The Theological and Ecological Vision of Laudato Si' ,2017-07-27 This volume provides a comprehensive introduction to the spiritual, moral and practical themes of Pope Francis' encyclical Laudato Si'. Leading theologians, ethicists, scientists and economists provide accessible overviews of the encyclical's major teachings, the science it engages and the policies required to address the climate crisis. Chapters on the encyclical's theological and moral teachings situate them within the Christian tradition and papal teaching. Science and policy chapters, engaging the encyclical and provide introductions to the Fifth Assessment Report of the Intergovernmental Panel on Climate Change. The book provides a guide for those wishing to explore the issues raised by Laudato Si' but who lack the specialist knowledge required to know where to begin. Aimed at an undergraduate audience, this book provides a reliable introduction to the major themes of Laudato Si' such as: - a theology of Creation that embraces the insights of contemporary science - a renewed understanding of the human person in relationship to the rest of creation - a spiritual vision of love and responsibility for all creation - the necessary connection between Christian solidarity with the poor and concern for the environment - an introduction to the social encyclical tradition from which Laudato Si' both draws and develops

Online Music Distribution - How Much Exclusivity Is Needed? Nikita Malevanny,2019-08-30 This book analyzes regulatory models established in the field of online music distribution, and examines their consistency with the overarching objectives of copyright law. In order to do so, the book takes a deep dive into the provisions of international treaties, EU Directives as well as the German and US copyright systems

and case law. It subsequently scrutinizes the identified regulatory models from the standpoint of the copyright's objectives with regard to incentives, rewards, a level playing field, and dissemination. Lastly, it endorses the improved market-based statutory license as a preferable instrument in the online music field. The book is intended for all readers with an interest in music copyright law. Part I will especially benefit copyright scholars and practitioners seeking in-depth insights into the current legal situation regarding streaming and downloading. In turn, Part II will above all appeal to scholars interested in "law and economics" and in the theoretical foundations of online music copyright. Policy recommendations can be found in Part III.

*The Law and Politics of Engaging De Facto States* Benedikt Harzl, 2018-05-08 The secessionist entities that emerged out of the turbulent upheavals in the 1990s in the South Caucasus have, over many years and with enormous external assistance, successfully defied the jurisdiction of their metropolitan states. As entities that have attained a status of de facto statehood, they epitomize unresolved conflicts between core principles and doctrines in public international law. This study addresses the interplay between law and politics against this context and problematizes false dichotomies that have arguably hindered the transformation of these territorial disputes. The author devotes particular attention to different ways of engagement with the de facto states below the level of political endorsement.

**The Nagorno-Karabakh deadlock** Azer Babayev, Bruno Schoch, Hans-Joachim Spanger, 2019-05-02 The book examines all relevant models which have been employed in settling ethno-territorial conflicts since the time of the League of Nations. Eight of these models have been studied in-depth. The aim of this

analysis is to gain expertise and insights that could prove relevant to resolving the conflict in Nagorno-Karabakh. This potential is evaluated in the closing chapters of the volume where novel ideas on how to apply the lessons of these cases to the conflict in Nagorno-Karabakh are presented. This conflict carries many features typical of ethno-territorial conflicts in present and past times: it is neither unique, nor does its settlement depend on others than the parties to the conflict. Rather it is – as in all other cases – entrenched historical narratives and enemy images which lead to zero-sum calculations and can conceivably only be overcome in a gradual process. Content Part I Nagorno-Karabakh and ethno-territorial conflict settlement Part II Case studies of ethno-territorial conflict settlement: Åland, Bosnia and Herzegovina, Kosovo, South Tyrol, Trieste, Cyprus, Northern Ireland, Quebec. Part III Results and conclusions: A way out for Nagorno-Karabakh The Editors Dr Azer Babayev is Assistant Professor of Political Science at ADA University, Baku. Dr Bruno Schoch is Associated Researcher at PRIF (Peace Research Institute Frankfurt), Frankfurt/Main. Dr Hans-Joachim Spanger is Head of the Dissemination Division at PRIF (Peace Research Institute Frankfurt), Frankfurt/Main.

*Power Play* Jay Scherer, David Mills, Linda Sloan McCulloch, 2019-11-06 When the Rogers Place arena opened in downtown Edmonton in September 2016, no amount of buzz could drown out the rumours of manipulation, secret deals, and corporate greed undergirding the project. Working with documentary evidence and original interviews, the authors present an absorbing account of the machinations that got the arena and the adjacent Ice District built, with a price tag of more than \$600 million. The arena deal, they argue, established a costly public financing precedent that people across North America should watch

closely, as many cities consider building sports facilities for professional teams or international competitions. Their analysis brings clarity and nuance to a case shrouded in secrecy and understood by few besides political and business insiders. Power Play tells a dramatic story about clashing priorities where sports, money, and municipal power meet.

