Immigrant Rights in the Shadows of Citizenship Rachel Ida Buff, 2008-08-17 Punctuated by marches across the United States in the spring of 2006, immigrant rights has reemerged as a significant and highly visible political issue. *Immigrant Rights in the Shadows of U.S. Citizenship* brings prominent activists and scholars together to examine the emergence and significance of the contemporary immigrant rights movement. Contributors place the contemporary immigrant rights movement in historical and comparative contexts by looking at the ways immigrants and their allies have staked claims to rights in the past, and by examining movements based in different communities around the United States. Scholars explain the evolution of immigration policy, and analyze current conflicts around issues of immigrant rights; activists engaged in the current movement document the ways in which coalitions have been built among immigrants from different nations, and between immigrant and native born peoples. The essays examine the ways in which questions of immigrant rights engage broader issues of identity, including gender, race, and sexuality.

Semiconductor Materials for Solar Photovoltaic Cells M. Parans Paranthaman, Winnie Wong-Ng, Raghu N. Bhattacharya, 2015-09-16 This book reviews the current status of semiconductor materials for conversion of sunlight to electricity, and highlights advances in both basic science and manufacturing. Photovoltaic (PV) solar electric technology will be a significant contributor to world energy supplies when reliable, efficient PV power products are manufactured in large volumes at low cost. Expert chapters cover the full range of semiconductor materials for solar-to-electricity conversion, from crystalline silicon and amorphous silicon to cadmium telluride, copper indium gallium sulfide selenides, dye sensitized solar cells, organic solar cells, and environmentally friendly

copper zinc tin sulfide selenides. The latest methods for synthesis and characterization of solar cell materials are described, together with techniques for measuring solar cell efficiency. Semiconductor Materials for Solar Photovoltaic Cells presents the current state of the art as well as key details about future strategies to increase the efficiency and reduce costs, with particular focus on how to reduce the gap between laboratory scale efficiency and commercial module efficiency. This book will aid materials scientists and engineers in identifying research priorities to fulfill energy needs, and will also enable researchers to understand novel semiconductor materials that are emerging in the solar market. This integrated approach also gives science and engineering students a sense of the excitement and relevance of materials science in the development of novel semiconductor materials.

Wa(h)re Archäologie Marco Kircher, 2014-03-31 Archäologie wird in populären Wissensprodukten oftmals wirkmächtig vermarktet. Marco Kircher erörtert die zentralen Spannungsfelder zwischen akademischen und publikumswirksamen Präsentationen archäologischer Forschung und zeigt ausführlich auf, welche Akteure warum welche Darstellungsformen wählen. Die Ergebnisse verschiedener Fallstudien über erfolgreiche TV-Dokumentationen (Terra X) und Sonderausstellungen (z.B. über Tutanchamun) sowie Interview-Aussagen diverser Beteiligter werden mit generellen Trends der Wissensvermittlung verknüpft. Zudem zeigt Kirchers Studie

aktuelle Tendenzen, insbesondere des Internets, auf - und liefert dadurch fächerübergreifende Impulse zum Verhältnis von Wissenschaft, Kommerzialisierung, Öffentlichkeit und Medien.

Bildungsgerechtigkeit im Diskurs Christiane Faller, 2019-01-10 Christiane Faller untersucht mit dem Begriff der Bildungsgerechtigkeit einen schillernden Terminus bildungspolitischer und erziehungswissenschaftlicher Debatten um bildungsbezogene Ungleichheiten. Dabei macht sie es sich zur Aufgabe, diesem Begriff dispositivanalytisch nachzuspüren und den Diskurs um Bildungsgerechtigkeit auf unterschiedlichen Dispositivebenen zu rekonstruieren – insbesondere im Hinblick auf die zentralen gouvernementalistischen Führungsstrategien, die an dieses Hochwertwort gekoppelt sind. Die Verbindung von Macht- und Dispositivanalyse ermöglicht es, einen bildungspolitischen Kampfbegriff unabhängig von seiner Programmatik auf seine Machteffekte hin zu befragen.

Belarus und Weimar-Deutschland: wirtschaftliche, wissenschaftlich-technische und kulturelle Beziehungen Dimitri Romanowski, 2015-06 Das vorliegende Buch behandelt ein Thema der außenpolitischen Beziehungen zwischen Belarus und Deutschland in den Jahren 1918-1932. Die Analyse dieser Zusammenarbeit zeigt die Hauptrichtungen und die Motive der Kontakte zwischen zwei Ländern unter den Bedingungen der Staatsorganisation in Belarus nach 1917, der Sozialwirtschaftspolitik der Moskauer Regierung und der Rapallopolitik zwischen Deutschland und UdSSR. Als wichtige Hauptquelle für die vorliegenden Forschungsarbeit dienen zahlreiche Materialien aus der Nationalbibliothek der Republik Belarus, dem Nationalarchiv der Republik Belarus, dem Staatsarchiv des Gebietes Vitebsk sowie die deutschen Bibliotheken und Archive (Politisches Archiv des Auswärtigen Amtes).

