*Principles and Practice in EU Sports Law* Stephen Weatherill, 2017-08-11 *Principles & Practice in EU Sports Law* provides an overview of EU Sports Law. In particular it assesses sporting bodies' claims for legal autonomy from the 'ordinary law' of states and international organisations. Sporting bodies insist on using their expertise to create a set of globally applicable rules which should not be deviated from irrespective of the territory on which they are applied. The application of the *lex sportiva*, which refers to the conventions that define a sport's operation, is analysed, as well as how this is used in claims for sporting autonomy. The *lex sportiva* may generate conflicts with a state or international institution such as the European Union, and the motives behind sporting bodies' claims in favour of the *lex sportiva*'s autonomy may be motivated by concern to uphold its integrity or to preserve commercial gain. Stephen Weatherill's text underlines the tense relationship between *lex sportiva* and national and regional jurisdictions which is exemplified with specific focus on the EU. The development of EU sports law and its controversies are detailed, reinforced by the example of relevant legal principles in the context of the practice of sports law. The intellectual heart of the text endeavours to make a normative assessment of the strength of claims in favour of sporting autonomy, and the comparison between different jurisdictions and sports is evident. Furthermore the enduring dilemma facing sports lawyers running throughout the text is whether sport should be regarded as special, and in turn how (far) its special character should be granted legal recognition.

**Heroes of Environmental Diplomacy** Felix Dodds, Chris Spence, 2022-06-27 Today more than ever, when the world is beset by environmental, social, healthcare and economic challenges, we need courage in our politics, both nationally and globally. This book tells the stories, some for the first time, of twelve individuals who made heroic contributions to protecting our planet through ground-breaking international treaties. Can individuals change the world? Today, when impersonal forces and new technologies seem to be directing our lives and even our entire planet in ways we cannot control, this question feels more relevant than ever before. This book argues that we can all make a difference. It tells inspiring stories of individuals who have had a global impact that is beyond dispute, as well as others who have brought about change that is understated or hard to measure, where the scale of the impact will only become clear in years to come. While some are scientists, others are politicians, diplomats, activists, and even businesspeople. However, they all share the qualities of perseverance, patience, a willingness to innovate or try new approaches, and the endurance to continue over years, even decades, to pursue their goal. Drawing on interviews and the inside stories of those involved, each chapter follows one or more of these heroic individuals, a list which includes Luc Hoffmann, Mostafa Tolba, Maria Luiza Ribeiro Viotti, Raul Oyuela Estrada, Barack Obama and Paula Caballero. Presenting an uplifting and gripping narrative, this book is an invaluable resource for students, scholars, activists and professionals who are seeking to understand how consensus is reached in these global meetings and how individuals can have a genuine impact on preserving our planet and reinforcing the positive message that global cooperation can actually work.

**The Transformation of Economic Law** Lucila de Almeida, Marta Cantero Gamito, Mateja Djurovic, Kai Peter Purnhagen, 2019-09-05 This book is written in honour of Hans-W. Micklitz for his jubilee 70th birthday and the closure of his twelve-year term as the Chair for Economic Law at the European University Institute (EUI). Hans-W. Micklitz has gained international recognition for dedicating his extensive and fruitful career to diverse areas of law: European Economic Law, European Private Law, National and European Consumer Law, Legal Theory, theories of Private Law and Social Justice. W. Micklitz as his doctoral supervisees or research assistants. The collection of twenty chapters is to be read as the influence of Hans's dialogues in the early stage of the academic career of thirty-one young legal scholars. The volume is divided into three sections devoted to subjects that have received Hans's attention while at the EUI: EU Consumer Law (part I); European Private Law and Access Justice (part II); the CJEU between the individual citizen and the Member States (part III).

*The Death and Life of the Music Industry in the Digital Age* Jim Rogers, 2013-05-09 The Death and Life of the Music Industry in the Digital Age challenges the conventional wisdom that the internet is 'killing' the music industry. While technological innovations (primarily in the form of peer-to-peer file-sharing) have evolved to threaten the economic health of major transnational music companies, Rogers illustrates how those same companies have themselves formulated highly innovative response strategies to negate the harmful effects of the internet. In short, it documents how the radical transformative potential of the internet is being suppressed by legal and organisational innovations. Grounded in a social shaping perspective, *The Death and Life of the Music Industry in the Digital Age* contends that the internet has not altered pre-existing power relations in the music industry where a small handful of very large corporations have long since established an oligopolistic dominance. Furthermore, the book contends that widespread acceptance of the idea that online piracy is rampant, and music largely 'free' actually helps these major music companies in their quest to bolster their power. In doing this, the study serves to deflate much of the transformative hype and digital 'deliria' that has accompanied the internet's evolution as a medium for mass communication.

