Combinatorial Maps Guillaume Damiand,Pascal Lienhardt,2014-09-19 A Versatile Framework for Handling Subdivided Geometric Objects Combinatorial Maps: Efficient Data Structures for Computer Graphics and Image Processing gathers important ideas related to combinatorial maps and explains how the maps are applied in geometric modeling and image processing. It focuses on two subclasses of combinatorial maps: n-Gmaps and n-maps. Suitable for researchers and graduate students in geometric modeling, computational and discrete geometry, computer graphics, and image processing and analysis, the book presents the data structures, operations, and algorithms that are useful in handling subdivided geometric objects. It shows how to study data structures for the explicit representation of subdivided geometric objects and describes operations for handling the structures. The book also illustrates results of the design of data structures and operations.

Caste and Gender in Contemporary India Supurna Banerjee,Nandini Ghosh,2018-09-17 This book explores the intersectional aspects of caste and gender in India that contribute to the multiple marginalities and oppressions of lower castes, with particular reference to Dalits, Muslims and women. It moves beyond the conventional accounts of experiences of women in unequal social and political relationships to examine how caste as a system and ideology shapes hegemonic masculinity and feminization of work, and thus contributes to the violence against women. The volume looks at their everyday lived realities within and across diverse social and political contexts – families, education systems, labour, communities, political parties, power, social organisations, the politics of representation and the writing of the subaltern women. With a range of empirical work, it brings forth the complexities of identity politics and further analyses its limits in regional and historical frameworks. This book will be of interest to students, scholars and specialists in caste and gender studies, exclusion and discrimination studies, sociology and social anthropology, history and political science. It will also be useful to Dalit writers and people working in the development sector in India.

The Growth of Social Knowledge Jacek Szmataka,Michael Lovaglia,Kinga Wysienska,2002-10-30 This timely, comprehensive analysis of the latest advances in group processes research shows how cutting edge technologies, such as laboratory experiments, simulations, and complex systems combine with the rigor of cumulative research programs to change the way we see the social world. Group processes researchers study society scientifically, and have used sociological theory to build scientific, cumulative knowledge about the social world. Over the last 20 years, they have been extremely successful in advancing this knowledge through the reciprocal interplay of theory and experiment. The synthesis of such knowledge—uniting theory, simulation, and experiment—provides substantive explanations for social phenomena and predictions about events in complex social systems. This volume explores aspects of this synthesis from the perspective of group processes research. Providing deep analyses of methodological issues related to the synthesis of the theories, simulations, and experiments of group processes research, the authors also offer empirical examples of various studies that have been conducted. They investigate the ways in which theoretical research programs coordinate theory and empirical research in sociology to produce scientific progress and how computer simulations have evolved into an important component of theoretical research programs. This illustration of the relationships between theory construction and the method of theory verification advances our understanding of the field and may lead to a radical shift in the methodology and substance of modern social science.

In what follows, there are some discussion and literature reviews about them. \\ First article is titled ``properties of SuperHyperGraph and neutrosophic SuperHyperGraph'' in \textbf{Ref.} \cite{HG1} by Henry Garrett (2022). It's first step toward the research on neutrosophic SuperHyperGraphs. This research article is published on the journal ``Neutrosophic Sets and Systems'' in issue 49 and the pages 531-561. In this research article, different types of notions like dominating, resolving, coloring, Eulerian(Hamiltonian) neutrosophic path, n-Eulerian(Hamiltonian) neutrosophic path, zero forcing number, zero forcing neutrosophic- number, independent number, independent neutrosophic-number, clique number, clique neutrosophic-number, matching number, matching neutrosophic-number, girth, neutrosophic girth, 1-zero-forcing number, 1-zero- forcing neutrosophic-number, failed 1-zero-forcing number, failed 1-zero-forcing neutrosophic-number, global- offensive alliance, t-offensive alliance, t-defensive alliance,

