The Strange Case of Origami Yoda (Origami Yoda #1) Tom Angleberger, 2012-08-07 In this funny, uncannily wise portrait of the dynamics of a sixth-grade class and of the greatness that sometimes comes in unlikely packages, Dwight, a loser, talks to his classmates via an origami finger puppet of Yoda. If that weren't strange enough, the puppet is uncannily wise and prescient. Origami Yoda predicts the date of a pop quiz, guesses who stole the classroom Shakespeare bust, and saves a classmate from popularity-crushing embarrassment with some well-timed advice. Dwight's classmate Tommy wonders how Yoda can be so smart when Dwight himself is so clueless. With contributions from his puzzled classmates, Tommy assembles this first case file in the blockbuster bestselling Origami Yoda series, written by Tom Angleberger, author of Star Wars: Return of the Jedi: Beware the Power of the Dark Side, and hailed by School Library Journal as "honest, funny, and immensely entertaining." ### **Understanding Innovation Through Exaptation**

Caterina AM La Porta, Stefano Zapperi, Luciano Pilotti, 2020-07-09 This book explores the role of exaptation in diverse areas of life, with examples ranging from biology to economics, social sciences and architecture. The concept of exaptation, introduced in evolutionary biology by Gould and Vrba in 1982, describes the possibility that already existing traits can be exploited for new purposes throughout the evolutionary process. Edited by three active scholars in the fields of biology, physics and economics, the book presents an interdisciplinary collection of expert viewpoints illustrating the importance of exaptation for interpreting current reality in various fields of investigation. Using the lenses of exaptation, the contributing authors show how to view the overall macroscopic landscape as comprising many disciplines, all working in unity

within a single complex system. This book is the first to discuss exaptation in both hard and soft disciplines and highlights the role of this concept in understanding the birth of innovation by identifying key elements and ideas. It also offers a comprehensive guide to the emerging interdisciplinary field of exaptation, provides didactic explanations of the basic concepts, and avoids excessive jargon and heavy formalism. Its target audience includes graduate students in physics, biology, mathematics, economics, psychology and architecture; it will also appeal to established researchers in the humanities who wish to explore or enter this new science-driven interdisciplinary field.

Bees Sam Droege, Laurence Packer, 2015-07-07 Get the buzz on bees with up-close and personal, stunning photographs of more than a hundred species. If a bee flies near you or if it lands on your arm, you might want to run away as fast as you can. Or maybe you freeze and hope the bee moves on quickly. No matter your strategy, one thing is certain: you're probably not appreciating the bee's fascinating beauty. But you're missing out! Bees are stunning to observe up close. Aliens or robots might come to mind when you gaze into a blue face with two giant, shiny black eyes. (That's right, bees can be blue, green, and red, too). In Bees, the photography of Sam Droege and the USGS presents more than 100 of the most eye-catching varieties of bees found throughout the world. While bee nerds may appreciate the common honey bee or the rare *Andrena violae*, others can simply enjoy the wide selection of different body shapes, head configurations, unique antennae, and the stories that accompany them. The next time a bee joins your picnic, you might find yourself staring!

**The Christmas Story** Robert Sabuda, 2016-09-27

Hope and joy radiate from the pages of Robert Sabuda's new pop-up book celebrating the Nativity. Long ago in the town of Bethlehem, on a bright and starry night, a baby was born, a child who was called the son of God. Announced by an angel, born in a humble manger, laid in a bed of straw, visited by shepherds and wise men—the age-old, awe-inspiring story of the birth of Jesus is lovingly brought to life by master pop-up artist

Robert Sabuda in six gorgeously imagined scenes, culminating in a 3-D manger sheltering humans and beasts, guarded by an angel above. Glinting with touches of gold and pearlescent foil, The Christmas Story is a visual feast, a holiday treasure to be shared with the whole family.