**Changing Dimensions of Human Security in Contemporary World** DR. AURORA MARTIN, DR. NANDINI BASISTHA, 2023-09-11 The world turned topsy-turvy after Covid-19 pandemic. The whole equation and thrust of global politics and economics is now at a new verge. The main question is now – how we can secure human race and humanity. This is the main thrust of the book, Changing Dimensions of Human Security in Contemporary World. This book is an outcome of collective research work done by erudite scholars from different parts of world, like USA, Russia, Japan, Australia, Romania, Nigeria, Nepal, Bangladesh and India, who has come together in search of new trends of human security. They touched upon different milieu as well as dimensions of human security and pandemic in contemporary world scenario. African Gold Roman Grynberg, Fwasa K. Singogo, 2021-04-22 The book explores the evolving economics of gold as a global commodity as well as the production and trade of gold in and from the African continent. The growth of gold as an increasingly important and diverse source of African wealth is examined, alongside the impact that the rise of China in the 21st century has had on the demand for gold. The volatility of the gold price has increased as a result of the dramatic decline of gold demand for manufacturing purposes. Gold is Africa's second largest export after oil and is a perfect metaphor for a

continent rich in resources while so much of its population lives in such dire poverty. The artisanal and small scale gold mining (ASGM) sector, is surprisingly widely perceived as being beneficial to the development of Africa despite its exploitation and dreadful health and environmental consequences. **African Gold: Production, Trade and Economic Development** considers policy issues regarding the gold mining sector, the economics of beneficiation, the retreat of jewelry manufacturing across the continent as well as 'Africa's golden future'. It is a relevant book for both academics and policymakers interested in Africa, natural resource, and development economics.

**BRICS and Resistance in Africa** Justin van der Merwe, Patrick Bond, Nicole Dodd, 2019-10-15 Though initially considered a welcome counterweight to Western interest across Africa, the BRICS are increasingly being viewed as another example of foreign interference and exploitation. **BRICS and Resistance in Africa** explores the varied forms of African resistance being developed in response to the growing influence of the BRICS. Its case studies cover such instances as the opposition to China's One Belt One Road initiative in East Africa; resistance to the BRICS' oil activities in the Niger Delta; and the role of the BRICS in Zimbabwe's political transition. The contributors expose the contradictions between the group's rhetoric and its real impact, as well as the complicity of local elites in serving as proxies for the BRICS nations. By challenging and expanding the debates surrounding BRICS involvement in Africa, this collection offers new insight into resistance to globalization in the global South.

**The Legal Regulation of Cyber Attacks** Ioannis Iglezakis, 2020-03-19 This updated edition of a well-known comprehensive analysis of the criminalization of cyberattacks adds important new guidance to the

legal framework on cybercrime, reflecting new legislation, technological developments, and the changing nature of cybercrime itself. The focus is not only on criminal law aspects but also on issues of data protection, jurisdiction, electronic evidence, enforcement, and digital forensics. It provides a thorough analysis of the legal regulation of attacks against information systems in the European, international, and comparative law contexts. Among the new and continuing aspects of cybersecurity covered are the following: the conflict of cybercrime investigation and prosecution with fundamental rights to privacy and freedom of expression; the 2016 Directive on security of network and information systems (NIS Directive); the General Data Protection Regulation (GDPR); the role of national computer security incident response teams (CSIRTs); the European Union (EU) response to new technologies involving payment instruments, including virtual currencies and digital wallets; the EU Commission's legislative proposals to enhance cross-border gathering of electronic evidence; internet service providers' role in fighting cybercrime; measures combatting identity theft, spyware, and malware; states and legal persons as perpetrators of cybercrime; and the security and data breach notification as a compliance and transparency tool. Technical definitions, case laws, and analysis of both substantive law and procedural law contribute to a comprehensive understanding of cybercrime regulation and its current evolution in practice. Addressing a topic of growing importance in unprecedented detail, this new edition of a much-relied-upon resource will be welcomed by professionals and authorities dealing with cybercrime, including lawyers, judges, academics, security professionals, information technology experts, and law enforcement agencies.

*Продажные журналисты. Любая правда за ваши деньги* Удо Ульфкотте, 2015-05-21 В книге известного немецкого журналиста Удо Ульфкотте ярко, конкретно и подробно описана ситуация в германских средствах массовой информации, погрязших в коррупции, взяточничестве и политической ангажированности. Скрытая реклама и открытый пиар, проплаченные статьи и телепередачи, замалчивание одних и раздувание других фактов в интересах правящей элиты или коммерческих компаний – вот далеко не полный инструментарий немецких «акул пера». Важным достоинством книги является откровенное признание автора в собственном прошлом участии в оболванивании и промывке мозгов читателей. Работая в крупнейшей газете «Франкфуртер альгемайне цайтунг» на высоких должностях, он был как никто другой осведомлен о способах подкупа представителей «четвертой власти». Вы узнаете, какой предлог придумали США для начала войны в Ираке; как урановые боеприпасы НАТО на Балканах стали безвредными; как заманивали Болгарию и Румынию в ЕС; как американские и британские спецслужбы подтасовывали результаты опросов; как насильственно вводили евро в Германии; зачем была предпринята попытка обелить Гитлера; почему немецкие СМИ обвинили Россию в крушении малайзийского «Боинга» на Украине. В настоящее время автор работает над продолжением своих разоблачительных материалов.

