U.S. Marine Corps Scout-sniper Peter R. Senich,1993 The advent of jungle warfare in the South Pacific in 1942 opened an entirely new chapter in the art of fieldcraft and mark-manship for the U.S. Marine Corps. To eliminate the Japanese jungle fighter, the Corps had to formulate innovative tactics even more efficient than those successfully implemented by the scouts, observers and snipers of World War I. The Corps set about training and fielding a new breed of combat specialist: the U.S. Marine Corps scout-sniper. Now, after more than two decades of research, Peter Senich has written what is undoubtedly the most thorough and accurate account ever of the training, equipment and combat experiences of this important facet of the history of Marine Corps sniping. Contains rare combat and training photos of scout-snipers

in action.

Enemy Inside The Gates: Snipers In Support Of Military Operations In Urbanized Terrain Lt.-Colonel Jeffery E. Dearolph USMC, 2014-08-15 As the world's urban areas continue to increase in size the possibility of U. S. forces conducting military operations in urbanized terrain also increases. However, the weapon systems the U. S. procures and employs obtain maximum effectiveness in open terrain. These weapons prove less capable in urban terrain since their standoff and precision advantages suffer degradation due to buildings and the fleeting nature of enemy personnel. U. S. weaponry also causes a large amount of collateral damage that may also result in civilian casualties, which proves politically unacceptable. Potential adversaries of the U. S. realize these limitations and present a target set that proves difficult to locate and engage. The target set the enemy uses in urban terrain consists of enemy combatants mixing with non-combatants, enemy snipers, and special purpose teams... Assets the U. S. possesses that can engage elements of the enemy's urban target set include U. S. Army and Marine Corps snipers. However, a determination on whether more snipers will effectively defeat the target set requires consideration... This monograph analyzes the contemporary operating environment to articulate the enemy's urban target set. Next, a review of current U. S. Army and Marine Corps sniping doctrine, organization and training establishes the

foundation for presenting the sniper's capability to defeat the urban target set. In order to provide a balanced argument, other possible solutions to engaging and defeating the target set receive consideration... Research shows that the sniper company, organized at the division level, achieves the desired effect of increasing the density of sniper teams on the urban battlefield. The costs associated with the sniper company prove acceptable, as it requires minimal expenditure concerning personnel and equipment. The division sniper company will effectively counter the enemy's urban target set without causing non-combatant casualties.
