FACTOR FILE CONVERSION ,1964 This revision of NREC Technical Manual No. 144 (PARM10 - Factor File Conversion) supersedes the manual dated June 1963, due to the fact that several modifications have been made to the Factor File Conversion Routine. The areas of the program which have been modified deal with the table parameters, the activity parameters, and the ancillary vector factors. The purpose of the Factor File Conversion computer program is to convert factor records from their maintenance format into the format required for computation. The inputs to the routine are a file of factor records in maintenance format (PARMMF tape), and either one or two j*j concordance files (PARMJJ tapes). The output from the routine is a file of factor records in computational format (PARMCF) for use by the PARM central routine. Section V-A5 of the PARM Formulation Manual provides guidance in the use of the program. (Author).

Scotch Rite Masonry Illustrated John Blanchard,2014-08-24 Had not an extended trial demonstrated most clearly that in no way can the arguments against a secret order be put before the public so effectively as in close connection with the ritual thereof, I should not have ventured the great expense of publishing this Illustrated Ritual of the Scottish Rite. Rituals sell readily to both lodge members and outsiders, while the most eloquent address on the subject, however replete with important facts and arguments, seldom secures many readers. Publisher.

Linguistic Derivations and Filtering Hans Broekhuis,Ralf Vogel,2013 This volume focuses on the role of the postulated derivational and filtering devices in current linguistic theory and aims to promote the exchange of ideas between the proponents of MP and OT in order to evaluate the role of these devices in the two frameworks. It sheds more light on the tenability of the often proclaimed opinion that MP and OT are incompatible frameworks given that the explanatory power of the former mainly resides on the generative device whereas the explanatory power of the latter mainly resides in the filtering device. Papers from various perspectives discuss and compare the two devices in the two frameworks. The volume thus collects a large number of the arguments in favour of more a strictly derivational approach, a more strictly filtering approach, or a more hybrid approach. The book will be of interest to any researcher or advanced student in Linguistic Theory. It is more specifically directed to syntacticians working within the current frameworks that have developed from Chomsky's minimalist program (MP) and Prince and Smolensky's Optimality Theory (OT).

Subjects, Expletives, and the EPP Peter Svenonius,2002-09-19 This collection of previously unpublished articles examines Noam Chomsky's Extended Projection Principle and its relationship to subjects and expletives (works like it that stand for other words). Re-examining Chomsky's proposition that each clause must have a subject, these articles represent the current state of the debate, particularly with respect to the theory's universal applicability across languages. Presenting an international and highly respected group of contributors, the volume explores these questions in a variety of languages, including Italian, Finnish, Icelandic, and Hungarian.

Theory and Description in Generative Syntax Liliane M. V. Haegeman,2009-04-09 This book offers a detailed description and analysis of West Flemish, a dialect of Dutch, within the framework of Government and Binding Theory. The study focusses on two constructions: the doubling of subject pronouns, and the order of verb phrase constituents. For each construction the book gives a rigorous account of the data, and a theoretical analysis. It demonstrates how recent developments in generative syntax can help to explain the properties of individual dialects. Liliane Haegeman combines expertise in theoretical linguistics and traditional philology. Her study blends rigorous description of a little-studied dialect with considerable theoretical sophistication and insight. It will be welcomed by all linguists with an interest in generative syntax, as well as those interested in the Germanic languages.

The Syntax of Ellipsis Jeroen Van Craenenbroeck,2010-02-22 The Syntax of Ellipsis investigates a number of elliptical constructions found in Dutch dialects within the framework of the Minimalist Program. Using two case studies, Van Craenenbroeck argues that both the PF-deletion and the pro-theory of ellipsis are needed to account for the full range of elliptical phenomena attested in natural language. The first case study focuses on instances of stranding to the right of a sluiced wh-phrase: prepositions in English (What about?) and demonstrative pronouns in southern Dutch dialects (Wie dat? 'who that'). Van Craenenbroeck gives both of these phenomena a PF-deletion analysis, which turns out to have considerable repercussions for the structure of the left periphery and the syntax of wh-movement. Specifically, while minimal wh-phrases move from their IP-internal base position to specCP, complex ones are base-generated in the (split) left periphery. The second case study is concerned with Short Do Replies in southern Dutch dialects, a type of contradictory reply that at first sight bears a close resemblance to English VP-ellipsis. Van Craenenbroeck shows that in this case the ellipsis site is best represented as a null, structureless proform that is licensed by the head of a high PolP. Moreover, this pronominal is argued to occur in two other dialectal constructions as well: contradictory replies of the type Da's nie 'that is not' found in Brabant Dutch, and the occurrence of subject clitics and agreement endings on the words for yes and no in Southern Dutch dialects (e.g. Ja-n-s 'yes-PLURAL-they'). The Syntax of Ellipsis will be of interest to scholars of the left periphery, wh-movement, and Dutch dialects.

Agreement and Its Failures Omer Preminger,2014-09-12 A novel proposal regarding predicate-argument agreement that combines detailed empirical investigation with rigorous theoretical discussion. In this book, Omer Preminger investigates how the obligatory nature of predicate-argument agreement is enforced by the grammar. Preminger argues that an empirically adequate theory of predicate-argument agreement requires recourse to an operation, whose obligatoriness is a grammatical primitive not reducible to representational properties, but whose successful culmination is not enforced by the grammar. Preminger's argument counters contemporary approaches that find the obligatoriness of predicate-argument agreement enforced through representational means.

The most prominent of these is Chomsky's "interpretability"-based proposal, in which the obligatoriness of predicate-argument agreement is enforced through derivational time bombs. Preminger presents an empirical argument against contemporary approaches that seek to derive the obligatory nature of predicate-argument agreement exclusively from derivational time bombs. He offers instead an alternative account based on the notion of obligatory operations better suited to the facts. The crucial data involves utterances that inescapably involve attempted-but-failed agreement and are nonetheless fully grammatical. Preminger combines a detailed empirical investigation of agreement phenomena in the Kichean (Mayan) languages, Zulu (Bantu), Basque, Icelandic, and French with an extensive and rigorous theoretical exploration of the far-reaching consequences of these data. The result is a novel proposal that has profound implications for the formalism that the theory of grammar uses to derive obligatory processes and properties.

Phrasal and Clausal Architecture Simin Karimi,Vida Samiian,Wendy K. Wilkins,2007-02-21 The present collection includes papers that address a wide range of syntactic phenomena. In some, the authors discuss such major syntactic properties as clausal architecture, syntactic labels and derivation, and the nature of features and their role with respect to movement, agreement, and event-related constructions. In addition, several papers offer syntax-based discussions of aspects of acquisition, pedagogy, and neurolinguistics, addressing issues related to case marking, negation, thematic relations, and more. Several papers report on new findings relevant to less commonly investigated languages, and all provide valuable observations related to natural language syntactic properties, many of which are universal in their implications. The authors challenge several aspects of recent syntactic theory, broaden the applicable scope of others, and introduce important and provocative analyses that bear on current issues in linguistics.