*Hit Makers* Derek Thompson, 2017 An Atlantic senior editor presents an investigation into the lucrative quality of popularity in the 21st century to share economic insights into what makes ideas, productions and products successful, --NoveList.

*Digital Renaissance* Joel Waldfogel, 2020-12-08 How digital technology is upending the traditional creative industries—and why that's a good thing The digital revolution poses a mortal threat to the major creative industries—music, publishing, television, and the movies. Cheap, easy self-producing is eroding the position of the gatekeepers and guardians of culture. Does this revolution herald the collapse of culture, as some commentators claim? Far from it. In *Digital Renaissance*, Joel Waldfogel argues that digital technology is enabling a new golden age of popular culture—a digital renaissance. Analyzing decades of production and sales data, as well as bestseller and best-of lists, Waldfogel finds that the new digital model is just as powerful at generating high-quality, successful work as the old industry model, and in many cases more so.

**Titans of the Climate** Kelly Sims Gallagher, Xiaowei Xuan, 2019-02-05 How the planet's two largest greenhouse gas emitters navigate climate policy. The United States and China together account for a disproportionate 45 percent of global carbon dioxide emissions. In 2014, then-President Obama and Chinese President Xi Jinping announced complementary efforts to limit emissions, paving the way for the Paris Agreement. And yet, with President Trump's planned withdrawal from the Paris accords and Xi's consolidation of power—as well as mutual mistrust fueled by misunderstanding—the climate future is uncertain. In *Titans of the Climate*, Kelly Sims Gallagher and Xiaowei Xuan examine how the planet's two largest greenhouse gas emitters develop and implement climate policy. Through dispassionate analysis, the authors aim to help readers understand the challenges, constraints, and opportunities in each country. Gallagher—a former U.S. climate policymaker—and Xuan—a member of a Chinese policy think tank—describe the specific drivers—political, economic, and social—of climate policies in both countries and map the differences between policy outcomes. They characterize the U.S. approach as “deliberative incrementalism”; the Chinese, meanwhile, engage in “strategic pragmatism.” Comparing the policy processes of the two countries, Gallagher

and Xuan make the case that if each country understands more about the other's goals and constraints, climate policy cooperation is more likely to succeed.

**M-Commerce** Punita Duhan,Anurag Singh,2019-03-04 This volume presents a pragmatic approach to understanding and capitalizing on contemporary m-commerce trend. It comprehensively encapsulates the evolution, emergent trends, hindrances and challenges, and customer perceptions about various facets of how physical and online retail channels are merging, blurring, and influencing each other in new ways. The rapid rise of m-commerce (or mobile commerce) has led to the emergence of new paradigms in the marketplace. The difference between physical and digital retail is diminishing, and a new “phygital retail” phenomenon is on the rise. Marketers need to understand this emerging paradigm and consider the new opportunities and challenges involved. This volume, M-Commerce: Experiencing the Phygital Retail, provides a comprehensive discussion of the contemporary m-commerce concepts along with the emerging paradigms in a pragmatic way. It presents empirical analyses and reviews on the myriad aspects of m-commerce, including both contemporary academic and business research.

**Challenging Sports Governing Bodies** Adam Lewis KC,Jonathan Taylor KC,Nick De Marco KC,James Segan,2016-09-19 Challenging Sports Governing Bodies covers the decision to challenge the actions of a sports governing body and considers the causes of action that form a basis for them. Footnotes are used to identify the leading cases for propositions in the main text and to help with finding similar and relevant cases. To ensure this work is comprehensive in its subject matter there is a short section on Remedies focusing on internal appeal routes and arbitration.