Tribes of Legend Jake Thornton,2012-03-14 This book contains not one, but three separate games set in the ancient Greek world of myth, magic, and monsters, ranging from full scale battles to a game for a single hero having to overcome all of the obstacles that mortals and gods in their whim and wisdom devise. So what will be your first foray into this ancient realm?

Made by Maxine Ruth Spiro,2018-10-09 Meet Maxine, an inspiring young maker who knows that with enough effort and imagination (and mistakes), it's possible to invent anything. Maxine loves making new things from old things. She loves tinkering until she has solved a problem. She also loves her pet goldfish, Milton. So when it's time for her school's pet parade, she's determined to create something that will allow Milton to march with the other animals. Finally, after trying, trying, and trying again, she discovers just the right combination of recycled odds and ends to create a fun, functional--and absolutely fabulous--solution to her predicament.

Symbolic Computing E. G. Rajan,2005 This book is a result of many years' research carried out with the purpose of evolving a logico-mathematical framework for symbolic computing. It gives a first time exposure to certain ideas and concepts related to non-numerical signal and image processing and provides certain latest technologies that may serve as a repertoire of tools that are of significant use in formulating DNA computing paradigms.

Mexico June S Beittel,2020-01-04 Mexican drug trafficking organizations (DTOs) pose the greatest crime threat to the United States and have the greatest drug trafficking influence, according to the annual U.S. Drug Enforcement Administration's (DEA's) National Drug Threat Assessment. These organizations work across the Western Hemisphere and globally. They are involved in extensive money laundering, bribery, gun trafficking, and corruption, and they cause Mexico's homicide rates to spike. They produce and traffic illicit drugs into the United States,

including heroin, methamphetamine, marijuana, and powerful synthetic opioids such as fentanyl, and they traffic South American cocaine. Over the past decade, Congress has held numerous hearings addressing violence in Mexico, U.S. counternarcotics assistance, and border security issues. Mexican DTO activities significantly affect the security of both the United States and Mexico. As Mexico's DTOs expanded their control of the opioids market, U.S. overdoses rose sharply to a record level in 2017, with more than half of the 72,000 overdose deaths (47,000) involving opioids. Although preliminary 2018 data indicate a slight decline in overdose deaths, many analysts believe trafficking continues to evolve toward opioids. The major Mexican DTOs, also referred to as transnational criminal organizations (TCOs), have continued to diversify into such crimes as human smuggling and oil theft while increasing their lucrative business in opioid supply. According to the Mexican government's latest estimates, illegally siphoned oil from Mexico's state-owned oil company costs the government about \$3 billion annually. Mexico's DTOs have been in constant flux. In 2006, four DTOs were dominant: the Tijuana/Arellano Felix organization (AFO), the Sinaloa Cartel, the Juárez/Vicente Carrillo Fuentes Organization (CFO), and the Gulf Cartel. Government operations to eliminate DTO leadership sparked organizational changes, which increased instability among the groups and violence. Over the next dozen years, Mexico's large and comparatively more stable DTOs fragmented, creating at first seven major groups, and then nine, which are briefly described in this report. The DEA has identified those nine organizations as Sinaloa, Los Zetas, Tijuana/AFO, Juárez/CFO, Beltrán Leyva, Gulf, La Familia Michoacana, the Knights Templar, and Cartel Jalisco-New Generation (CJNG). In mid-2019, leader of the long-dominant Sinaloa Cartel, Joaquin (El Chapo) Guzmán, was sentenced to life in a maximum-security U.S. prison, spurring further fracturing of a once hegemonic DTO. By some accounts, a direct effect of this fragmentation has been escalated

levels of violence. Mexico's intentional homicide rate reached new records in 2017 and 2018. In 2019, Mexico's national public security system reported more than 17,000 homicides between January and June, setting a new record. In the last months of 2019, several fragments of formerly cohesive cartels conducted flagrant acts of violence. For some Members of Congress, this situation has increased concern about a policy of returning Central American migrants to cities across the border in Mexico to await their U.S. asylum hearings in areas with some of Mexico's highest homicide rates. Mexican President Andrés Manuel López Obrador, elected in a landslide in July 2018, campaigned on fighting corruption and finding new ways to combat crime, including the drug trade. According to some analysts, challenges for López Obrador since his inauguration include a persistently ad hoc approach to security; the absence of strategic and tactical intelligence concerning an increasingly fragmented, multipolar, and opaque criminal market; and endemic corruption of Mexico's judicial and law enforcement systems. In December 2019, Genaro Garcia Luna, a former top security minister under the Felipe Calderón Administration (2006-2012), was arrested in the United States on charges he had taken enormous bribes from the Sinaloa Cartel.

