**Islamic History** R. Stephen Humphreys, 2020-06-16

This book will be immensely helpful to those who wish to orient themselves to what has become a very large body of literature on medieval Islamic history. Combining a bibliographic study with an inquiry into method, it opens with a survey of the principal reference tools available to historians of Islam and a systematic review of the sources they will confront. Problems of method are then examined in a series of chapters, each exploring a broad topic in the social and political history of the Middle East and North Africa between A.D. 600 and 1500. The topics selected represent a cross-section of Islamic historical studies, and range from the struggles for power within the early Islamic community to the life of the peasantry. Each chapter pursues four questions. What concrete research problems are likely to be most challenging and productive? What resources do we possess for dealing with these problems? What strategies can we devise to exploit our resources most effectively? What is the current state of the scholarly literature for the topic under study?

**The principles of the American law of contracts at law and in equity** J.D. Lawson, 1892

The London and New York Stock Exchanges 1850-1914 (Routledge Revivals) Ranald

Michie, 2012-08-06 First published in 1987, this is a reissue of the first book to offer a detailed comparison of two of the foremost stock exchanges in world before 1914. It is not only an exercise in comparative economic history but it also relates these institutions to wider world markets, thereby clarifying their functions and how they related to the general financial and economic framework. Students and researchers in economic and social history will welcome the reissue of this groundbreaking account of two historically important institutions in a crucial period of their development. Financial practitioners and others will also find much of interest here, in terms of both fascinating history and of insights into an era when a global market was rapidly evolving largely free of the twentieth-century distortions and hindrances introduced by wars, interventionist governments and exchange controls.

*Linguistic Derivations and Filtering* Hans  
Broekhuis,Ralf Vogel,2013 This volume focuses on  
the role of the postulated derivational and  
filtering devices in current linguistic theory and  
aims to promote the exchange of ideas between the  
proponents of MP and OT in order to evaluate the  
role of these devices in the two frameworks. It  
sheds more light on the tenability of the often  
proclaimed opinion that MP and OT are incompatible  
frameworks given that the explanatory power of the  
former mainly resides on the generative device  
whereas the explanatory power of the latter mainly  
resides in the filtering device. Papers from  
various perspectives discuss and compare the two  
devices in the two frameworks. The volume thus  
collects a large number of the arguments in favour  
of more a strictly derivational approach, a more  
strictly filtering approach, or a more hybrid  
approach. The book will be of interest to any  
researcher or advanced student in Linguistic  
Theory. It is more specifically directed to  
syntacticians working within the current  
frameworks that have developed from Chomsky's  
minimalist program (MP) and Prince and Smolensky's  
Optimality Theory (OT).

**Subjects, Expletives, and the EPP** Peter

Svenonius,2002-09-19 This collection of previously unpublished articles examines Noam Chomsky's Extended Projection Principle and its relationship to subjects and expletives (works like it that stand for other words). Re-examining Chomsky's proposition that each clause must have a subject, these articles represent the current state of the debate, particularly with respect to the theory's universal applicability across languages.

Presenting an international and highly respected group of contributors, the volume explores these questions in a variety of languages, including Italian, Finnish, Icelandic, and Hungarian.

#### **The Young Hegelians and Karl Marx** David

McLellan,1993 The premis of this study is that Marx's world view was very much a product of its time, and as such, it can only be understood in relation to the intellectual climate in which it was conceived. In this text, the author examines the influential force of the Young Hegelian movement, and discusses the work of the leading Young Hegelians, including Bruno Bauer, Feuerbach, Stirner and Hess - and their influence on Marx.

#### Theory and Description in Generative Syntax

Liliane M. V. Haegeman,2009-04-09 This book offers a detailed description and analysis of West Flemish, a dialect of Dutch, within the framework of Government and Binding Theory. The study focusses on two constructions: the doubling of subject pronouns, and the order of verb phrase constituents. For each construction the book gives a rigorous account of the data, and a theoretical analysis. It demonstrates how recent developments in generative syntax can help to explain the

properties of individual dialects. Liliane Haegeman combines expertise in theoretical linguistics and traditional philology. Her study blends rigourous description of a little-studied dialect with considerable theoretical sophistication and insight. It will be welcomed by all linguists with an interest in generative syntax, as well as those interested in the Germanic languages.

