Images of the American City Anselm L. Strauss,2017-09-08 Originally published in 1961, Images of the American City examines how Americans dealt with the rapid shock of urbanization as it evolved from an agricultural nation. Working from the framework of a social psychologist, Anselm L. Strauss offers a deeper look into the sociological, psychological, and historical perspectives of urban development. He describes how the cultural changes of a space ultimately develop urban imagery by looking towards the urbanization of America from peoples' views of the cities rather than how the cities are themselves. Urban imageries are contrasted with the context of an ideal city and visitors' perspectives of cities. Strauss takes a step back to ask questions about what Americans think and have thought of their cities. How do these cities compare to the image of an ideal city? What are the different perspectives between a city-dweller and a visitor? He contrasts the tension between those within the city and those outside of its urban limits. Strauss describes how space and time are major themes in the symbolic urbanization of a city. He offers a macroscopic view of the city as a whole and shows how urban imageries evolved from changes in lifestyles. He then provides historical breakdowns of different regions of the country and how they were urbanized. This book documents and illustrates the change in American symbolization from the growth of American cities to the union of urbanity and rurality.

Digital Urban Acupuncture Salvatore Iaconesi, Oriana Persico,2016-09-27 This book explores the possibility to observe the lives of cities through ubiquitous information obtained through social networks, sensors and other sources of data and information, and the ways in which this possibility describes a new form of Public Space, which can be used to define new forms of citizenship and participated city governance. The work is the result of years of research across sciences, arts, design, ethnography, cultural geography, performed by multiple researchers, understanding the Relational Ecosystems of cities (the flows of relation, information, knowledge and emotion in the city) and using them to reinterpret the concept of Urban Acupuncture: from the Third Space, Third Landscape and Third Generation City, to the Third Infospace; from Urban Acupuncture to Digital Urban Acupuncture. The book starts by exploring the many theories and methodologies which have been used to try to capture and use the revolutionary potential found in the daily lives of cities. From De Certeau, to Latour, Bateson, Bhabha, and all the way to Castells, Clément, Boyd, Casagrande. In a progression which moves from the Third Space (Soja, De Certeau), to the Third Landscape (Clément), to the Third Generation City (Casagrande), to the Third Paradise (Pistoletto), the book arrives at a definition of the Third Infospace, following up on Kevin Lynch: a new legibility and imageability of the city. Its main themes and objectives lie in the desire to observe and understand the radical transformation of the definitions, boundaries and configurations of what we call public and private spaces, in different cultures and communities, in the age of communication, information and knowledge, and to use these understandings to formulate a set of working hypotheses for the positive, constructive, active and participatory usage of these transformed scenarios, contributing to the re-definition of concepts such as citizenship, city-governance, urban planning, civic decision-making, and more. And using, in the process, techniques such as Urban Acupuncture, Actor-Network Theory, Diasporic analysis, Peer-to-peer Urbanism and more. Multiple real-life research scenarios and documented case studies will be used, from 4 continents, coming from our research and from other international contributions.

The Urban Indian Experience in America Donald Lee Fixico,2000 As the first ethnohistory of modern urban Indians, this perceptive study looks at Indians from many tribes living in cities throughout the United States. Fixico has had unparalleled access to Native Americans, particularly their contemporary oral tradition. Through firsthand observations, interviews, and conventional historical sources, he has been able to assess the major impact urbanization has had on Indians and see how they have come to terms with both the negative and enriching aspects of living in cities. The result is an insightful and empathetic account of how Indian identity is sustained in cities. Today two-thirds of all Indians live in cities. Many of these urban Indians are third- or fourth-generation city dwellers, the descendants of those who first came to urban areas during the federal government's push for relocation from the late 1940s through the 1960s. Fixico looks at both groups of urban Native Americans--those who first settled in cities some fifty years ago and those who have grown up there in the past thirty years--and finds in their experiences a

record of survival and adaptation. Fixico offers a new view of urban Indians, one centered on questions of how their modern identity emerges and perseveres. He shows how the corrosive effects of cultural alienation, alcoholism, poor health services, unemployment, and ghetto housing are slowly being overcome, particularly since the 1970s. After fifty years of urban experiences, Native Americans living in cities are better able today than at any other time to balance tradition and modernity.

Grand Urban Rules Alex Lehnerer, 2009 Grand Urban Rules offers a compilation and discussion of significant rules invented and implemented by European, North American, and Asian cities. The reader does not only get an overview of the functionality and repercussions of these rule sets but also gains insight into the context and situation of the specific city through the lens of rule-based governance: a city's code as the inverted, abstracted and extracted image of a city's actual situation. Setting standards is first and foremost a cultural act. We map cities by their rules! The publication is based on a database of approximately 100 relevant urban rules researched over the past three years at the ETH Zurich. These rules describe built form with regard to physical characteristics, qualities, and consequences as well as the distribution of program, density, urban performance, and aesthetics.--Publisher's description.

Back to Fort Scott Karen E. Haas, Peter W. Kunhardt, 2015 The first African American photographer to be hired full time by Life magazine, Gordon Parks was often sent on assignments involving social issues that his white colleagues were not asked to cover. In 1950 he returned on one such assignment to his hometown of Fort Scott in southeastern Kansas: he was to provide photographs for a piece on segregated schools and their impact on black children in the years prior to Brown v. Board of Education. Parks intended to revisit early memories of his birthplace, many involving serious racial discrimination, and to discover what had become of the 11 members of his junior high school graduation class since his departure 20 years earlier. But when he arrived only one member of the class remained in Fort Scott, the rest having followed the well-worn paths of the Great Migration in search of better lives in urban centers such as St. Louis, Kansas City, Columbus and Chicago. Heading out to those cities Parks found his friends and their families and photographed them on their porches, in their parlors and dining rooms, on their way to church and working at their jobs, and interviewed them about their decision to leave the segregated system of their youth and head north. His resulting photo essay was slated to appear in Life in the spring of 1951, but was ultimately never published. This book showcases the 80-photo series in a single volume for the first time, offering a sensitive and visually arresting view of our country's racialized history. Gordon Parks (1912-2006) was born into poverty and segregation in Fort Scott, Kansas. The self-taught photographer also found success as a film director, author and composer. He was awarded the National Medal of Arts and over 50 honorary degrees.