The Hungarian Folk Songs Bela Bartok, 1981 Bartók's classic Hungarian Folk Music, long out of print in English, remains the standard study of a single folk musical culture. This new edition of a major work in ethnomusicology is enriched by Benjamin Suchoff's research on Bartók's notes, analyses, and observations in the New York Archive of Bartók Estate, and the volume contains: —the history of Hungarian ethnomusicology. —a discussion of the Bartók-Kodály relationship. —a comparative overview of Bartokian and other Hungarian approaches to the systematic classification of Hungarian musical folklore, —a review of related literature with emphasis on variant relationships based on data extracted from source materials published as recently as 1979, and —previously

unavailable or new data on Bartók's biography, research methods, and approach to musical composition. The volume also includes a tabulation of material, compiled in accordance with Bartók's innovative procedure which first reached the scholarly public in the composer's 4-volume study, Yugoslav Folk Music. A computerized lexico-graphical index of themes is provided. The Bartók texts and the music examples have been enriched by the addition of Zoltán Kodály's annotations. Clarification, where needed, is achieved through the comparative study of Hungarian, German, and English drafts. Previous errata have been eliminated, and symbols have been updated in accordance with Bartokian procedures of the 1940s.

Construction Safety Rita Yi Man Li, Sun Wah Poon, 2013-03-01 A close-to-ideal blend of suburb and city, speedy construction of towers of Babylon, the sparkling proportion of glass and steel buildings' facade at night showcase the wisdom of humans. They also witness the footsteps, sweats and tears of architects and engineers. Unfortunately, these signatures of human civilizations are swathed in towering figures of construction accidents. Fretting about these on sites, different countries adopt different measures on sites. This book firstly sketches the construction accidents on sites, followed by a review on safety measures in some of the developing countries such as Bermuda, Egypt, Kuwait and China; as well as developed countries, for example, the United States, France and Singapore. It also highlights the enormous compensation costs with the courts' experiences in the United Kingdom and Hong Kong.

The American Pre-College Military School Samuel J. Rogal,2009-03-24 Both a history of the pre-college military school in the United States and a reference guide to the institutions past and present, this comprehensive work begins by discussing several notable military school founders, including Southern Industrial Institute founder Rev. Lyman Ward, New York Military Academy founder Charles Jefferson Wright, and St. John's Military Academy founder Sidney Thomas Smythe, among others. It discusses the role of religious organizations in founding and maintaining military institutions, as well as a range of other topics: faculties and administrators; curricular changes and innovations since the 19th century; escalating tuition costs and the role of money in determining a school's success or failure; and the future of the pre-college military school. A second part lists some 355 individual schools and summarizes the history of each, providing details on enrollments and tuitions.

Southern Seen Larry T. McGehee,2005 While working at the University of Tennessee in the early 1980s, Larry T.McGehee was looking for a way to share the wealth of history, politics, art, and culture with the residents of the South's small towns. He hit upon theidea of a newspaper column that would run in the region's weekly papers. Through hisstories, McGehee encouraged people to look at the people, places, and things aroundthem with a fresh set of eyes.Southern Seen collects McGehee's numerous columns exploring the South's history, inhabitants, mannerisms, food, and foibles. The book is divided into eight categories: outdoors, place, education, people, conflict, food, play, and religion. His subjects range from the outdoors and the creatures that inhabit it to the Civil

War and its battle sites to unique southern symbols and the South's particular culinary delicacies. The author celebrates the traditions and work of the harvest season and extols the beauty of migrating hummingbirds and the rare delight of a southern snowstorm. McGehee meditates on the drastic changes machines and inventions, such as air conditioning, have brought to the region, and he looks for lessons in the mighty floods that occur in the contemporary South. The columns, by turns funny and poignant, biting and sweet, celebrate the past and look to the future. The wild turkey, once common in the backcountry brush, is now an example of a vanishing forest population, and local farmers' markets strive to sustain the livelihood of embattled small family farmers. McGehee applies the legacy of the Hatfield-McCoy feuds to the regional and international strife of modern times and examines the sacrifice and contributions of the South's young men who served in the wars of the last century. He revels in the pride of each part of the region for its own unique barbecue and delights in the memories of the small-town drugstore, which offered everything from health advice to a cream soda. Through the stories of famous figures, local residents, and the folk traditions that shape everyday life, McGehee celebrates the diversity of life in the South and offers irreplaceable insights into what continues to make the region unique.
