Hussain, 2022-01-20 In the last decade, there has been substantial research dedicated towards prospecting physiochemical, nutritional and health properties of novel protein sources. In addition to being driven by predictions of increased population and lack of a parallel increase in traditional protein sources, main drivers for the rise in novel proteins/ novel foods research activities is linked to significant changes in young consumers' attitudes toward red meat consumption and their interest in new alternative protein products. *Alternative Proteins: Safety and Food Security Considerations* presents up-to-date information on alternative proteins from non-meat sources and examines their nutritional and functional roles as food sources and ingredients. Emphasis is placed on the safety of these novel proteins and an evaluation of their potential contribution to food security. Motivations for novel proteins and restrictions for their use are also discussed. The Histories Book 7: Polymnia Herodotus, 2015-08-24 Herodotus was an ancient Greek historian who lived in the fifth century BC (c.484 - 425 BC). He has been called the Father of History, and was the first historian known to collect his materials systematically, test their accuracy to a certain extent and arrange them in a well-constructed and vivid narrative. The Histories-his masterpiece and the only work he is known to have produced-is a record of his inquiry, being an investigation of the origins of the Greco-Persian Wars and including a wealth of geographical and ethnographical information. The Histories, were divided into nine books, named after the nine Muses: the Muse of History, Clio, representing the first book, then Euterpe, Thaleia, Melpomene, Terpsichore, Erato, Polymnia, Ourania and Calliope for books 2 to 9, respectively.

Object-Oriented Technology. EC00P '98 Workshop Reader Serge Demeyer, Jan Bosch, 2003-07-31 At the time of writing (mid-October 1998) we can look back at what has been a very successful EC00P'98. Despite the time of the year – in the middle of what is traditionally regarded as a holiday period – EC00P'98 was a record breaker in terms of number of participants. Over 700 persons found their way to the campus of the Brussels Free University to participate in a wide range of activities. This 3rd EC00P workshop reader reports on many of these activities. It contains a careful selection of the input and a cautious summary of the outcome for the numerous discussions that happened during the workshops, demonstrations and posters. As such, this book serves as an excellent snapshot of the state of the art in the field of object oriented programming. About the diversity of the submissions A workshop reader is, by its very nature, quite diverse in the topics covered as well as in the form of its contributions. This reader is not an exception to this rule: as editors we have given the respective organizers much freedom in their choice of presentation because we feel form follows content. This explains the diversity in the types of reports as well as in their lay out.

The IFL symposia bring together researchers and practitioners that are actively engaged in the implementation and the use of functional and function based programming languages. Every year IFL provides a venue for the presentation and discussion of new ideas and concepts, of work in progress, and of publication-ripe results.

Shakespeare's Women and the Fin de Siècle Sophie Duncan, 2016 Shakespeare's Women and the Fin de Siècle illuminates the most iconoclastic performances of Shakespeare's heroines in late Victorian theatre, through the celebrity, commentary, and wider careers of the actresses who played them. By bringing together fin-de-siècle performances of Shakespeare and contemporary Victorian drama for the first time, this book illuminates the vital ways in which fin-

de-siecle Shakespeare and contemporary Victorian theatre culture conditioned each other. Actresses' movements between Shakespeare and fin-de-siecle roles reveal the collisions and unexpected consonances between apparently independent areas of the fin-de-siecle repertory. Performances including Ellen Terry's *Lady Macbeth*, Madge Kendal's *Rosalind*, and Lillie Langtry's *Cleopatra* illuminate fin-de-siecle Shakespeare's lively intersections with cultural phenomena including the Jack the Ripper killings, aestheticism, the suicide craze, and the rise of metropolitan department stores. If, as previous studies have shown, Shakespeare was everywhere in Victorian culture, Sophie Duncan explores the surprising ways in which late-Victorian culture, from *Dracula* to pornography, and from Ruskin to the suffragettes, inflected Shakespeare. Via a wealth of unpublished archival material, Duncan reveals women's creative networks at the fin de siecle, and how Shakespearean performance traditions moved between actresses via little-studied performance genealogies. At the same time, controversial new stage business made fin-de-siecle Shakespeare as much a crucible for debates over gender roles and sexuality as plays by Ibsen and Shaw. Increasingly, actresses' creative networks encompassed suffragist activists, who took personal inspiration from star Shakespearean actresses. From a Salome-esque Juliet to a feminist Paulina, fin-de-siecle actresses created cultural legacies which Shakespeare-in-performance still negotiates today.