*Designing Everyday Life* Muzej za arhitekturo in oblikovanje, 2014 BIO 50 breaks with the traditional system of awards, choosing instead to award collaboration, its process and outcomes. Recognizing the idea that design is a discipline

that permeates all layers of contemporary life, BIO launches an unprecedented effort to engage designers and agents from Slovenia and abroad in a collaborative approach that will address themes that affect everyday life. Guided by a group of mentors from various disciplines, eleven teams have tackled the topics Affordable Living Knowing Food Public Water, Public Space Walking the City Hidden Crafts The Fashion System Hacking Households Nanotourism Engine Blocks Observing Space Designing Life Each team has created specific projects that are developed and implemented during the Biennial. Drawing from the complex network generated around BIO 50, Designing Everyday Life serves as a reader, compiling written and visual material on the many layers that compose the biennial. Notes, essays, and interviews, along with sketches, photographs, and diagrams, are aggregating the manifold dimensions of each team's collaborative work process, and illuminate strategies and roles for design in a contemporary world. An opening section introduces the topics discussed throughout the different components of the publication, arguing new priorities for the design discipline in contemporary times. Essays and visual material come together to articulate new roles for a discipline that has changed beyond the universe of mass-made products and solutions, and instead inhabits a fundamentally new universe in a series of small-scale, customized scenarios. Exploring the changing definition of design will illuminate its possible future. The concluding chapter reflects on the history and legacy of the world's

oldest design event. It uses the history of BIO as an opportunity to explore changes in the last fifty years within the design discipline, western society and everyday life. With contributions by Slovenian and international experts, a series of reflections on BIO as a meeting point for design between East and West in Central Europe allow to extrapolate conclusions about European design in the immediate future. Designing Everyday Life also features interviews with Alice Rawsthorn, design critic at New York Times, Konstantin Grcic, industrial designer, and Sasa Machtig, industrial designer. MAO co-produces Designing Everyday Life with Z33, a space for contemporary art based in the Belgian city of Hasselt. Since 2002, Z33 has been realizing projects and exhibitions that encourage visitors to see everyday things in a new way. <http://www.z33.be/en/z33/mission>

**Moving to Mars** Lydia Kallipoliti, 2019-10-17  
Arrive. Survive. Thrive. Getting humans to Mars has become one of the great challenges of our time. Mars holds the potential of human settlement, and the promise of life after Earth. Some of the world's greatest entrepreneurs, architects and engineers are dedicated to conquering this next frontier. Moving to Mars: Design for the Red Planet is one of the first books to focus on the crucial role that design will play in this collective endeavour. From the capsules that will need to keep passengers in harmony during their nine-month journey, to the habitats that they will live in, to the terraforming of the landscape to make it life-sustaining, every detail needs to be designed.

This task is falling to the traditional space agencies such as NASA, and to private entrepreneurs such as Elon Musk and Richard Branson, and to architects such as Norman Foster. As well as technical and practical solutions, this book will examine how design and design thinkers are approaching our move to Mars in unexpected ways. With striking, rarely-seen imagery and a unique design-led focus, this book will appeal to 'space junkies' and design enthusiasts alike.

**Toward an Urban Ecology** Kate Orff, 2016-07-12

Kate Orff, 2017 MacArthur Fellow, has an optimistic and transformative message about our world: we can bring together social and ecological systems to sustainably remake our cities and landscapes. Part monograph, part manual, part manifesto, *Toward an Urban Ecology* reconceives urban landscape design as a form of activism, demonstrating how to move beyond familiar and increasingly outmoded ways of thinking about environmental, urban, and social issues as separate domains; and advocating for the synthesis of practice to create a truly urban ecology. In purely practical terms, *SCAPE* has already generated numerous tools and techniques that designers, policy makers, and communities can use to address some of the most pressing issues of our time, including the loss of biodiversity, the loss of social cohesion, and ecological degradation.

Toward an Urban Ecology features numerous projects and select research from SCAPE, and conveys a range of strategies to engender a more resilient and inclusive built environment.