The Principle of Equality in EU Law Lucia Serena Rossi,Federico Casolari,2017-11-23 This book provides a comprehensive and updated legal analysis of the equality principle in EU law. To this end, it argues for a broad definition of the principle, which includes not only its inter-individual dimension, but also the equality of the Member States before the EU Treaties. The book presents a collection of high-quality academic and expert contributions, which, in light of the most recent developments in implementing the post-Lisbon legal framework, reflect the current interpretation of the equality principle, examining its performance in practice with a view to suggesting possible solutions in order to overcome recurring problems. To this end the volume is divided into three Parts, the first of which addresses a peculiar aspect of the EU equality that is mostly overlooked in the investigations devoted to this topic, namely, equality among States. Part II shifts to the inter-individual dimension of equality and explores some major developments

contributing to (re)shaping the global framework of EU anti-discrimination law, while Part III undertakes a more practical investigation devoted to the substantive strands of that area of EU law.

*International Investment Agreements and EU Law* Tomas Fecak, 2016-09-25 The rapidly growing number of investors' disputes with states and the approach of arbitral tribunals, perceived by some, whether rightly or not, as being too investor-friendly, underlie a contentious debate about the need to strike a more effective balance between investors' rights under international investment agreements (IIAs) and the right of states to pursue legitimate regulation in the public interest. In this regard the European Union, with the exclusive external competence in foreign direct investment vested in it under the Lisbon Treaty, is emerging as the leader and driving force in the future development of international investment law. This book examines the competence of the EU to conclude investment treaties in the light of the investment protection rules of IIAs, explores how far the EU regime for cross-border investment and investors' rights under IIAs can be considered comparable, and brings about an extensive analysis of existing agreements of Member States and their compatibility with EU law, with detailed investigation of how the potentially conflicting obligations of Member States under the two regimes can be reconciled. The book covers such elements of the debate as the following: • 'standards of treatment' under IIAs; • investment-related provisions of EU law; • dispute settlement mechanisms and the conduct of investment disputes; • how recent controversies over bilateral investment treaties (BITs) shape emerging EU international investment policy; • effect of political and institutional interests; • transitional arrangements for BITs between Member States and third countries established by Regulation 1219/2012; • CJEU decisions concerning BITs concluded between EU Member States and third countries; • significant arbitral awards involving intra-EU BITs; • allocation of international responsibility for breaches of investors' rights; • intra-EU dimension of the Energy Charter Treaty (ECT); • possibilities for review of arbitral awards by courts of Member States; • desirability of international protection of foreign investment in developed countries; and • role of the Convention on the Settlement of Investment Disputes between States and Nationals of Other States (ICSID Convention) The author provides a number of well-grounded recommendations, taking into account throughout the legitimate interests and expectations of individual investors. As an invaluable commentary on developments related to the interplay between international investment law and EU law, and a guide to ameliorating the tensions and controversies surrounding this relationship, this book will appeal to a wide variety of readers. The questions dealt with are faced not only by negotiators and others involved in policymaking in the area of foreign investment, but also by specialists in international investment law, investment arbitration, EU international relations law, and anyone involved in cross-border law, as well as others who encounter these questions in the course of their professional or academic activities.

International Arbitration in the Energy Sector Maxi Scherer, 2018-02-22 Disputes in the energy and natural resources sector are at the heart of international arbitration. With more arbitrations arising in the international energy sector than in any other sector, it is not surprising that the highest valued awards in the history of arbitration come from energy-related arbitrations. Energy disputes often involve complex and controversial issues relating to security, sovereignty, and public welfare. *International Arbitration in the Energy Sector* puts international energy disputes into a global context, providing broad coverage of different forms and systems of dispute resolution across both renewable and non-renewable sectors. With contributions from leading practitioners, arbitrators, academics, and industry experts from across the globe, the eighteen chapters in the book enable readers to compare the approaches to, and learnings from, energy arbitrations across various legal systems and geographic regions. After outlining the international

energy arbitration legal framework, the text delves into a detailed analysis of the problems which regularly arise in practice. These include, among other things, commercial disputes in Part I (e.g. over the upstream oil sector and long-term gas supply contracts), investor-state disputes in Part II (e.g. under the Energy Charter Treaty), and public international law disputes in Part III (e.g. concerning international boundaries and the distribution of natural resources). Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes, which raise important questions about enforcing sustainability objectives on individuals, corporations, and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties, and other international legal instruments, as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.

