Flying the Flag H. Dienel, P. Lyth, 1999-01-12 Since the end of World War II, European airlines have revealed their own operational style. By analyzing seven European flag-carriers, Dienel and Lyth provide a comparative study of the airline business, covering government policy, aircraft procurement, network growth, commercial performance and collaboration with other airlines and transport modes. This study also seeks to explain why national flag-carriers have survived in an age of globalization and strategic alliances. A concluding chapter views the contrasting American air transport industry.

Ilyushin IL-76 Yefim Gordon, Dmitriy Komissarov, Sergey Komissarov, 2001 A familiar sight both in military and worldwide commercial use, the Ilyushin IL-76 was the Soviet's answer to the Lockheed Starlifter. Compiled by noted Russian aviation writers and historians from a wealth of first-hand Russian sources, this book is a comprehensive history of each variant and its service. Extensive tables detail each aircraft built with complete notes on every operator-both civil and military-and their fleets. For military enthusiasts and modelers.

Private Warriors Ken Silverstein, Daniel Burton-Rose, 2000 Widely-researched and fast-paced, *Private Warriors* surveys the generals, gun-runners and national security staffers who were cast adrift at the end of the Cold War and who now operate in the private sector. In these pages we encounter Ernst Werner Glatt, a right-wing German who was for many years the Pentagon's preferred gun-runner; ex-Secretary of State Alexander Haig who now lobbies for China and assists in selling weapons to Turkey; and Frank Gaffney, an ex-Pentagon official who has grown rich by promoting the biggest boondoggle of them all, Star Wars. Today's private warriors have a direct financial interest in war and the connections to push for the maintenance of bloated military budgets.

Kumba Africa Sampson Ejike Odum, 2020-11-03 'KUMBA AFRICA', is a compilation of African Short Stories written as fiction by Sampson Ejike Odum, nostalgically taking our memory back several thousands of years ago in Africa, reminding us about our past heritage. It digs deep into the traditional life style of the Africans of old, their beliefs, their leadership, their courage, their culture, their wars, their defeat and their victories long before the emergence of the white man on the soil of Africa. As a talented writer of rich resource and superior creativity, armed with in-depth knowledge of different cultures and traditions in Africa, the Author throws light on the rich cultural heritage of the people of Africa when civilization was yet unknown to the people. The book reminds the readers that the Africans of old kept their pride and still enjoyed their own lives. They celebrated victories when wars were won, enjoyed their New Yam festivals and villages engaged themselves in seasonal wrestling contest etc; Early morning during harmattan season, they gathered firewood and made fire inside their

small huts to hit up their bodies from the chilling cold of the harmattan. That was the Africa of old we will always remember. In Africa today, the story have changed. The people now enjoy civilized cultures made possible by the influence of the white man through his scientific and technological process. Yet there are some uncivilized places in Africa whose people haven't tested or felt the impact of civilization. These people still maintain their ancient traditions and culture. In everything, we believe that days when people paraded barefooted in Africa to the swamp to tap palm wine and fetch firewood from there farms are almost fading away. The huts are now gradually been replaced with houses built of blocks and beautiful roofs. Thanks to modern civilization. Donkeys and camels are no longer used for carrying heavy loads for merchants. They are now been replaced by heavy trucks and lorries. African traditional methods of healing are now been substituted by hospitals. In all these, I will always love and remember Africa, the home of my birth and must respect her cultures and traditions as an AFRICAN AUTHOR.

Inflation and the Merchant Economy Peter J. Lyth,1990 This study focuses on a sample of occupational groups representative of the Mittelstand in the city of Hamburg - white-collar workers, artisans, retailers, civil servants and house owners - and examines the strains imposed by the inflationary conditions on each group, seriously questioning the commonly-held interpretation of the Inflation's effects and chronology.

In from the Cold Gilbert M. Joseph,Daniela Spenser,2008-01-11 Over the last decade, studies of the Cold War have mushroomed globally. Unfortunately, work on Latin America has not been well represented in either theoretical or empirical discussions of the broader conflict. With some notable exceptions, studies have proceeded in rather conventional channels, focusing on U.S. policy objectives and high-profile leaders (Fidel Castro) and events (the Cuban Missile Crisis) and drawing largely on U.S. government sources. Moreover, only rarely have U.S. foreign relations scholars engaged productively with Latin American historians who analyze how the international conflict transformed the region's political, social, and cultural life. Representing a collaboration among eleven North American, Latin American, and European historians, anthropologists, and political scientists, this volume attempts to facilitate such a cross-fertilization. In the process, *In From the Cold* shifts the focus of attention away from the bipolar conflict, the preoccupation of much of the so-called new Cold War history, in order to showcase research, discussion, and an array of new archival and oral sources centering on the grassroots, where conflicts actually brewed. The collection's contributors examine international and everyday contests over political power and cultural representation, focusing on communities and groups above and underground, on state houses and

diplomatic board rooms manned by Latin American and international governing elites, on the relations among states regionally, and, less frequently, on the dynamics between the two great superpowers themselves. In addition to charting new directions for research on the Latin American Cold War, *In From the Cold* seeks to contribute more generally to an understanding of the conflict in the global south. The Evolution of the Airline Industry Steven Morrison, Clifford Winston, 2010-12-01 Since the enactment of the Airline Deregulation Act in 1978, questions that had been at the heart of the ongoing debate about the industry for eighty years gained a new intensity: Is there enough competition among airlines to ensure that passengers do not pay excessive fares? Can an unregulated airline industry be profitable? Is air travel safe? While economic regulation provided a certain stability for both passengers and the industry, deregulation changed everything. A new fare structure emerged; travelers faced a variety of fares and travel restrictions; and the offerings changed frequently. In the last fifteen years, the airline industry's earnings have fluctuated wildly. New carriers entered the industry, but several declared bankruptcy, and Eastern, Pan Am, and Midway were liquidated. As financial pressures mounted, fears have arisen that air safety is being compromised by carriers who cut costs by skimping on maintenance and hiring inexperienced pilots. Deregulation itself became an issue with many critics calling for a return to some form of regulation. In this book, Steven A. Morrison and Clifford Winston assert that all too often public discussion of the issues of airline competition, profitability, and safety take place without a firm understanding of the facts. The policy recommendations that emerge frequently ignore the long-run evolution of the industry and its capacity to solve its own problems. This book provides a comprehensive profile of the industry as it has evolved, both before and since deregulation. The authors identify the problems the industry faces, assess their severity and their underlying causes, and indicate whether government policy can play an effective role in improving performance. They also develop a basis for understanding the industry's evolution and how the industry will eventually adapt to the unregulated economic environment. Morrison and Winston maintain that although the airline industry has not reached long-run equilibrium, its evolution is proceeding in a positive direction—one that will preserve and possibly enhance the benefits of deregulation to travelers and carriers. They conclude that the federal government's primary policy objective should be to expand the benefits from unregulated market forces to international travel. Brookings Review article also available
