Creating a Web Site in Dreamweaver CS3 Nolan Hester, 2007-06-21 Dreamweaver has been the tool of choice for professional Web site designers for years. And now that it is part of the Adobe Creative Suite, even more users, including beginning Web designers, will find it in their hands. This book is for them--all of the people who are itching to design their very first Web site but don't want to learn every last Dreamweaver feature to do so. This full-color volume guide offers them the quickest route to creating a well-designed, friendly Web site! Each short chapter uses big, bold screen shots and step-by-step instructions to illuminate one aspect of this process. By the end of the volume, users will create a simple Web site, fill it with text, graphics and tables, use style sheets, create image maps, add navigation and links, and test and publish the final product. Timely tips and occasional sidebars detailing good design practices round out the book.

The Marshall Mission to China, 1945-1947 John Hart Caughey, 2011-08-28 Biotechnology crop production area increased from 1.7 million hectares to 148 million hectares worldwide between 1996 to 2010. While genetically modified food is a contentious issue, the debates are usually limited to health and environmental concerns, ignoring the broader questions of social control that arise when food production methods become corporate-owned intellectual property. Drawing on legal documents and dozens of interviews with farmers and other stakeholders, *Corporate Crops* covers four case studies based around litigation between biotechnology corporations and farmers. Pechlaner investigates the extent to which the proprietary aspects of biotechnologies--from patents on seeds to a plethora of new rules and contractual obligations associated with the technologies--are reorganizing crop production. The lawsuits include patent infringement litigation launched by Monsanto against a Saskatchewan canola farmer who, in turn, claimed his crops had been involuntarily contaminated by the company's GM technology; a class action application by two Saskatchewan organic canola farmers launched against Monsanto and Aventis (later Bayer) for the loss of their organic market due to contamination with GMOs; and two cases in Mississippi in which Monsanto sued farmers for saving seeds containing its patented GM technology. Pechlaner argues that well-funded corporate lawyers have a decided advantage over independent farmers in the courts and in creating new forms of power and control in agricultural production. *Corporate Crops* demonstrates the effects of this intersection between the courts and the fields where profits, not just a food supply, are reaped.
