Islamic History R. Stephen Humphreys, 2020-06-16 This book will be immensely helpful to those who wish to orient themselves to what has become a very large body of literature on medieval Islamic history. Combining a bibliographic study with an inquiry into method, it opens with a survey of the principal reference tools available to historians of Islam and a systematic review of the sources they will confront. Problems of method are then examined in a series of chapters, each exploring a broad topic in the social and political history of the Middle East and North Africa between A.D. 600 and 1500. The topics selected represent a cross-section of Islamic historical studies, and range from the struggles for power within the early Islamic community to the life of the peasantry. Each chapter pursues four questions. What concrete research problems are likely to be most challenging and productive? What resources do we possess for dealing with these problems? What strategies can we devise to exploit our resources most effectively? What is the current state of the scholarly literature for the topic under study?

Email Hoaxes Theresa Heyd, 2008-04-02 How genres emerge and evolve on the Internet has become one of the central questions in studies of computer-mediated communication (CMC). This book addresses the issue of genrefication by giving an in-depth analysis of email hoaxes as a candidate for digital genre status. Email hoaxes are deceptive messages that spread in digital social networks; they are a fascinating object for discourse linguistics as they exemplify a major pragmatic tendency in CMC, namely deceptivity and a lowering of sincerity standards. This study examines formal and functional aspects of email hoaxes and provides ample evidence both from a systematized corpus and in situ data collected online. Besides a structural and microlinguistic analysis, it identifies key issues such as pragmatic duality, narrativity and textual variation and change in email hoaxes. In conclusion, a digital genre model is outlined that bridges both the old/new and the formal/functional gaps and may be applied to many other digital genre ecologies.

Directors' duty for the benefit of creditors Sebastian von Thunen, 2011 English summary: The quest for adequate creditor protection rules applicable to an English private limited company established in Germany in conformity with EU law has not come to an end yet. By focusing on Directors' Duty for the Benefit of Creditors, the work looks at an English creditor protection measure which has not received much attention neither in Germany nor in England so far. The English case law is systematised and examined in detail in order to assess the relevance of this fiduciary duty for the protection of creditors in Germany. Consideration is given to economic and comparative analysis as well as to the question how the Duty for the Benefit of Creditors in Germany will be applied in German legal practice. It is suggested that the Duty for the Benefit of Creditors is potentially the most important instrument for the protection of creditors of an English private limited company established in Germany. german description: Wie kann man Gläubiger einer in Deutschland niedergelassenen englischen Limited angemessen und europarechtskonform schützen?