**Embedded Multi-Level Leadership in Elite Sport** Svein S. Andersen, Per Øystein Hansen, Barrie Houlihan, 2021-09-23 This book represents an alternative perspective on international elite sport systems. It focusses on the embedded multi-level nature of leadership, and the scope that this might give for degrees of leadership autonomy and discretion. The chapters show how mechanisms of leadership on different levels interact. The nature and mix of leadership mechanisms reflect values and expectations related to specific political, normative and commercial sport contexts. Three introductory chapters outline key elements of these dimensions of elite sport contexts. Seven empirical cases illustrate how national contexts facilitate and constrain leadership practices, related to specific sports across Russia, China, Ghana, Germany, Switzerland, Denmark, Norway and the US. The final chapter discusses embedded multi-level leadership from a comparative perspective. Based on the countries covered, the book distinguishes between three groups: state-dominated systems, state-elite sport partnership and countries with a passive state, with no state intervention. This book is important reading for researchers and students with an interest in sport management, sport development, sport policy and sport governance, as well as for policy-makers, performance directors and managers working in elite sport.

*Socio-economic and Eco-biological Dimensions in Resource use and Conservation* Niranjana Roy, Shubhadeep Roychoudhury, Sunil Nautiyal, Sunil K. Agarwal, Sangeeta Baksi, 2020-01-27 This book presents the outcomes of the 2017 national workshop and international conference organized by CEENR of ISEC, Bengaluru and Assam University Silchar. Addressing the threats to biodiversity and sustainable development resulting from the impacts of human induced pressures on ecosystems and global-warming-driven climate change is a major challenge. It requires increased knowledge and an enhanced information base in order to devise local policies to improve the adaptive capacity of vulnerable socio-ecological systems in developing countries. In this context, the book presents research that has the potential to benefit the environment and empower communities. It appeals to researchers investigating diverse aspects of socio-ecological-biological systems to create strategies for resource use, conservation and management to ensure sustainability.

**The Gender Regime of Anti-Liberal Hungary** Eva Fodor, 2021-11-30 This Open Access book explains a new type of political order that emerged in Hungary in 2010: a form of authoritarian capitalism with an anti-liberal political and social agenda. Eva Fodor analyzes an important part of this agenda that directly targets gender relations through a set of policies, political practice and discourse—what she calls “carefare.” The book reveals how this is the anti-liberal response to the crisis-of-care problem and establishes how a state carefare regime disciplines women into doing an increasing amount of paid and unpaid work without fair remuneration. Fodor analyzes elements of this regime in depth and contrasts it to other social policy ideal-types, demonstrating how carefare is not only a set of policies targeting women, but an integral element of anti-liberal rule that can be seen emerging globally.

*Forschungsethik und klinische Forschung* Dirk Lanzerath, 2016-12 Die neue EU-Verordnung für die Neuregelung der klinischen Prüfung mit Arzneimitteln wird von vielen Beobachtern als ein Rückschritt in der Kodifizierung der medizinischen Forschung angesehen. Gerade durch die in ihr auszumachende Marginalisierung von Ethik-Kommissionen wird ein gewichtiges prozedurales Prinzip geschwächt. Der vorliegende Band möchte aus interdisziplinärer Perspektive zum Diskurs über die Entstehungsgeschichte, die praktischen Auswirkungen sowie die ethischen Herausforderungen der EU-Verordnung beitragen. **Pessoa Coletiva e Processo Penal - Da Titularidade de Direitos Fundamentais à Pertinência de Um Processo Penal da Pessoa Coletiva** Ana Cláudia Salgueiro, 2024-03-07 Num contexto em que as organizações assumem um elevado grau de complexidade e em que ocorre um crescimento da criminalidade no seio dos entes coletivos, emergem novas questões no quadro constitucional, ao nível do conceito de direitos fundamentais e da determinação da sua titularidade. Também no âmbito processual penal surgem matérias não equacionadas, até recentemente, pelo legislador português. Tendo presentes estes pressupostos e na sequência da extensão da responsabilidade criminal das pessoas coletivas ao direito penal clássico, esta investigação propõe-se analisar duas questões concatenadas: a possibilidade de as pessoas coletivas encontrarem proteção nas normas de direitos constitucionais, na qualidade de arguidas; e a ponderação da pertinência de um processo penal da pessoa coletiva.