Tissue Renin-Angiotensin Systems Amal K. Mukhopadhyay, Mohan K. Raizada, 2013-11-22 Recent progress in recombinant DNA technology and the availability of a number of nonpeptide subtype-specific receptor antagonists and of specific antibodies to components of prorenin-renin-angiotensin system (PRAS) have led to rapid advances in the understanding of the multifaceted role of angiotensin II, classically known as a peptide hormone of cardiovascular homeostasis. Accumulating evidence suggests responsible for the regulation gestures that, in addition to its role in salt and water metabolism, PRAS may control other physiological functions including neurosecretion, cellular proliferation, hypertrophy and/or differentiation, angiogenesis and gonadal function. At the same time, it is becoming evident that the specialized functions of endocrine glands are not only regulated by trophic hormones but also by locally produced paracrine/autocrine factors. The concept is emerging that tissue PRAS is one such locally active regulatory system. With more and more reproductive and endocrine organs being added to the list of tissues that contain a local tissue PRAS, questions are being raised by the reproductive biologists and endocrinologists as to the role of such systems in the tissues of their interest. On the other hand, the cardiovascular and renovascular physiologists are wondering about the relevance of PRAS in various peripheral tissues compared to those of the classical cardiovascular organs. It appeared, therefore, that the time was ripe for a meeting to consider a merger of interest in these two important but heretofore distinct areas of physiology.

In what follows, there are some discussion and literature reviews about them. \\ First article is titled ``properties of SuperHyperGraph and neutrosophic SuperHyperGraph'' in \textbf{[Ref.] \cite{HG1}} by Henry Garrett (2022). It's first step toward the research on neutrosophic SuperHyperGraphs. This research article is published on the journal ``Neutrosophic Sets and Systems'' in issue 49 and the pages 531-561. In this research article, different types of notions like dominating, resolving, coloring, Eulerian(Hamiltonian) neutrosophic path, n-Eulerian(Hamiltonian) neutrosophic path, zero forcing number, zero forcing neutrosophic- number, independent number, independent neutrosophic-number, clique number, clique neutrosophic-number, matching number, matching neutrosophic-number, girth, neutrosophic girth, 1-zero-forcing number, 1-zero- forcing neutrosophic-number, failed 1-zero-forcing number, failed 1-zero-forcing neutrosophic-number, global- offensive alliance, t-offensive alliance, t-defensive alliance, t-powerful alliance, and global-powerful alliance are defined in SuperHyperGraph and neutrosophic SuperHyperGraph. Some Classes of SuperHyperGraph and Neutrosophic SuperHyperGraph are cases of research. Some results are applied in family of SuperHyperGraph and neutrosophic SuperHyperGraph. Thus this research article has concentrated on the vast notions and introducing the majority of notions. \\ The seminal paper and groundbreaking article is titled ``neutrosophic co-degree and neutrosophic degree alongside chromatic numbers in the setting of some classes related to neutrosophic hypergraphs'' in \textbf{[Ref.] \cite{HG2}} by Henry Garrett (2022). In this research article, a novel approach is implemented on SuperHyperGraph and neutrosophic SuperHyperGraph based on general forms without using neutrosophic classes of neutrosophic SuperHyperGraph. It's published in prestigious and fancy journal is entitled “Journal of Current Trends in Computer Science Research (JCTCSR)” with abbreviation ``J Curr Trends Comp Sci Res'' in volume 1 and issue 1 with pages 06-14. The research article studies deeply with choosing neutrosophic hypergraphs instead of neutrosophic SuperHyperGraph. It's the breakthrough toward

