Theater of State James Ball, 2019-11-15 In this innovative study of performance in international relations, James R. Ball III asks why states and their representatives come to the United Nations to perform for a global audience and how those audiences may intervene in the spectacle of global politics. Theater of State looks at key spaces in which global politics play out: in debating forums of the UN, at the International Criminal Court in The Hague, and in peacekeeping operations in Africa and the Middle East, as well as in a variety of related media productions. Ball argues that culture and politics form a unified field organized by the theatricality of its actors and the engaged spectatorship of its audiences. He provides a theory of global political spectatorship: of how the world watches itself in institutions and beyond, and of what citizens and diplomats do by watching. This study of the lived experience of spectacular politics on the world stage draws on theories of theater, performance, and politics to offer new ways of approaching issues of war, cosmopolitanism, international justice, governance, and activism. Situated at the nexus of two disciplines, performance studies and political science, this volume encourages conversations between the two so that each might offer lessons to the other.

The Seleukid Empire 281-222 BC Kyle Erickson, 2018-12-31 The Seleukids, the easternmost of the Greek-speaking dynasties which succeeded Alexander the Great, were long portrayed by historians as inherently weak and doomed to decline after the death of their remarkable first king, Seleukos (281 BC). And yet they succeeded in ruling much of the Near and Middle East for over two centuries, overcoming problems of a multi-ethnic empire. In this book an international team of young, established scholars argues that in the decades after Seleukos the empire developed flexible structures that successfully bound it together in the face of a series of catastrophes. The strength of the Seleukid realm lay not simply in its vast swathes of territory, but rather in knowing how to tie the new, frequently non-Greek, nobility to the king through mutual recognition of sovereignty.

Connections H. Peter Alesso, Craig F. Smith, 2008-01-18 In their fascinating analysis of the recent history of information technology, H. Peter Alesso and Craig F. Smith reveal the patterns in discovery and innovation that have brought us to the present tipping point. . . . A generation from now, every individual will have personally tailored access to the whole of knowledge . . . the sooner we all begin to think about how we got here, and where we're going, the better. This exciting book is an essential first step. –From the Foreword by James Burke Many people envision scientists as dispassionate characters who slavishly repeat experiments until eureka—something unexpected happens. Actually, there is a great deal more to the story of scientific discovery, but seeing the big picture is not easy. Connections: Patterns of Discovery uses the primary tools of forecasting and three archetypal patterns of discovery—Serendipity, Proof of Principle, and 1% Inspiration and 99% Perspiration—to discern relationships of past developments and synthesize a cohesive and compelling vision for the future. It challenges readers to think of the consequences of extrapolating trends, such as Moore's Law, to either reach real machine intelligence or retrench in the face of physical limitations. From this perspective, the book draws the big picture for the Information Revolution's innovations in chips, devices, software, and networks. With a Foreword by James Burke and bursting with fascinating detail throughout, Connections: Patterns of Discovery is a must-read for computer scientists, technologists, programmers, hardware and software developers, students, and anyone with an interest in tech-savvy topics.

The Hours of Richard III Anne F. Sutton, Livia Visser-Fuchs, 2024-02-29 As a person's religious convictions, especially in times past, can be considered fundamental to their character and behaviour, the nature of King Richard III's piety has been the subject of considerable debate. Much of this controversy has focused on the Book of Hours adopted by the king for his own private use following his coronation, and to which certain prayers, including that known as the 'Prayer of Richard III', were added. In *The Hours of Richard III* Ricardian experts Anne F. Sutton and Livia Visser-Fuchs explore the manuscript and the prayer's text. The manuscript (now preserved in Lambeth Palace Library) was originally produced in London around 1420 and the text shows the preoccupations of a devout man of the fifteenth century, while its decoration showcases the development of London manuscript illumination during that period. Moreover, in this analysis of the manuscript, the authors offer an insight into the personality of Richard III, one of the most controversial figures in medieval history.

Energy Efficiency in Buildings José Manuel Andújar, Sergio Gómez Melgar, 2020-04-28 Buildings are one of the main causes of the emission of greenhouse gases in the world. Europe alone is responsible for more than 30% of emissions, or about 900 million tons of CO₂ per year. Heating and air conditioning are the main cause of greenhouse gas emissions in buildings. Most buildings currently in use were built with poor energy efficiency criteria or, depending on the country and the date of construction, none at all. Therefore, regardless of whether construction regulations are becoming stricter, the real challenge nowadays is the energy rehabilitation of existing buildings. It is currently a priority to reduce (or, ideally, eliminate) the waste of energy in buildings and, at the same time, supply the necessary energy through renewable sources. The first can be achieved by improving the architectural design, construction methods, and materials used, as well as the efficiency of the facilities and systems; the second can be achieved through the integration of renewable energy (wind, solar, geothermal, etc.) in buildings. In any case, regardless of whether the energy used is renewable or not, the efficiency must always be taken into account. The most profitable and clean energy is that which is not consumed.

The Costs of International Advocacy Human Rights Watch (Organization), 2017 This report documents interventions by China at the UN that hinder UN efforts to improve human rights in China and around the world. In that sense, it is a case study of how a powerful member state works within the UN system to undermine its ability to strengthen global compliance with international human rights norms. It also examines UN responses to date, offering detailed recommendations on what UN officials and institutions can do to better protect civil society participation at the UN and safeguard the integrity of the UN human rights system. China's efforts to subvert the UN human rights system also need to be scrutinized because they have been adopted by other countries. China should not become a model for others that hope to hobble or obstruct UN human rights bodies.

Seleukid Royal Women Altay Coskun, Alex McAuley, 2016-05 The study of royal women has been one of the most dynamic fields of inquiry into the Hellenistic world (ca. 336-30 BC) and has dramatically shifted our perceptions of gender, status, and influence in the ancient world. Amid numerous works on the Ptolemies, Antigonids, and Argeads, this volume is the first to examine the roles and representations of the women of the Seleukid dynasty and its clients. These royal women were born or married into a dynasty that ruled an empire spanning dozens of cultures and languages, encompassing territory from western Asia Minor to modern-day Afghanistan. As representatives of their family's prestige, they were highly influential in shaping the culture and legacy of this Empire that spanned East and West. The contributions of this volume offer a systematic scrutiny of the representation of female Seleukids in visual and textual media. Avoiding Eurocentric perspectives in favour of embracing the diversity of the Empire, these scholars examine the interaction of Seleukid women with royal traditions ranging from Persia, Bactria, and Judaea to their Hellenistic contemporaries. The result is a landmark achievement in the study of ancient women.