**The Syntax of Ellipsis** Jeroen Van Craenenbroeck, 2010-02-22 The Syntax of Ellipsis investigates a number of elliptical constructions found in Dutch dialects within the framework of the Minimalist Program. Using two case studies, Van Craenenbroeck argues that both the PF-deletion and the pro-theory of ellipsis are needed to account for the full range of elliptical phenomena attested in natural language. The first case study focuses on instances of stranding to the right of a sluiced wh-phrase: prepositions in English (What about?) and demonstrative pronouns in southern Dutch dialects (Wie dat? 'who that'). Van Craenenbroeck gives both of these phenomena a PF-deletion analysis, which turns out to have considerable repercussions for the structure of the left periphery and the syntax of wh-movement. Specifically, while minimal wh-phrases move from their IP-internal base position to specCP, complex ones are base-generated in the (split) left periphery. The second case study is concerned with Short Do Replies in southern Dutch dialects, a type of contradictory reply that at first sight bears a close resemblance to English VP-ellipsis. Van Craenenbroeck shows that in this case the

ellipsis site is best represented as a null, structureless proform that is licensed by the head of a high PolP. Moreover, this pronominal is argued to occur in two other dialectal constructions as well: contradictory replies of the type *Da's nie* 'that is not' found in Brabant Dutch, and the occurrence of subject clitics and agreement endings on the words for yes and no in Southern Dutch dialects (e.g. *Ja-n-s* 'yes-PLURAL-they'). The Syntax of Ellipsis will be of interest to scholars of the left periphery, wh-movement, and Dutch dialects.

### **Agreement and Its Failures Omer**

Preminger, 2014-09-12 A novel proposal regarding predicate-argument agreement that combines detailed empirical investigation with rigorous theoretical discussion. In this book, Omer Preminger investigates how the obligatory nature of predicate-argument agreement is enforced by the grammar. Preminger argues that an empirically adequate theory of predicate-argument agreement requires recourse to an operation, whose obligatoriness is a grammatical primitive not reducible to representational properties, but whose successful culmination is not enforced by the grammar. Preminger's argument counters contemporary approaches that find the obligatoriness of predicate-argument agreement enforced through representational means. The most prominent of these is Chomsky's "interpretability"-based proposal, in which the obligatoriness of predicate-argument agreement is enforced through derivational time bombs. Preminger presents an empirical argument against

contemporary approaches that seek to derive the obligatory nature of predicate-argument agreement exclusively from derivational time bombs. He offers instead an alternative account based on the notion of obligatory operations better suited to the facts. The crucial data involves utterances that inescapably involve attempted-but-failed agreement and are nonetheless fully grammatical. Preminger combines a detailed empirical investigation of agreement phenomena in the Kichean (Mayan) languages, Zulu (Bantu), Basque, Icelandic, and French with an extensive and rigorous theoretical exploration of the far-reaching consequences of these data. The result is a novel proposal that has profound implications for the formalism that the theory of grammar uses to derive obligatory processes and properties.

**Phrasal and Clausal Architecture** Simin

Karimi, Vida Samiian, Wendy K. Wilkins, 2007-02-21

The present collection includes papers that address a wide range of syntactic phenomena. In some, the authors discuss such major syntactic properties as clausal architecture, syntactic labels and derivation, and the nature of features and their role with respect to movement, agreement, and event-related constructions. In addition, several papers offer syntax-based discussions of aspects of acquisition, pedagogy, and neurolinguistics, addressing issues related to case marking, negation, thematic relations, and more. Several papers report on new findings relevant to less commonly investigated languages, and all provide valuable observations related to natural language syntactic properties, many of

which are universal in their implications. The authors challenge several aspects of recent syntactic theory, broaden the applicable scope of others, and introduce important and provocative analyses that bear on current issues in linguistics.

**A Survey of Linguistic Science** William Orr

*Finiteness* Irina Nikolaeva, 2007 This book explores the nature of finiteness, clarifying what it is and establishing its usefulness and limitations. Leading scholars look from a range of perspectives at how finiteness is conceived in formal and functional theories of grammar; at its cross-linguistic manifestations; at the finite/nonfinite opposition in individual languages; and at the role of finiteness in linguistic change and linguistic development. The book is written and structured to appeal to scholars and students of syntax and general linguistics at graduate level and above.
