Achtung-Panzer! Heinz Guderian,1995 This is one of the most significant military books of the twentieth century. By an

outstanding soldier of independent mind, it pushed forward the evolution of land warfare and was directly responsible for German armoured supremacy in the early years of the Second World War. Published in 1937, the result of 15 years of careful study since his days on the German General Staff in the First World War, Guderian's book argued, quite clearly, how vital the proper use of tanks and supporting armoured vehicles would be in the conduct of a future war. When that war came, just two years later, he proved it, leading his Panzers with distinction in the Polish, French and Russian campaigns. Panzer warfare had come of age, exactly as he had forecast. This first English translation of Heinz Guderian's classic book - used as a textbook by Panzer officers in the war - has an introduction and extensive background notes by the modern English historian Paul Harris.

**Helicopters of the Third Reich** Steve Coates, Jean-Christophe Carbonel, 2002 This is the first major study of Germany's wartime helicopters in the English language and is the result of 15 years research. The book includes more than 350 stunning and rare photographs, most appearing in print for the first time. Alongside the narrative, the book includes first hand accounts and the illustrations are supplemented by superb technical drawings.