independent results based on initial background. \\ The seminal paper and groundbreaking article is titled ``Super Hyper Dominating and Super Hyper Resolving on Neutrosophic Super Hyper Graphs and Their Directions in Game Theory and Neutrosophic Super Hyper Classes'' in \textbf{Ref.} \cite{HG3} by Henry Garrett (2022). In this research article, a novel approach is implemented on SuperHyperGraph and neutrosophic SuperHyperGraph based on fundamental SuperHyperNumber and using neutrosophic SuperHyperClasses of neutrosophic SuperHyperGraph. It's published in prestigious and fancy journal is entitled “Journal of Mathematical Techniques and Computational Mathematics(JMTCM)” with abbreviation ``J Math Techniques Comput Math'' in volume 1 and issue 3 with pages 242-263. The Evolution of the Use of Mathematics in Cancer Research Pedro Jose Gutiérrez Diez, Irma H. Russo, Jose Russo, 2012-02-17 The book will provide an exhaustive and clear explanation of how Statistics, Mathematics and Informatics have been used in cancer research, and seeks to help cancer researchers in achieving their objectives. To do so, state-of-the-art Biostatistics, Biomathematics and Bioinformatics methods will be described and discussed in detail through illustrative and capital examples taken from cancer research work already published. The book will provide a guide for cancer researchers in using Statistics, Mathematics and Informatics, clarifying the contribution of these logical sciences to the study of cancer, thoroughly explaining their procedures and methods, and providing criteria to their appropriate use.

Machine Learning Ryszard S. Michalski, George Tecuci, 1994-02-09 Multistrategy learning is one of the newest and most promising research directions in the development of machine learning systems. The objectives of research in this area are to study trade-offs between different learning strategies and to develop learning systems that employ multiple types of inference or computational paradigms in a learning process. Multistrategy systems offer significant advantages over monostategy systems. They are more flexible in the type of input they can learn from and the type of knowledge they can acquire. As a consequence, multistrategy systems have the potential to be applicable to a wide range of practical problems. This volume is the first book in this fast growing field. It contains a selection of contributions by leading researchers specializing in this area. See below for earlier volumes in the series.

Stable Isotope Geochemistry John W. Valley, David R. Cole, 2018-12-17 Volume 43 of Reviews in Mineralogy and Geochemistry follows the 1986 Reviews in Mineralogy (Vol. 16) in approach but reflects significant changes in the field of Stable Isotope Geochemistry. In terms of new technology, new sub-disciplines, and numbers of researchers, the field has changed more in the past decade than in any other since that of its birth. Unlike the 1986 volume, which was restricted to high temperature fields, this book covers a wider range of disciplines. However, it would not be possible to fit a comprehensive review into a single volume. Our goal is to provide state-of-the-art reviews in chosen subjects that have emerged or advanced greatly since 1986. This volume was prepared for Short Course on Stable Isotope Geochemistry presented November 2-4, 2001 in conjunction with the annual meetings of the Geological Society of America in Boston, Massachusetts.

Derived Coordination Philipp Weisser, 2015-09-14 This monograph explores the different types of clausal relations in the world's languages. In the recent literature, there have been claims that the strict dichotomy of subordination and coordination cannot be maintained since some constructions seem to be in between these two categories. This study investigates these constructions in detail. The first part is concerned with clause chaining constructions, while the second is concerned with different cases of asymmetric coordination in English. In both parts, it is shown that the different tests to distinguish clausal relations indeed yield different results for the specific constructions. This poses a severe challenge for the established theories of clausal relations. However, as it is argued, recent analyses of

coordination provide for the possibility to map a subordinate structure onto a coordinate one by means of regular transformational rules. It is shown that a single movement step derives all the peculiar properties of the phenomena in question. This book thus provides the first comprehensive solution for a long-standing problem in theoretical syntax.

Scars of Vietnam Harry Spiller,2017-01-27 A Marine Corps recruiter returns to his old stamping grounds to speak with some of the men he enlisted, their families, and the families of others who were killed in action. Some remember their experience with a sense of patriotism; others are bitter and feel forgotten by their country. The 17 accounts are a reminder of the horrors of war, and the lasting effects of its aftermath.
