to improve their reading, handwriting and arithmetic ability. Some of the claims we make may appear unbelievable. They are **TRUE**. We have heard from countless users who cannot say enough about **HTT's** simplicity and effectiveness. See for yourself.
