**Stochastic Dynamics of Structures** Abdelkhalak El Hami, Bouchaib Radi, 2016-11-22 This book is dedicated to the general study of the dynamics of mechanical structures with consideration of uncertainties. The goal is to get the appropriate forms of a part in minimizing a given criterion. In all fields of structural mechanics, the impact of good design of a room is very important to its strength, its life and its use in service. The development of the engineer's art requires considerable effort to constantly improve structural design techniques.

Islamic History R. Stephen Humphreys, 2020-06-16 This book will be immensely helpful to those who wish to orient themselves to what has become a very large body of literature on medieval Islamic history. Combining a bibliographic study with an inquiry into method, it opens with a survey of the principal reference tools available to historians of Islam and a systematic review of the sources they will confront. Problems of method are then examined in a series of chapters, each exploring a broad topic in the social and political history of the Middle East and North Africa between A.D. 600 and 1500. The topics selected represent a cross-section of Islamic historical studies, and range from the struggles for power within the early Islamic community to the life of the peasantry. Each chapter pursues four questions. What concrete research problems are likely to be most challenging and productive? What resources do we possess for dealing with these problems? What strategies can we devise to exploit our resources most effectively? What is the current state of the scholarly literature for the topic under study?

**Stability of Structures by Finite Element Methods** Z. Waszczyszyn, Cz. Cichon, M. Radwanska, 2013-10-22 This book is the consequence of research undertaken by the authors in the field of advanced problems of structural mechanics. Stability analysis of structures comes under this

strict dichotomy of subordination and coordination cannot be maintained since some constructions seem to be in between these two categories. This study investigates these constructions in detail. The first part is concerned with clause chaining constructions, while the second is concerned with different cases of asymmetric coordination in English. In both parts, it is shown that the different tests to distinguish clausal relations indeed yield different results for the specific constructions. This poses a severe challenge for the established theories of clausal relations. However, as it is argued, recent analyses of coordination provide for the possibility to map a subordinate structure onto a coordinate one by means of regular transformational rules. It is shown that a single movement step derives all the peculiar properties of the phenomena in question. This book thus provides the first comprehensive solution for a long-standing problem in theoretical syntax.

*Images (II)* Veronika Bernard, Serhan Oksay, 2013 IMAGES (II) - Images of the Poor offers readers a cross-section of current research on the perception of poverty and on contemporary and historical representations of poverty coming from a variety of fields in people's daily lives. The fact that the international group of contributors to this book come from very different cultural, ideological, scientific/academic perspectives, and backgrounds is adding even more to the diversity of thought and ideas documented. The arguments presented help to raise the social awareness needed to break the vicious circle of poverty. (Series: Anthropology / Ethnologie - Vol. 52)

**The Pantokrator Monastery in Constantinople** Sofia Kotzabassi, 2013-10-14 The Monastery of Pantokrator, founded by John II Komnenos and his wife Piroška-Irene, is not only one of the most important and most impressive monastic complexes of the Komnenian age, it is also one of the few to occupy a key position in the life of Constantinople in the Palaiologan age, given that its mortuary chapel (Heron) was also the last resting place of many members of the latter dynasty. The first attempt to chronicle its history, based on the texts known at the time, was undertaken by G. Moravcsik (1932). Interest was rekindled by P. Gautier's critical edition of its Typikon (1971), and more recently by restoration work on its buildings. This volume brings together a comprehensive selection of all the texts concerning or connected with the Monastery of Pantokrator, and through them it demonstrates the Monastery's importance and its role throughout the history of the Byzantine Empire—a role that has received insufficient attention, given that older studies have tended to focus on the 12th century. The texts cover the situation in Constantinople before the Monastery was founded, the historical and cultural context within which it was established, its Typikon (monastic formulary), the descriptions of Slav and Western travellers, the Byzantine texts (homiletic, historical, hagiographic, and poetic) relating to the Monastery and its history from the 12th to the 15th century, the Byzantine officials associated with it, and the celebration of the principal festivals in its churches. It also contains critical editions of and commentaries on the two versions of the Synaxarion of Irene Komnene, a speech referring to the Empress's associate in the construction of the Monastery, another on the translation of the icon of St. Demetrios from the Church of St. Demetrios in Thessalonica to the Monastery of Pantokrator, an Office of the Translation of the Holy Stone, the verse Synaxarion composed for the consecration of the Monastery, and the known and unpublished poems by Byzantine poets (12th-15th c.) relating to it, as well as an extensive bibliography.