**La péninsule arabique** Frank Tétart, 2017-09-27 Arabie saoudite, Émirats arabes unis, Koweït, Oman,

Qatar, Yémen : la péninsule Arabique a toujours constitué un lieu de passage entre Europe, Afrique et Asie. Berceau de l'islam, dont elle abrite les villes saintes de La Mecque et Médine, son espace s'est construit au gré des intérêts géopolitiques, si bien qu'il est à présent au coeur de la mondialisation des échanges. Espace convoité, son attractivité économique et stratégique a fait émerger de nombreuses tensions entre les États de la zone et a exacerbé les fractures existantes aux niveaux religieux (chiites/sunnites), ethnique (Perses/Arabes) et politique (Iran/Arabie saoudite). Parallèlement la péninsule, confrontée au défi de la fin de la rente pétrolière, doit entreprendre une diversification rapide de son économie. Pour saisir les spécificités de cet espace-clé, cet ouvrage propose une géographie complète à la fois géohistorique, géoéconomique et géopolitique de ce qui constitue aujourd'hui le véritable coeur du Moyen-Orient. Avec un atlas en couleur réalisé en partenariat avec la revue *Moyen-Orient*.

Le 22 janvier 2020, le Centre for International Affairs (CIA) a publié un rapport intitulé « The Middle East in 2030 » [1]. Ce rapport, qui a été élaboré par un groupe de travail composé de 21 experts, analyse les tendances actuelles et propose des scénarios pour l'avenir. Selon le rapport, le Moyen-Orient est une région en pleine mutation, avec une population croissante, une économie diversifiée et une instabilité politique persistante. Les tensions entre les États de la région sont toujours d'actualité, et les défis liés à la transition énergétique et à la gouvernance sont de plus en plus pressants. Le rapport souligne également l'importance de la coopération régionale et internationale pour relever ces défis et assurer un avenir pacifique et prospère pour tous les habitants du Moyen-Orient.

*As Problemáticas e os Desafios Contemporâneos em torno da Geração de Substituição* Diana Sofia Araújo

Coutinho,2023-05-31 A gestação de substituição coloca desafios a conceitos, institutos ou figuras jurídicas tradicionais, quer do Direito Contratual, quer do Direito da Família e dos Direitos Fundamentais de todas as partes envolvidas. Adicionalmente, os perigos, riscos e consequências da prática da gestação de substituição transfronteiriça têm despertado cada vez mais o interesse e a preocupação de instituições e organizações europeias e internacionais, debatendo-se a necessidade e urgência dos Estados legislarem (interna e internacionalmente) sobre o tema e, sobretudo, de garantirem os direitos da criança nascida na sequência de um contrato de gestação de substituição. Neste contexto, propomos o estudo das problemáticas e desafios da gestação de substituição, desde os seus conceitos basilares aos argumentos favoráveis ou obstativos à sua prática, incluindo o regime jurídico na ordem jurídica portuguesa e a gestação de substituição transfronteiriça.

Die Untersuchung stellt zudem Divergenzen zwischen monetären Anforderungs- und Möglichkeitsstrukturen auf den Prüfstand, die in besonderer Weise von Armut gefährdete Gruppen treffen.

Essi traggono spunto dalle tematiche oggetto della produzione scientifica di Paolo Benvenuti, Professore emerito dell'Università di Roma Tre, e della sua attività finalizzata alla sensibilizzazione e diffusione della conoscenza del diritto internazionale e umanitario, anche in ambito extra-accademico.

*Economics of Information Biasing* Monowar Zaman, 2021-12-07 This book describes a new scientific paradigm of economics that unifies the diverse thoughts of economics to provide a simplified but holistic view of real-world economic and social structures. It goes deep into very fundamental dynamics of rational behavior of economic agents with respect to information sharing amid their diverse self-interests. In a real-world economy, the probability of achieving Pareto efficiency for a subset of the population is much higher than for the whole population. This model is enhanced to describe that our market is not uniform but distributed in layers of energy states. Our social and economic institutions can be subjectively modeled as an information biasing chain where economic agents are positioned in different abstract coalitions according to the interdependence of their payoff functions. The upper layer coalitions virtually control the institutions for dominance, and they have greater influences on our markets that provoke growth by exhausting energy and other natural resources. This book contains over 100 illustrations.
