Intellectual Talent Camilla Persson Benbow, David John Lubinski, 1996 With intelligence and academic talent a focus of national debate, such concepts as diverse classrooms, multiple intelligences, heterogeneous schooling, and learning curves are frequent topics of discussion. Based on the work of Julian C. Stanley and his landmark model for working with gifted youth, *Intellectual Talent* brings together a distinguished group of authorities to examine the dominant techniques used to educate gifted youth today and the exemplification of those techniques in various university-based programs across the country. From a review of the current research on individual differences and its relevance to intellectual talent, to descriptions of the current knowledge about educating gifted children, this book illustrates how our educational system can enhance gifted youths' academic achievement. Part One of *Intellectual Talent* examines the political ramifications of emotionally loaded findings about individual differences documenting cases in which findings that contradict prevailing social values are simply ignored. Part Two explores what is known about educating gifted children and why educators sometimes fail to act on that knowledge. Topics include genetic antecedents to human behavior, the underuse of knowledge, proper provisions for gifted students, the use of knowledge, psychometrics, and genius. *Intellectual Talent* will be of interest to professionals and

students of education and psychology, educational researchers and policymakers, parents of gifted children, and anyone concerned with fostering excellence in our nation's schools. Contributors are Betsy Jane Becker, Camilla Persson Benbow, Carol C. Blackburn, Thomas J. Bouchard, Jr., Linda E. Brody, James S. Coleman, Lee J. Cronbach, Michele Ennis, John F. Feldhusen, N. L. Colonial Modernity in Korea Gi-Wook Shin, Michael Robinson, 2020-03-23 The twelve chapters in this volume seek to overcome the nationalist paradigm of Japanese repression and exploitation versus Korean resistance that has dominated the study of Korea's colonial period (1910–1945) by adopting a more inclusive, pluralistic approach that stresses the complex relations among colonialism, modernity, and nationalism. By addressing such diverse subjects as the colonial legal system, radio, telecommunications, the rural economy, and industrialization and the formation of industrial labor, one group of essays analyzes how various aspects of modernity emerged in the colonial context and how they were mobilized by the Japanese for colonial domination, with often unexpected results. A second group examines the development of various forms of identity from nation to gender to class, particularly how aspects of colonial modernity facilitated their formation through negotiation, contestation, and

redefinition.

Colonialism in Question Frederick

Cooper, 2005-06-06 Probably the most important historian of Africa currently writing in the English language. His intellectual reach and ambition have even taken influence far beyond African studies as such, and he has become one of the major voices contributing to debates over empire, colonialism and their aftermaths. This book is a call to reinvigorate the critical way in which history can be written. Cooper takes on many of the standard beliefs passing as postcolonial theory and breathes fresh air onto them.—Michael Watts, Director of the Institute of International Studies, Berkeley This is a very much needed book: on Africa, on intellectual artisanship and on engagement in emancipatory projects. Drawing on his enormous erudition in colonial history, Cooper brings together an intellectual and a moral-political argument against a series of linked developments that privilege 'taking a stance' and in favor of studying processes of struggle through engaged scholarship.—Jane I. Guyer, author of *Marginal Gains*

A Genealogy of 'Japanese' Self-images Eiji Oguma, 2002 Eiji Oguma demonstrates that the myth of ethnic homogeneity was not established during the Meiji period, nor during the Pacific War, but only after the end of World War II. Oguma also examines how the peoples of the Japanese colonies were viewed in prewar literature on ethnic identity.

Feudalism in Japan Peter Duus, 1993 Offers a comparison between Japanese and Western political institutions in the premodern period. This title contains a brief discussion of the meaning and significance of the term Feudalism, and it suggests ways in which the term might be used for explorations in comparative history. It can serve as a reading for courses on Japanese history.

Consuming Korean Tradition in Early and Late Modernity Laurel Kendall, 2010-09-22 Contributors to this volume explore the irony of modern things made in the image of a traditional us. They describe the multifaceted ways tradition is produced and consumed within the frame of contemporary Korean life and how these processes are enabled by different apparatuses of modernity that Koreans first encountered in the early twentieth century. Commoditized goods and services first appeared in the colonial period in such spectacular and spectacularly foreign forms as department stores, restaurants, exhibitions, and staged performances. Today, these same forms have become the media through which many Koreans

consume tradition in multiple forms. In the colonial period, commercial representations of Korea—tourist sites, postcard images, souvenir miniatures, and staged performances—were produced primarily for foreign consumption, often by non-Koreans. In late modernity, efficiencies of production, communication, and transportation combine with material wealth and new patterns of leisure activity and tourism to enable the localized consumption of Korean tradition in theme parks, at sites of alternative tourism, at cultural festivals and performances, as handicrafts, art, and cuisine, and in coffee table books, broadcast music, and works of popular folklore. *Consuming Korean Tradition* offers a unique insight into how and why different signifiers of Korea have come to be valued as tradition in the present tense, the distinctive histories and contemporary anxieties that undergird this process, and how Koreans today experience their sense of a common Korean past. It offers new insights into issues of national identity, heritage preservation, tourism, performance, the commodification of contemporary life, and the nature of tradition and modernity more generally. *Consuming Korean Tradition* will prove invaluable to Koreanists and those interested in various aspects of contemporary Korean society, including anthropology, film/cultural studies, and contemporary history. Contributors: Katarzyna J. Cwiertka, Kyung-Koo Han, Keith Howard, Hyung Il Pai, Laurel Kendall, Okpyo Moon, Robert Oppenheim, Timothy R. Tangherlini, Judy Van Zile.

Multiple Modernities Shmuel N.

Eisenstadt, 2017-09-29 How may we characterize contemporary society in a world so complex? Can looking at the diverse paths followed by various cultures in the modern world generate useful new social scientific typologies, or must a different set of questions be posed in this era of globalization? What, in short, is the nature of modernity? These are some of the questions addressed by the contributors to *Multiple Modernities*. Following the theme in an earlier work edited by Shmuel Eisenstadt, *Public Spheres and Collective Identities*, this book challenges conventional notions of how the world has changed politically, socially, and economically. The authors consider the meaning of modernity in contexts as different as communist Russia, modern India, the Muslim world, Latin America, China and East Asia, and the United States. Miscegenation, transnational migration, technological developments, and changing communications have shifted the ground on which theories of society were once built; political system, diaspora groups, religion, and classical theories of modernity have to be reconsidered in a new context. Authors and chapters include: S.N. Eisenstadt, *Multiple Modernities*; Björn Wittrock, *Modernity: One, None, or Many? European Origins and Modernity as a Global Condition*; Johann P. Arnason, *Communism and Modernity*; Nilfer Glez, *Snapshots of Islamic Modernities*; Dale F. Eickelman, *Island and the Languages of Modernity*; Sudipta Kaviraj, *Modernity and Politics in India*; Stanley J. Tambiah, *Transnational Movements*,

Diaspora, and Multiple Modernities; Tu Weiming, Implications of the Rise of 'Confucian' East Asia; Jürgen Heideking, The Pattern of American Modernity from the Revolution to the Civil War; and Renato Ortiz, From Incomplete Modernity to World Modernity. Written in clear and non-technical language for both a scholarly and general audience, this volume confronts the problem of just what constitutes the common core of modernity
